Air Pollution Control Division
Waterbury, Vermont

AIR POLLUTION CONTROL PERMIT TO CONSTRUCT

Date Permit Issued: June 10, 2008

Owner/Operator: Minor Brothers, Inc. (dba Milton Funeral Home)
237 Route 7
Milton, Vermont 05468

Source: Milton Funeral Home
258 Route 7
Milton, Vermont 05468

FINDINGS OF FACT

(A) FACILITY DESCRIPTION

Milton Funeral Home (also referred to herein as "Permittee") has proposed to construct and operate one (1) crematory at a new building site off Route 7 in the town of Milton, Vermont (also referred to herein as "Facility").

The Facility will consist of the following air pollution related equipment and operations:

Equipment Specifications Combustion			
Equipment/Make/Model	Burner Rating MMBTU/hr	Fuel Type	Date of Manufacture (installation)
IEE Crematory, Model IE43-PPII with Smoke Buster 140 Opacity Monitor	Gross Gas Input: 2 MMBtu/hr Maximum Charge Rate: 150 lb/hr	Natural Gas	2008

[1] MMBtu/hr - Million British Thermal Units per hour maximum rated heat input.

(B) FACILITY CLASSIFICATION

The Facility is classified as a source of air contaminants pursuant to Title 10 of the *Vermont Statutes Annotated* ("10 *VSA*") §555 and §5-401 (1) [Incinerators], of the *Vermont Air Pollution Control Regulations* (hereinafter "*Regulations*"). In addition, §5-101 of the *Regulations* defines a *stationary source* as any structure(s), equipment, installation(s), or operation(s), or combination thereof, which emit or may emit any air contaminant, which is located on one or more contiguous or adjacent properties and which is owned or operated by the same person or persons under common control. Based on this definition, all of the equipment, operations, and structures at the Facility are grouped together by the Agency of Natural Resources, Department of Environmental Conservation, Air Pollution Control Division (hereinafter "Agency") as one stationary air contaminant source for purposes of review under the *Regulations*.

(C) PRIOR AGENCY ACTIONS/APPROVALS

The Facility does not currently operate under any prior "Permit to Construct" issued by the Agency pursuant to 10 *VSA* §556 and §5-501 of the *Regulations* or a "Permit to Operate" issued by the Agency pursuant to 10 *VSA* §556a and Subchapter X of the *Regulations*.

(D) FACILITY PERMIT APPLICABILITY

As noted above, the Facility is classified as a source of air contaminants under §5-401 of the *Regulations*. Pursuant to 10 *VSA* §556 and §5-501 of the *Regulations* a Permit to Construct, or an amendment to any existing Permit to Construct, must be obtained before commencing the construction, installation, modification or operation of an air contaminant source. The proposed installation of a crematory and its proposed site of operation are considered a new source and consequently a Permit to Construct must be obtained.

Pursuant to 10 *VSA* §556a and Subchapter X of the *Regulations* a Permit to Operate is required for any air contaminant source with allowable emissions of all air contaminants combined of ten (10) tons per year ("tpy") or more or that is subject to a standard, limitation or other requirement under §111 and/or §112 of the Clean Air Act.

Allowable emissions from the Facility are estimated to be less than ten (10) tpy combined and therefore the Facility is not required to obtain a Permit to Operate consistent with the requirements of Subchapter X of the *Regulations*. The Facility is not subject to a standard limitation or other requirement under §111 and/or §112 of the Clean Air Act.

The allowable emissions for the Facility are summarized below:

Future Allowable Air Contaminant Emissions (tons/year)[1]						
PM/PM_{10}	SO_2	NO_x	CO	VOCs	Total Criteria	HAPs[2]
0.3	0.3	1.2	0.4	0.4	< 10	<10/25

[1] PM/PM_{10} - particulate matter and particulate matter of 10 micrometers in size or smaller; SO_2 - sulfur dioxide; NO_x - oxides of nitrogen measured as NO_2 equivalent; CO - carbon monoxide; VOCs - volatile organic compounds; HAPs - hazardous air pollutants as defined in §112 of the federal Clean Air Act.

[2] Emissions of individual HAPs each < 10 tpy and emissions of total HAPs combined <25 tpy. Actual total combined HAPs estimated at <1 tpy.

(E) REVIEW FOR THE PERMIT TO CONSTRUCT

(a) New Source Review Designation

Any proposed facility with allowable emissions of fifty (50) tons per year or greater of any air contaminant, or five (5) tons per year or greater of lead, is designated as a major stationary source and is subject to review under §5-501 and §5-502 of the *Regulations*. The proposed project identified in Findings of Fact (A) above will not result in a major increase in emissions. Consequently, the proposed project is designated as a non-major stationary source and is not subject to the requirements of §5-502 of the *Regulations*.

(b) Most Stringent Emission Rate

Pursuant to §5-502 of the *Regulations*, the owner/operator of each new major stationary source or major modification must apply control technology adequate to achieve the Most Stringent Emission Rate ("MSER") with respect to those air contaminants for which there would be a major or significant actual emissions increase, respectively, but only for those currently proposed physical or operational changes which would contribute to the increased emissions.

The proposed project is designated as a non-major modification of a stationary source and therefore is not subject to review under the MSER requirements in §5-502 of the *Regulations*.

(c) Ambient Air Quality Impact Evaluation

An ambient air quality impact evaluation is performed to demonstrate whether or not a proposed project will cause or contribute to violations of the ambient air quality standards and/or significantly deteriorate existing air quality. The Agency's implementation procedures concerning the need for an ambient air quality impact evaluation under §5-406(1) of the *Regulations*, specifies that such analyses may be required when a project results in an allowable emissions increase of ten (10) tons per year or more of any air contaminant, excluding VOCs. Additionally, the Agency may require an air quality impact evaluation where the short-term allowable emission rates will significantly increase as a result of a project.

Based on the level of emissions from this Facility, it is not expected to cause or contribute to a violation of any ambient air quality standard or significantly deteriorate air quality. Therefore, an air quality impact evaluation was not required by the Agency for the proposed project.

(d) Applicable Requirements

The operations at the Facility are subject to the following state and federal laws and regulations, the requirements of which are embodied in the conditions of this Permit.

(i) *Vermont Air Pollution Control Regulations*:

Applicable Requirements from the Vermont Air Pollution Control Regulations
Section 5-201 – Prohibition of Open Burning
Section 5-211(2) - Prohibition of Visible Air Contaminants, Installations Constructed Subsequent to April 30, 1970.
Section 5-221(1) - Prohibition of Potentially Polluting Materials in Fuel, Sulfur Limitation in Fuel.
Section 5-231(2) - Prohibition of Particulate Matter; Incinerator Emissions.
Section 5-241 – Prohibition of Nuisance and Odor.
Section 5-402 – Written Reports When Requested.
Section 5-403 – Circumvention.

(ii) Existing Air Pollution Control Permit to Construct and/or Operate

The Facility does not currently operate under the confines of a Permit to Operate.

(iii) Federal Requirements:

There are currently no applicable federal requirements related to air pollution

control for this Facility.

(F) HAZARDOUS MOST STRINGENT EMISSION RATE

Pursuant to §5-261 of the *Regulations*, any stationary source whose current or proposed actual emission rate of a hazardous air contaminant ("HAC") is equal to or greater than the respective Action Level (found in Appendix C of the *Regulations*) shall achieve the Hazardous Most Stringent Emission Rate ("HMSER") for the respective HAC. This permit was reviewed for compliance with §5-261 of the Regulations using the list of HACs and their respective action levels that were adopted effective March 28, 2007. While mercury emissions are of potential concern with human crematories as a whole due mainly to mercury in amalgam fillings, individual crematories are not expected to exceed the respective mercury Action Level. Therefore the Facility is not expected to have regulated emissions of any HAC in excess of an Action Level and is not subject to §5-261 of the *Regulations* at this time.

Based on the Agency's review of the Facility's application and the above Findings of Fact, the Agency concludes that the Facility, subject to the following Permit conditions, complies with all applicable state and federal air pollution control laws and regulations. Therefore, pursuant to 10 *VSA* §556, as amended, the Agency hereby issues a Permit approving the Facility, as described in the above Findings of Fact, subject to the following:

PERMIT CONDITIONS

- Construction and Equipment Specifications -

(1) The Permittee shall construct and operate the Facility in accordance with the plans and specifications submitted to the Agency and in accordance with the conditions set forth herein, including the equipment specifications as listed in Findings of Fact (A) or their equivalent as approved by the Agency. [10 *V.S.A.* §556(c)] [§5-501(1) of the *Regulations*]

(2) The crematory unit shall be designed and operated with a secondary combustion chamber or zone that ensures complete combustion of the exhaust gases in compliance with the particulate matter and visible emission limits of this Permit. All elements of the crematory unit shall be maintained in good working order at all times. The crematory unit shall be operated and maintained in accordance with the manufacturer's operation and maintenance recommendations. [10 V.S.A. §556(c)] [§5-231(2)(c) of the *Regulations*] [application for #AP-08-021]

(3) Stack Height: The exhaust gases from the crematory shall be vented vertically through a stack which extends a minimum of four (4) feet above the roofline. The Permittee shall at the request of the Agency increase the stack height of any respective stack if, in the judgment of the Agency based on inspections of the actual operations at the Facility, proper or adequate dispersion can not be maintained at the current stack height. The stack shall not be equipped with any device that may obstruct the upward discharge of the exhaust gases such as a fixed raincap. [10 *V.S.A.* §556(c)] [§5-406 of the *Regulations*]

- Operational Limitations -

(4) The Permittee shall ensure that the last combustion chamber or zone of the cremation unit is preheated to a temperature of at least 1,600 degrees F prior to introduction of the charge and shall maintain said temperature throughout the remainder of the cremation unit's operation cycle. The crematory unit operation cycle length shall be set long enough to ensure the full, intended combustion of the charge. [10 V.S.A. §556(c)] [§5-231(2)(c) of the *Regulations*]

(5) The Permittee shall only introduce and charge human and/or animal remains in the crematory unit along with an associated container designed for cremations. Under no circumstances shall the Permittee fire wooden caskets in the crematory unit without prior written approval of the Agency. Approval shall be contingent on the Permittee submitting valid stack emission test data that demonstrates the respective crematory unit make and model complies with the particulate matter emission limit of this Permit while burning a standard charge that includes a wooden casket. Failure to comply with this condition shall be grounds for revocation of this Permit. [10 V.S.A. §556(c)]

(6) The Permittee shall, under no circumstances, fire any plastics containing poly vinyl chlorides (PVCs), caskets made predominantly of fiberglass and/or plastic, household wastes, trash or other solid wastes in the cremation units. Failure to comply with this condition shall be grounds for revocation of this Permit. [§5-241(1) of the *Regulations*]

(7) Only natural gas may be used as fuel in the crematory unless the Permittee obtains prior written approval from the Agency to use another type of fuel. [10 *V.S.A.* §556(c)] [§§5-501 and 5-1015(a)(1) of the *Regulations*] [§5-221(1)(a) of the *Regulations*] [Application for #AP-08-021]

(8) The Permittee shall insure that all operators of the cremation unit receive training on the proper operation of the unit from the manufacturer, vendor or another qualified source. The Permittee shall display, near each unit, certification of that training and a certified operator shall be on-site and available during all periods of operation. [§5-402(1) of the *Regulations*]

(9) The Permittee shall have the crematory unit inspected and maintained by the manufacturer or a qualified service representative annually or after every twenty-five (25) operational cycles, whichever occurs later. [10 V.S.A. §§556(c)] [§5-405(1) of the Regulations]

(10) Operation and Maintenance Plan [Crematory Unit]: The Permittee shall develop and implement an operation and maintenance plan (O&M Plan) for the crematory unit within thirty (30) days following commencement of operation of the unit. The purpose of said O&M Plan shall be to ensure the proper operation and maintenance of the unit in order to ensure continuous compliance with the respective conditions and emission limits of this Permit. The O&M Plan shall include, but not be limited to, a detailed description of proper operating procedures, provisions for maintaining records of daily and routine maintenance inspections, findings of those inspections, and any corrective actions taken. Said O&M Plan shall be present at the facility at all times and shall be made available to representatives of the Agency upon request. The Permittee shall revise said O&M Plan at the Agency's request or on its own motion based on operating experience or to reflect equipment or operational changes. [10 V.S.A. §§556(c)] [§5-405(1) of the Regulations]

- Emission Limitations -

(11) Particulate Matter [Crematory]: Emissions of particulate matter (PM) from the crematory shall not exceed the following limits:

PM Emission Limitations		
Unit	Emission Limitations	
	gr/dscf [1]	lbs/hour[2]
IEE Crematory, Model IE43-PPII	0.06	0.2

[1] gr/dscf equals grains of pollutant emitted per dry standard cubic foot of undiluted exhaust gas corrected to 7% oxygen.
[2] lbs/hour equals pounds of pollutant emitted per hour.

All sampling runs conducted as part of emission tests intended to demonstrated compliance

with the emission limits specified above shall begin when waste material is first introduced into the crematory.

Any emission testing conducted to demonstrate compliance with the above emission limit shall be performed in accordance with 40 *CFR* Part 60, Appendix A, Reference Method 5 or an equivalent method approved in writing by the Agency. [10 *V.S.A.* §556(c)] [§5-404 of the *Regulations*]

(12) Particulate Matter: Emissions of particulate matter ("PM") from any fuel burning device, except motorized vehicles, with a heat input rating of less than ten (10) million British Thermal Units per hour ("MMBTU/hr") shall not exceed 0.5 pounds per MMBTU.

Any emission testing conducted to demonstrate compliance with the above emission limit shall be performed in accordance with 40 *CFR* Part 60, Appendix A, Reference Method 5 or an equivalent method approved in writing by the Agency. [§§5-231(3)(a)(i) and 5-404 of the *Regulations*]

(13) Visible Emissions [Facility Wide]: Emissions of visible air contaminants from any installation at the Facility, except where otherwise noted in this Permit, shall not exceed twenty (20) percent opacity for more than a period or periods aggregating six (6) minutes in any hour and at no time shall visible emissions exceed sixty (60) percent opacity.

Any emission testing conducted to demonstrate compliance with the above emission limits shall be performed in accordance with the proposed Federal Reference Method F-1 contained in the Federal Register Vol.51, No.168, pp. 31076-31081, August 29, 1986 or an equivalent method approved in writing by the Agency. [§§5-211(2), 5-211(3) and 5-404 of the *Regulations*]

(14) Nuisance and Odor: The Permittee shall not discharge, cause, suffer, allow, or permit from any source whatsoever such quantities of air contaminants or other material which will cause injury, detriment, nuisance or annoyance to any considerable number of people or to the public or which endangers the comfort, repose, health or safety of any such persons or the public or which causes or has a natural tendency to cause injury or damage to business or property. The Permittee shall not discharge, cause, suffer, allow, or permit any emissions of objectionable odors beyond the property line of the premises. [§5-241(1) and (2) of the *Regulations*]

- Record Keeping and Reporting -

(15) Records of Natural Gas Use: The Permittee shall maintain records of the total quantity of natural gas consumed in the combustion equipment, in cubic feet, each calendar year. At the beginning of each calendar year, the Permittee shall calculate the total quantity of natural gas consumed in the combustion equipment, in cubic feet, during the previous calendar year. [10 *V.S.A.* §556(c)] [§5-405(1) of the *Regulations*]

(16) Records of Usage: The Permittee shall maintain an operator's log book to record the following information: operators' name, date, start and stop time of each charge, approximate weight of each charge including casket if present, casket description if present (wood, cardboard, crematory friendly casket designed for cremation use, approximate weight) and initial temperature of last combustion zone before charging. A separate section of the log book will also be maintained containing records of material safety data sheets

(MSDSs) on any plastics fired within the cremation units. Said log book shall be present at the Facility at all times and shall be made available to representatives of the Agency upon request. [§5-402(1) of the *Regulations*]

(17) All records shall be retained for a minimum period of five (5) years from the date of record and shall be made available to the Agency upon request. [§§5-402(1), 5-405(1) and 5-1015(a)(7) of the *Regulations*]

(18) The Permittee shall notify the Agency in writing within ten (10) days of any violation, of which it is aware, of any requirements of this Permit. This notification shall include, at a minimum, the cause for the violation and corrective action or preventative maintenance taken to correct the violation. [§§5-402(1) and 5-1015(a)(6) of the *Regulations*]

(19) If requested by the Agency, the Permittee shall notify the Agency at least one (1) day in advance of all scheduled cremations for a specified period of time. [§5-402(1) of the *Regulations*]

(20) The Permittee shall notify the Agency in writing of the date of initial start-up of the crematory within fifteen (15) days after such date. [§5-402(1) of the *Regulations*]

(21) The Permittee shall notify the Agency in writing of any proposed physical or operational change at the Facility which may increase the emission rate of any air contaminant to the ambient air regardless of any concurrent emission reductions that may be achieved. This notification requirement includes, but is not limited to, the proposed installation of any new equipment that is a source of air pollution, including the replacement of an existing permitted air pollution source. If the Agency determines that a permit amendment is required, a new application and the appropriate application fee shall be submitted. The permit amendment shall be obtained prior to commencing any such change except as may otherwise be allowed by the *Regulations*. [10 *V.S.A.* §556(c)] [§§5-402(1) and 5-501 of the *Regulations*]

(22) Annual Registration: The Permittee shall calculate the quantity of emissions of air contaminants from the Facility annually. If the Facility emits more than five (5) tons of any and all air contaminants per year, the Permittee shall register the source with the Secretary of the Agency (hereinafter "Secretary"), and shall renew such registration annually. Each day of operating a source which is subject to registration without a valid, current registration shall constitute a separate violation and subject the Permittee to civil penalties. The registration process shall follow the procedures set forth in Subchapter VIII of the *Regulations*, including the payment of the annual registration fee on or before May 15 of each year. [Subchapter VIII §§5-802, 5-803, 5-807, 5-808 of the *Regulations*]

(23) All records, reports, and notifications that are required to be submitted to the Agency by this Permit shall be submitted to:

Agency of Natural Resources
Air Pollution Control Division
103 South Main Street, Bldg 3 South
Waterbury, Vermont 05671-0402.

[§5-402(1) of the *Regulations*]

- Standard Permit Conditions -

(24) Approval to construct or modify under this Permit shall become invalid if construction or modification is not commenced within eighteen (18) months after issuance of this Permit, if construction or modification is discontinued for a period of eighteen (18) months or more, or if construction is not substantially completed within a reasonable time. The Agency may extend any one of these periods upon a satisfactory showing that an extension is justified. The term "commence" as applied to the proposed construction or modification of a source means that the Permittee either has:

(a) Begun, or caused to begin, a continuous program of actual on-site construction or modification of the source, to be completed within a reasonable time; or

(b) Entered into binding agreements or contractual obligations, which cannot be cancelled or modified without substantial loss to the Permittee, to undertake a continuous program of actual on-site construction or modification of the source to be completed within a reasonable time.

[10 *V.S.A.* §556(c)] [§5-501 of the *Regulations*]

(25) These Permit conditions may be suspended, terminated, modified, or revoked for cause and reissued upon the filing of a written request with the Secretary of the Agency (hereinafter "Secretary") or upon the Secretary's own motion. Any modification shall be granted only with the written approval of the Secretary. If the Secretary finds that modification is appropriate, only the conditions subject to modification shall be re-opened. The filing of a request for modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated non-compliance does not stay any terms or conditions of this Permit. The Secretary may provide opportunity for public comment on any proposed modification of these conditions. If public comments are solicited, the Secretary shall follow the procedures set forth in 10 *V.S.A.* §556 and §556a, as amended. [10 *V.S.A.* §556(d))]

(26) The Permittee shall furnish to the Agency, within a reasonable time, any information that the Agency may request in writing to determine whether cause exists to modify, revoke, reissue, or terminate the Permit or to determine compliance with this Permit. Upon request, the Permittee shall also furnish to the Agency copies of records required to be kept by this Permit. [10 *V.S.A.* §556(c)] [§5-402(1) of the *Regulations*] [40 *CFR* Part 70 §70.6(a)(6)(v)]

(27) By acceptance of this Permit, the Permittee agrees to allow representatives of the State of Vermont access to the properties covered by the Permit, at reasonable times, to ascertain compliance with Vermont environmental and health statutes and regulations and with this Permit. The Permittee also agrees to give the Agency access to review and copy any records required to be maintained by this Permit, and to sample or monitor at reasonable times to ascertain compliance with this Permit. [10 *V.S.A.* §§556(c) and 557] [§§5-402(1), 5-404, and 5-1015(a)(10) of the *Regulations*]

(28) All data, plans, specifications, analyses and other information submitted or caused to be submitted to the Agency as part of the application for this Permit or an amendment to this Permit shall be complete and truthful and, for Title V permit applications, certified by a responsible official whose designation has been approved by the Secretary. Any such submission which is false or misleading shall be sufficient grounds for denial or revocation of

this Permit, and may result in a fine and/or imprisonment under the authority of Vermont statutes. [10 *V.S.A.* §556(c)] [§5-505 of the *Regulations*]

(29) For the purpose of establishing whether or not a person has violated or is in violation of any condition of this Permit, nothing in this Permit shall preclude the use, including the exclusive use, of any credible evidence or information relevant to whether a source would have been in compliance with applicable requirements if the appropriate performance or compliance test or procedure had been performed. [10 *V.S.A.* §556(c)]

(30) Any permit noncompliance could constitute a violation of the federal Clean Air Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. [10 *V.S.A.* §556(c)]

(31) It shall not be a defense for the Permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity to maintain compliance with the conditions of this Permit. [10 *V.S.A.* §556(c)]

(32) No person shall build, erect, install or use any article, machine, equipment or other contrivances, the use of which, without resulting in a reduction in the total release of air contaminants to the atmosphere, reduces or conceals an emission which otherwise would constitute a violation of these *Regulations.* [§5-403 of the *Regulations*]

(33) The provisions of this Permit are severable. If any provision of this Permit, or its application to any person or circumstances is held invalid, illegal, or unenforceable by a court of competent jurisdiction, the invalidity shall not apply to any other portion of this Permit which can be given effect without the invalid provision or application thereof. [10 *V.S.A.* §556(c)]

(34) This Permit does not convey any property rights of any sort or any exclusive privilege, nor does it authorize any injury to private property or any invasion of personal rights. [10 *V.S.A.* §556(c)]

(35) All subsequent owners and/or operators of this Facility must request an amendment and transfer of this Permit prior to commencing any operations covered by this Permit. All subsequent owners and/or operators shall submit to the Agency as part of the request for amendment all such information the Agency deems necessary to establish legal ownership and/or interest in the property and all such information the Agency deems necessary to ensure the new owners and/or operators will construct and operate the Facility in compliance with the *Regulations* and this Permit. The terms and conditions of this Permit shall remain in full force and effect after submittal of the request for amendment and until the issuance of an amended Permit or denial. Should the Secretary deny the request, the new owner and/or operator must take whatever action is necessary to comply with the denial. [10 *V.S.A.* §556] [§§5-501, 5-1004, and 5-1013(a) of the *Regulations*]

(36) Pursuant to 10 V.S.A. Chapter 220, any appeal of this decision must be filed with the clerk of the Environmental Court within 30 days of the date of the decision. The appellant must attach to the Notice of Appeal the entry fee of $225.00 payable to the State of Vermont. The Notice of Appeal must specify the parties taking the appeal and the statutory provision under which each party claims party status; must designate the act or decision appealed from; must name the Environmental Court; and must be signed by the appellant or their attorney.

In addition, the appeal must give the address or location and description of the property, project or facility with which the appeal is concerned and the name of the applicant or any permit involved in the appeal. The appellant must also serve a copy of the Notice of Appeal in accordance with the Rule 5(b)(4)(B) of the Vermont Rules for Environmental Court Proceedings. For further information, see the Vermont Rules for Environmental Court Proceedings, available on-line at www.vermontjudiciary.org. The address for the Environmental Court is 2418 Airport Road, Suite 1, Barre, Vermont 05641 (Tel. #802-828-1660).

The Agency's issuance of this Air Pollution Control Permit relies upon the data, judgment, and other information supplied by the Permittee. The Agency makes no assurances that the air contaminant source approved herein will meet performance objectives or vendor guarantees supplied to the source Permittee. It is the sole responsibility of the Permittee to operate the source in accordance with the conditions herein and with all applicable state and federal standards and regulations.

Dated this 10th day of June, 2008, in the town of Waterbury, county of Washington, state of Vermont.
