Hi Shannon,

I chatted with Jon Kim and here's the situation. He will be at a conference next week for 3 days (Mon – Wed). He could testify on Thursday 3/24 or Friday 3/25 but he says he could do a much better job – with maps and handouts – if he could testify during the week of 3/28. Let us know what works best for the committee, and if it would be okay for him to testify during the week of 3/28. Thanks!

Rebecca

Jon Kim,
Per the suggestion of Rebecca Ellis, I am sending the request below to you to represent the Geological Survey on arsenic and other toxins in wells. She advised me the department does not have expertise in PFOA. Please let me know if your schedule allows you to appear in the committee.

Hello Marjorie,
The House Fish, Wildlife, and Water Resources committee is seeking testimony on the issue of toxins in water sources. Specifically the committee would like to hear the Geological Survey's input on arsenic and PFOA in relation to well testing and contamination prevention. If you are interested and available to testify, times are available at 9AM or 10AM Wednesday March 23rd or 10AM March 24th. If not, could you point me in the direction of an appropriate person to speak on the matter?

Many thanks,

Shannon Blake
