

# Brewster River Cambridge, Vermont

The Brewster River in Cambridge, Vermont has been found to be stressed by stormwater water as measured by the biological community of the river. There are more than 75 discharges to the stream from the developed lands of Jeffersonville and Smuggler's Notch Ski Area. The largest discharge to the river is drainage 68 Cambridge which drain a large section of the Smugglers Notch Ski Area. A second very large area is 4 Jeffersonville which drains downtown Jeffersonville.

The recommended course of action is to install a stormwater treatment structure on many of these discharges that controls the water quality volume, and in the upper watershed the Channel Protection Volume. Maps showing the location of these discharges and other possible retrofit locations on private land is provided. Smugglers Notch Ski Area will have to provide additional treatment of discharges that will be equal to 50% of the water quality volume from 54 impervious acres.

Addressing the large discharges of stormwater to the river will reduce contamination, and stream channel erosion, and will help prevent the river from becoming declared stormwater impaired on the state of Vermont's 303d list of impaired waters. It will also reduce phosphorus currently being discharged to the Lamoille River, Malletts Bay and Lake Champlain.

## Macroinvertebrate Site Summary

<b>Location:</b>	Brewster River	<b>Location ID:</b>	501856
<b>Town:</b>	Cambridge	<b>Bio Site ID:</b>	462100000006
<b>Description:</b>	Located behind ball fields at Elementary School in Cambridge.	<b>WBID:</b>	VT07-13
<b>Stream Type:</b>	Medium High Gradient

## Monitoring Site Summary - River/Stream

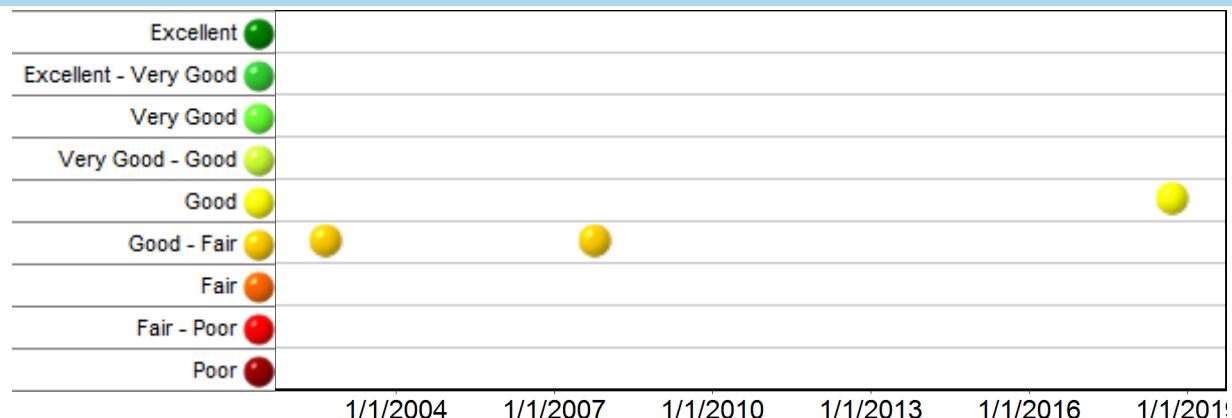

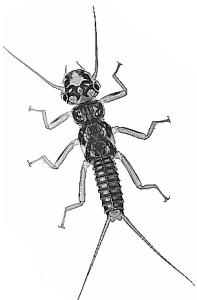

# Brewster River

River Mile: 0.6

Located behind ball fields at Elementary School in Cambridge.  
Cambridge, VT (44.64357, -72.82532)

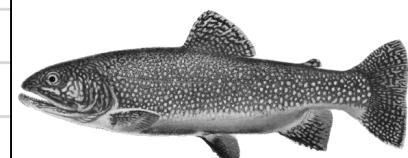

## Macroinvertebrate Assessment

Macroinvertebrate population Assessments are a measure of the biological integrity of the macroinvertebrate community and an indicator of the health of the aquatic biota. (For More Details)

## Fish Assessment

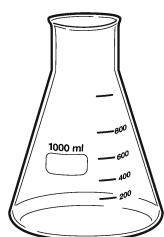

Fish populations provide a measurement of the general health of the aquatic biota. Since fish occupy the top of the food web their population integrates the conditions of lower community types. (For More Details)

1/1/2018 4/1/2018 7/1/2018 10/1/2018 1/1/2019 4/1/2019 7/1/2019 10/1/2019

## Water Quality Measurements

Chemical and physical parameters provide a “snapshot” of current conditions and are used to detect changes in water quality and to make determinations about a waterbody and its watershed. (For More Details)

Characteristic	Description	Trend	Max	Mean	Min
Chloride (mg/L)	At elevated values mostly from deicing		10.2	7.4	6.0
Conductivity (umho/cm)			228.0	116.9	56.1
Nitrogen (mg/L)	Nutrient that may fuel algae blooms		0.3	0.3	0.2
pH	Acidity		8.3	7.8	7.2
Phosphorus (ug/L)	Nutrient that may fuel algae blooms		14.5	10.1	5.1
Turbidity (NTU)	Measure of suspended sediment		2.5	1.5	0.4

DEC Stormwater Infrastructure  
Mapping Project

This map shows high priority subwatersheds which are ranked by connectedness, percent of impervious cover, field observations, and potential retrofit measures and locations.

The data shown on this map is only as accurate as the available sources and field observations allowed and should be used as a basic planning level tool only.

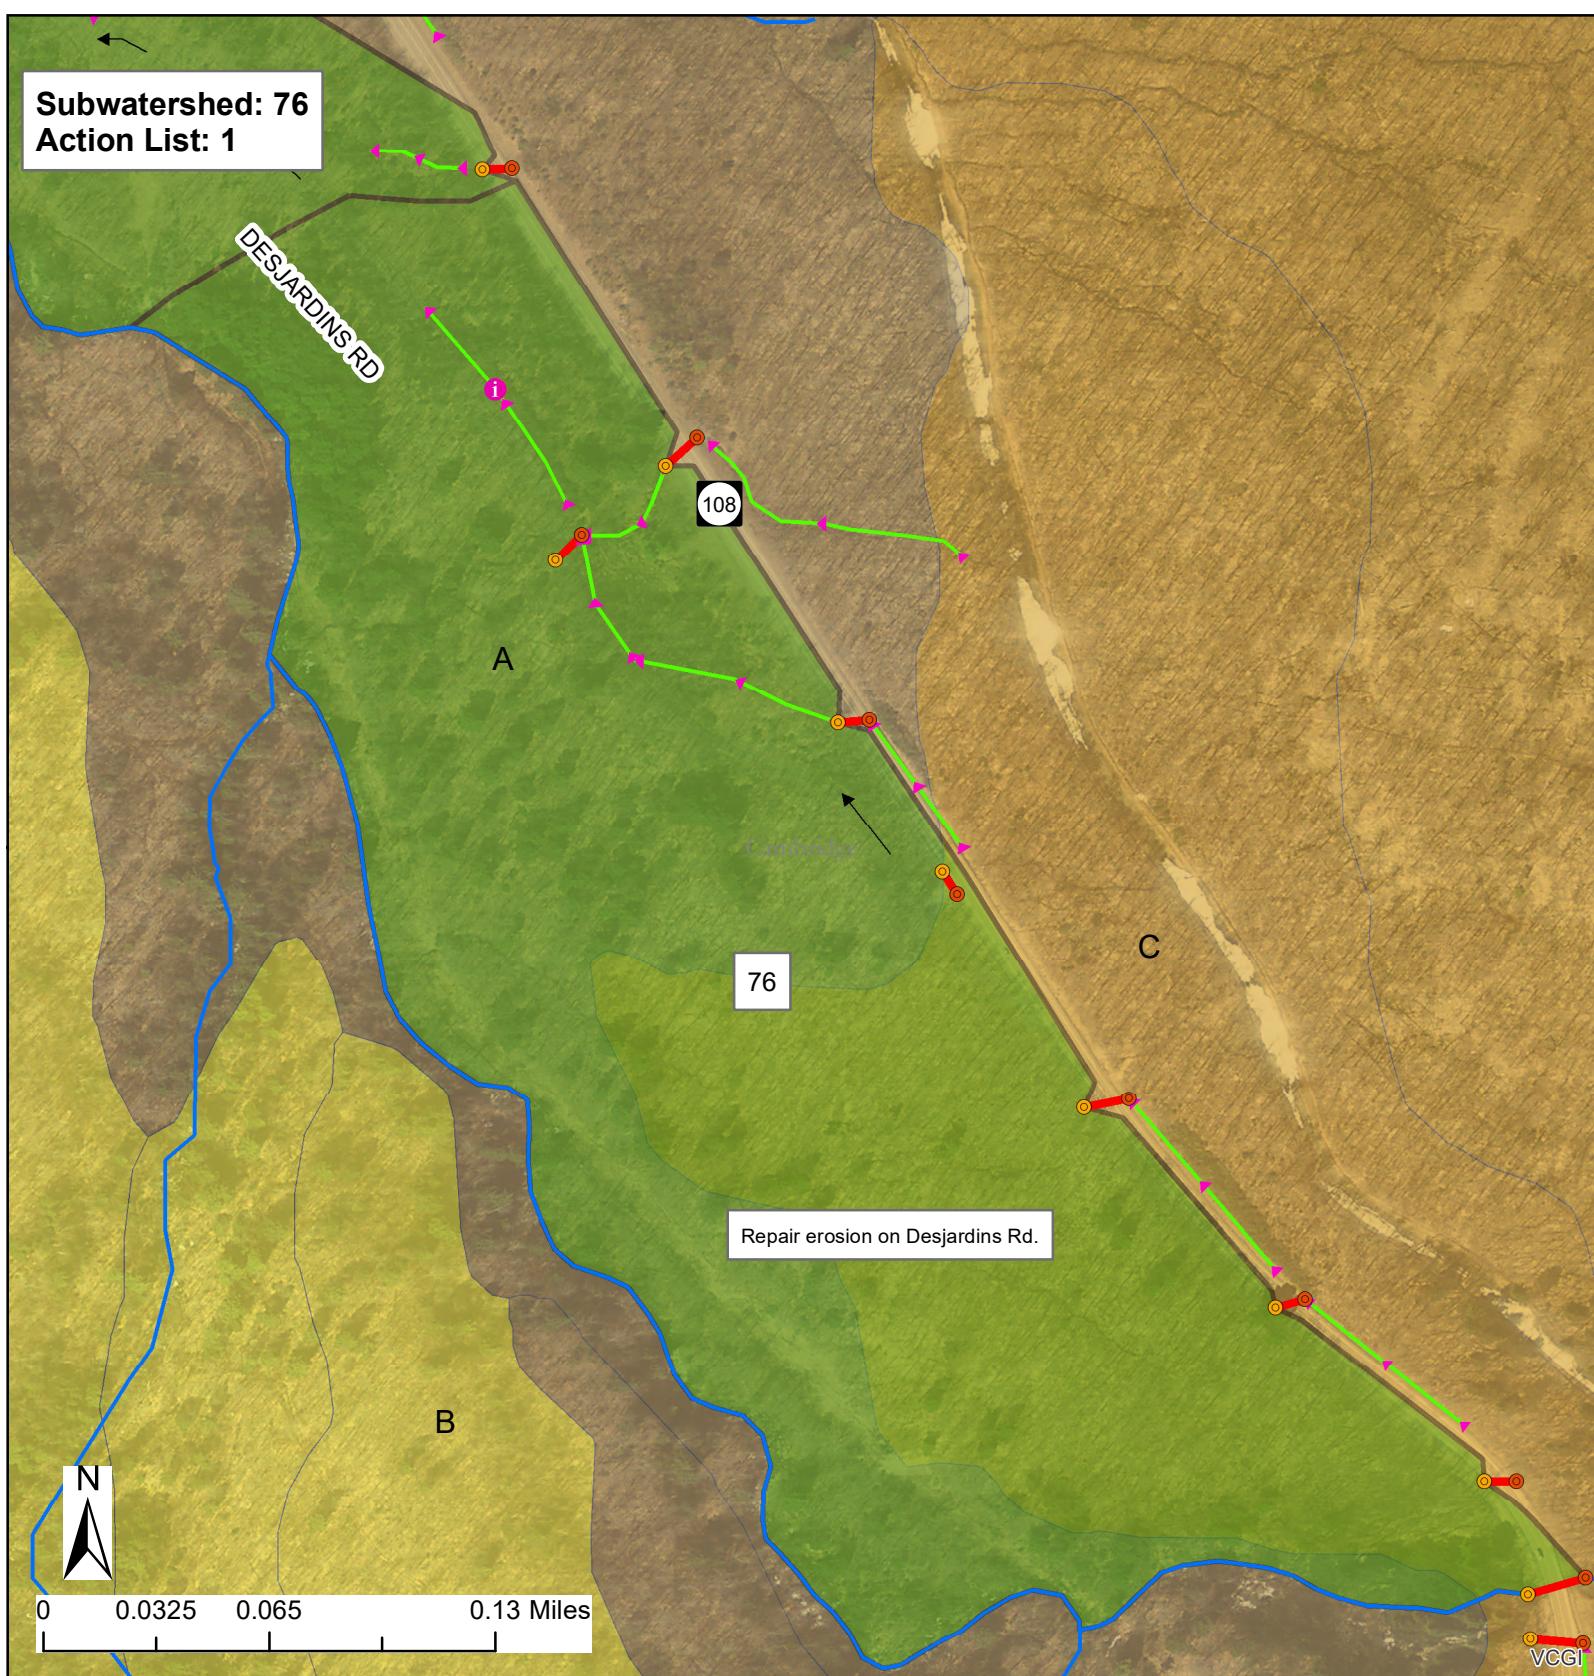

- Stormwater points**
- Pipe Cross (not connected)
  - Catchbasin

## Cambridge, VT

DEC Stormwater Infrastructure  
Mapping Project

This map shows high priority subwatersheds which are ranked by connectedness, percent of impervious cover, field observations, and potential retrofit measures and locations.

The data shown on this map is only as accurate as the available sources and field observations allowed and should be used as a basic planning level tool only.

- Stormwater points**
- Pipe Cross (not connected)
  - Catchbasin
  - Dry Well
  - Drop Inlet
  - Grate/Curb Inlet
  - Yard drain
  - CB tied to sanitary sewer
  - Junction Box
  - Stormwater Manhole
  - Outfall
  - Culvert inlet
  - Culvert outlet
  - Pond outlet structure
  - Treatment feature (see notes)
  - Retrofit
  - Unknown Point

 INFILTRATION SITE PLAN

FIGURE NO.

1

SHEET 1 OF 1

**SITE PLAN**

SCALE: 1" = 75'

Overall Total Area	Overall Impervious Area	3-Acre Site Total	3-Acre Site Impervious	*Phosphorus Load (kg/yr)	*Project Phosphorus Removal Efficiency (%)	*Project Phosphorus Reduction (kg/yr)
27.04	13.39	4.04	2.03	18.35	80%	14.64

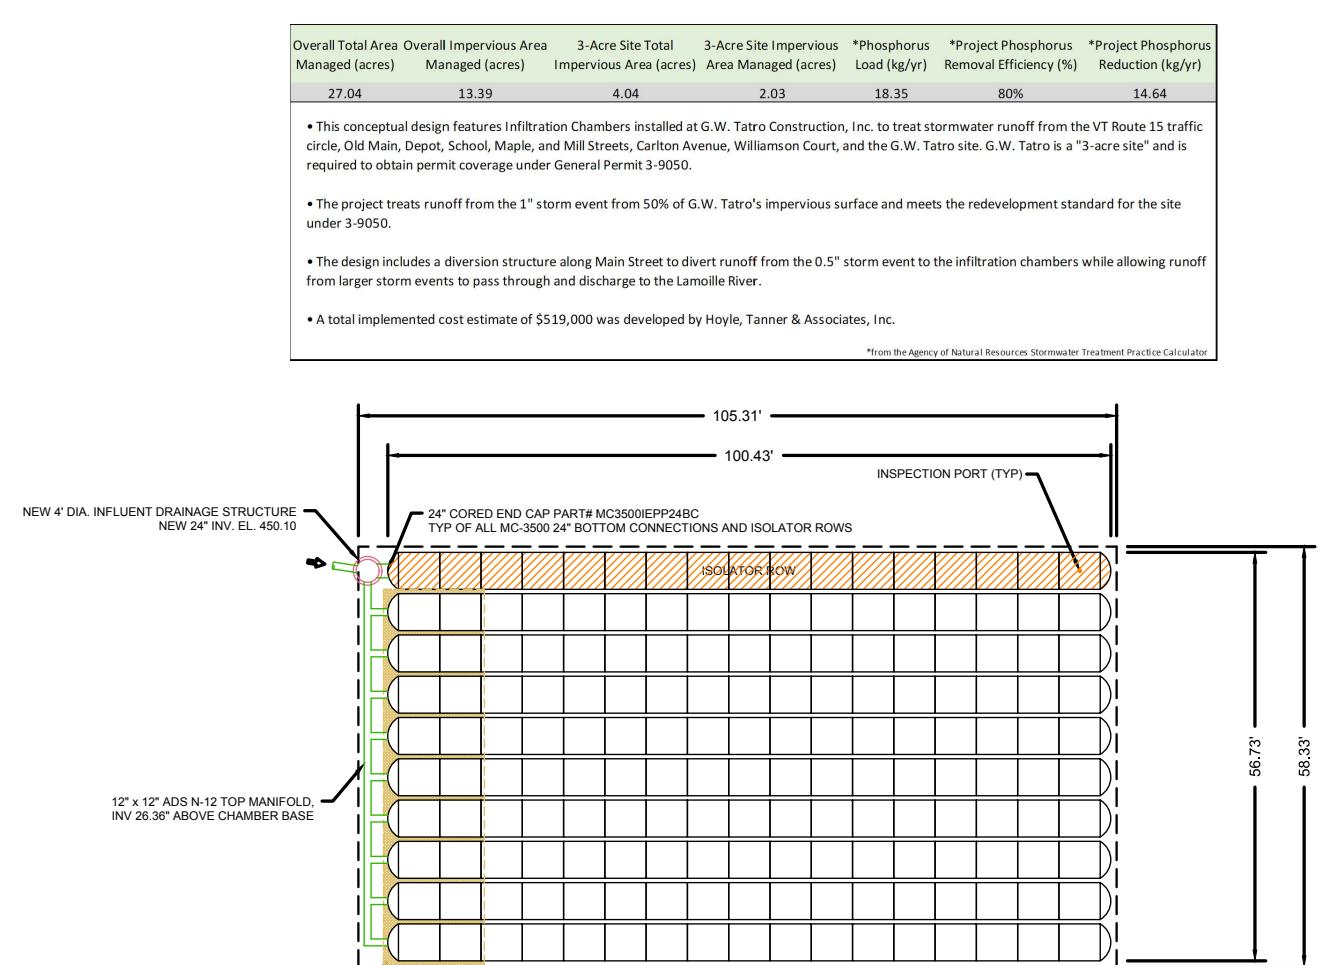

\* This conceptual design features Infiltration Chambers installed at G.W. Tatro Construction, Inc. to treat stormwater runoff from the VT Route 15 traffic circle, Old Main, Depot, School, Maple, and Mill Streets, Carlton Avenue, Williamson Court, and the G.W. Tatro site. G.W. Tatro is a "3-acre site" and is required to obtain permit coverage under General Permit 3-9050.

\* The project treats runoff from the 1" storm event from 50% of G.W. Tatro's impervious surface and meets the redevelopment standard for the site under 3-9050.

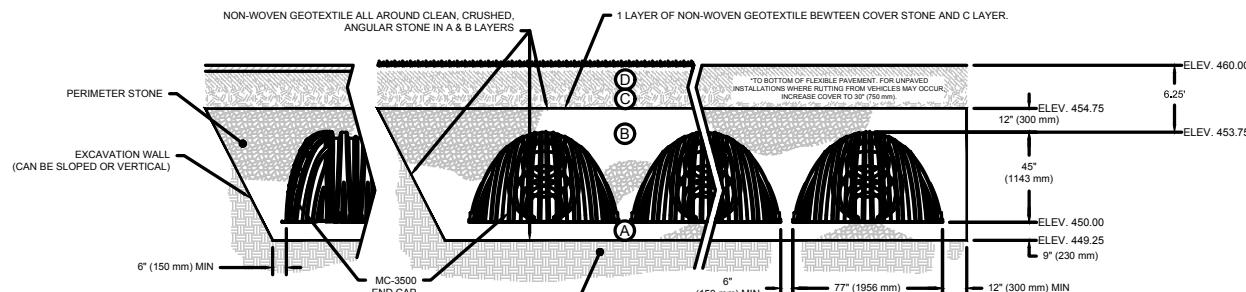

\* The design includes a diversion structure along Main Street to divert runoff from the 0.5" storm event to the infiltration chambers while allowing runoff from larger storm events to pass through and discharge to the Lamoille River.

\* A total implemented cost estimate of \$519,000 was developed by Hoyle, Tanner & Associates, Inc.

\*from the Agency of Natural Resources Stormwater Treatment Practice Calculator

**INFILTRATION CHAMBER PLAN****FILL MATERIALS: STORMTECH MC-3500 CHAMBER SYSTEMS**

MATERIAL LOCATION	DESCRIPTION
D	FINAL FILL: FILL MATERIAL FOR LAYER 'D' STARTS FROM THE TOP OF THE 'C' LAYER TO THE BOTTOM OF FLEXIBLE PAVEMENT OR UNPAVED FINISHED GRADE ABOVE. NOTE THAT PAVEMENT SUBBASE MAY BE PART OF THE 'D' LAYER
C	INITIAL FILL: FILL MATERIAL FOR LAYER 'C' STARTS FROM THE TOP OF THE EMBEDMENT STONE ('B' LAYER) TO 24" (600 mm) ABOVE THE TOP OF THE CHAMBER. NOTE THAT PAVEMENT SUBBASE MAY BE A PART OF THE 'C' LAYER.
B	EMBEDMENT STONE: FILL SURROUNDING THE CHAMBERS FROM THE FOUNDATION STONE ('A' LAYER) TO THE 'C' LAYER ABOVE.
A	FOUNDATION STONE: FILL BELOW CHAMBERS FROM THE SUBGRADE UP TO THE FOOT (BOTTOM) OF THE CHAMBER.
