Municipal Pollution Control Projects Priority List for State FY 2012 and Clean Water Intended Use Plan for Federal FY 2011

Municipalities and Interested Parties:

On, February 10, 2011, the Department notified municipalities and other interested parties of the availability of the Draft Municipal Pollution Control Projects Priority List for state Fiscal Year 2012 and the Draft Clean Water Intended Use Plan for federal Fiscal Year 2011 for review and comment, and a reminder about the public hearing held on February 23, 2010. The public comment period was open through March 28, 2011. A Public Responsiveness Summary has been prepared to address the oral and written comments received by the Department at the public hearing and through the comment period. The Public Responsiveness Summary is attached.

Pursuant to the authority provided in the State of Vermont Municipal Pollution Control Priority System, the Department of Environmental Conservation has adopted the priority list as it appears on the following sheets. The Municipal Pollution Control Projects Priority List for State Fiscal Year 2012 indicates those projects the Department anticipates will be receiving state and/or federal funding through the end of state Fiscal Year 2012 and until the FY 2013 list is adopted. The sheets also includes (right portion) the Planning List which shows projects anticipated to be funded during Fiscal Years 2013 through 2016. These listings present those projects potentially funded from grant programs or the revolving loan program over the next five state fiscal years, and are based on anticipated federal and state appropriations.

If you have any questions or desire clarification of any of the content of these documents, please contact Winslow Ladue (802-241-3404) at the Facilities Engineering Division.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Mears", written over a horizontal line.

David Mears, Commissioner

Department of Environmental Conservation

**VERMONT AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

State FY 2012 Municipal Pollution Control Project Priority List
and Federal FY 2011 Clean Water Intended Use Plan

General Information

1. Project priority points awarded in accordance with the Department's Municipal Pollution Control Priority System are listed in the FY 2012 Pollution Control Project Priority List.
2. Priority points are assigned to projects on the Planning List when these projects are proposed for the priority list. Whether all construction projects ready to proceed in a particular year will be funded depends on the amount of funds allocated to the program by the Vermont legislature and through the federal capitalization grant for the Clean Water State/EPA Revolving Loan Fund (CWSRF). Planning projects are not funded in order of their priority, but rather at a rate necessary to bring sufficient projects to the implementation phase to use all of the anticipated grant and loan funds each year.
3. The Clean and Clear Initiative (now called the Ecosystem Restoration Program) calls for the accelerated funding of Phosphorus Removal Projects at wastewater treatment plants which are identified as requiring reduced phosphorus discharge limits in the Lake Champlain Phosphorus TMDL Report. Funds have been provided for this purpose in the 2005 through 2011 Capital Bills.
4. Appearance of projects on the Project Priority List indicates eligibility for funding assuming all other requirements are met. The dollar amounts may change from those listed as project costs change.
5. The Discharge Permits for all municipal wastewater facilities were reviewed for requirements which might result in infrastructure projects over the next five years, and these were included on the appropriate year Planning List.

PRELIMINARY AND FINAL DESIGN ENGINEERING PLANNING LIST ABBREVIATIONS AND NOTATIONS

The lists use abbreviations to identify project types. These abbreviations are listed, defined and described below.

“**CSO**” stands for **combined sewer overflow** abatement projects. Combined sewers carry both wastewater and stormwater and become hydraulically overloaded during rainfall events. This results in overflows to surface waters that are in violation of state and federal standards.

“**DWF**” represents **dry weather flow** projects. These are projects which abate pollution that occurs during dry weather periods, when systems are not stressed by rainfall events (see CSO discussion). Examples are the construction of a collection system and new treatment facility to eliminate direct discharges to surface waters, or the extension of a sewerage system to collect the flows from failing septic tank or leach field systems and convey them to an existing treatment facility.

“**ENL**” stands for **enlargement** of current facilities to handle increased wastewater flows resulting from municipal growth. These projects receive relatively low priority.

“**NPS**” stands for **non point source**.

“**OTHER**” stands for **other**, and represents projects that do not neatly fit into the primary categories.

“**OTHER -G**” stands for **other-green** projects. These projects may include energy efficiency, water efficiency, use of green infrastructure to infiltrate water, or other innovative projects.

“**PHOS**” stands for **phosphorus** removal projects. State statute prohibits most discharges to the drainage basins of Lake Champlain and Lake Memphremagog that contain a phosphorus concentration in excess of 0.8 milligrams per liter on a monthly-average basis, and requires that phosphorus effluent limits be implemented in any drainage basin where needed to meet the requirements of a total maximum load document or attain compliance with water quality standards.

“**REFURB**” stands for **refurbishment**. When a facility’s NPDES permit is renewed for the five year period within which its twentieth year of operation falls, the permit includes a requirement to perform an evaluation of the facility to identify the improvements and renovations that are necessary to enable the facility to continue to operate efficiently and meet its discharge standards for another twenty to twenty-five year design period.

“**SEWEX**” stands for **sewer extensions**.

“**SEWREP**” stands for **sewer line replacement**.

“**STRMW**” stands for **stormwater**.

VERMONT
CLEAN WATER INTENDED USE PLAN
FEDERAL FISCAL YEAR 2011 FUNDS

July 12, 2011

A. Introduction

Vermont has agreed to submit to the U.S. Environmental Protection Agency, as part of its annual application for a Clean Water Capitalization Grant under Title VI of the Water Quality Act of 1987 (the Act), a Clean Water Intended Use Plan (CWIUP) which meets requirements of Section 606(c) of the Act and the Clean Water Capitalization Grant Agreement. The CWIUP serves as the planning document to explain how each fiscal year's appropriation for the Vermont – EPA Clean Water State Revolving Fund (CWSRF) will be used.

B. Short Term Goals and Objectives

Vermont holds the following short term goals and objectives for use of the CWSRF:

- (1) To coordinate NPDES permit schedules with anticipated award of CWSRF loans such that projects are brought into preliminary and final planning in time to assure their readiness to proceed to construction when capitalization grant funds become available.
- (2) To develop any rules, guidance or procedures necessary to implement the Vermont - EPA pollution control revolving fund.
- (3) To provide local government with low cost financial assistance.
- (4) To coordinate state funded programs for wastewater treatment facilities with activities of the CWSRF.
- (5) To provide effective program management to ensure integrity of the CWSRF.

The Federal Fiscal Year 2011 CWSRF loans have a four million dollar cap due to the large number of projects and large demand for funds. Project costs above the cap may be eligible

for CWSRF loan funding in subsequent years as continued projects. Projects with continued project status receive an elevated priority when developing future priority lists. This year stormwater and nonpoint source projects are offered funding as provided for in Title 24, § 4753 (d) (2).

C. Long Term Goals and Objectives

The primary long term goal of the CWSRF is to provide financial assistance to Vermont municipalities to fund the completion of all known enforceable requirements of the Act.

The second long term goal of the CWSRF is to ensure the fund operates in perpetuity to provide continuing financial assistance to Vermont municipalities for future pollution control needs, to include new wastewater treatment facility construction, existing facility enlargement or refurbishment, sewer extensions, combined sewer overflow abatement, sludge and septage treatment and disposal, stormwater management facilities, advanced waste treatment determined necessary to meet water quality standards, and other projects deemed necessary for pollution control.

Combined sewer overflow abatement projects presently receive a CWSRF loan in the amount of 50% of the total eligible project cost, and a 25% construction grant from state funds when available. The remaining 25% of project funds comes from local bond issues. Certain sludge and septage treatment and disposal projects presently qualify for a mix of 50% CWSRF loan and a 50% state grant on eligible project costs. When sufficient state capital funds cannot be secured to provide the grants, it may be necessary to fund CSO and sludge and septage projects with a loan on the total project in order to assure the most beneficial use of the federal loan funds.

Other eligible projects will receive CWSRF loans on 100% of eligible project costs. Such eligible projects include: sewer extensions, facility enlargement and refurbishment, and sludge and septage treatment improvements and disposal that do not qualify for state grant funding.

Although the CWSRF may be used for the refinancing of local debt obligations incurred after March 7, 1985, Vermont does not intend to use the fund in this way until all necessary pollution control projects have been constructed, unless there is compelling public benefit to be secured. The interest rate on CWSRF loans issued to refinance debt has been set at eighty percent of the average rate on marketable obligations of the state. All other CWSRF loans are currently issued at zero percent interest. An administrative fee of up to two percent on construction loans took effect on July 1, 1999. Fee proceeds will be deposited into a dedicated account separate from the CWSRF account, referred to as the administrative account. In the future, if funds held in the administrative account are in excess of that necessary to fund the state's administration of the CWSRF program, some of those funds may be transferred to the CWSRF account for project funding.

D. CWSRF Capitalization Grants for Federal Fiscal Year 2011 and Future Years

The federal fiscal year 2011 capitalization grant allotment available to Vermont is \$7,322,000 as authorized by Title VI of the Clean Water Act. One hundred thousand dollars are allocated to the federal 604b program leaving \$7,222,000 for use as loans and administrative costs. The federal capitalization grant for future years is not known at this time but is assumed to be at a similar level of funding in 2011. The Pollution Control Project Planning List is intended to show anticipated construction and planning projects for the immediate five-year period inclusive of state fiscal year 2012. At this time, there is a larger volume of projects and requests for funds in SFY 2012 and 2013 than the fund will likely support. A cap on the CWSRF loan funds of four million dollars per project is set to provide significant funding to larger projects while enabling the fund to support more of the remaining higher ranked projects and to provide the subsidy to more communities. This year, stormwater projects are offered funding as provided for in Title 24, § 4753 (d) (2).

E. Criteria and Methods for Distribution of Funds

The Vermont CWSRF initiated operations in FY89 and all initial financial assistance activities of the CWSRF have been in the form of loans. Loans will continue to be made in accordance with a project's priority list ranking (noted on the Priority List) established annually through the Municipal Pollution Control Priority System.

The Vermont General Assembly enacted Act 75 creating 24 V.S.A. Chapter 120 in the 1987 session, which established Vermont's Clean Water Revolving Fund and set out certain priority criteria for the purpose of ranking prospective projects. The Municipal Pollution Control Priority System incorporates those criteria in addition to criteria required in federal construction grant regulations 40 CFR Section 35.915. Chapter 120 was amended in the 2007 session to increase the percentage of the fund which could be used for certain stormwater projects from 10 percent to 30 percent.

F. Use of Funds for Nonpoint Source Projects

In fiscal years 2004, 2007 and 2008 Vermont issued \$150,000 loans to a municipality to fund a municipal loan program for the replacement of individual septic systems.

G. Reallocated Funds

In the event funds are reallocated from the DWSRF to the CWSRF, or additional federal funds are made available beyond the anticipated amount; Vermont will advance these funds to the appropriate projects in accordance with this Intended Use Plan, and the Municipal Pollution Control Priority System.

H. Public Participation

Vermont follows public participation procedures in the development of the annual Pollution Control Priority List (PPL) and CWIUP. The CWIUP is developed and adopted annually along with the PPL using the same public participation procedure employed for adoption of the PPL. That procedure is outlined in the Municipal Pollution Control Priority System.

Vermont implements public participation for specific projects through the environmental review for CWSRF funded projects in accordance with the department's Environmental Review Procedures For Projects Funded Through the Vermont/EPA Revolving Loan Program. This procedure was approved by the EPA Regional Administrator in accordance with the August 2, 1989 CWSRF Operating Agreement between the State of Vermont and the U.S. Environmental Protection Agency, Region I.

Please see attached "Hearing and Public Responsiveness Summary".

I. Annual Report

In accordance with the requirements of Section 606(d) of the Act, Vermont provides EPA with an Annual Report, submitted to EPA within 90 days of the end of the state fiscal year. The Annual Report contains information on how the state has met the goals and objectives of the previous fiscal year as stated in the IUP and grant agreement. The Annual Report also describes how well the existing SRF financial operating policies, alone or in combination with other state financial assistance programs, provide for the long term fiscal health of the fund, assist communities to increase local responsibility for compliance, and carries out other provisions specified in the State Clean Water Strategy. The Annual Report also provides information on loan recipients, loan awards/disbursements, and environmental assessment determinations.

The Annual Report will also establish that the State has:

- (1) Reviewed all CWSRF funded section 212 projects in accordance with the approved environmental review procedures (section 602(a));
- (2) Deposited its match on or before the date which each quarterly grant payment was made (section 602(b)(2));
- (3) Made binding commitments to provide assistance equal to 120 percent of the amount of each grant payment within one year after receiving the grant payment (section 602(b)(3)); and
- (4) Expended all funds in an expeditious and timely manner (section 206(b)(4)).

J. Environmental Benefits Reporting

A Clean Water State Revolving Fund Environmental Benefits Assessment Form will be completed each time a loan is transacted during the fiscal year.

K. Project Funding

Projects Anticipated to Receive Federal FY2011 CWSRF available Funds*
(Award of FFY2011 Funds are anticipated to be made during SFY12 and 13)

Project /Activity	Total Project Cost**	SRF Loan	Federal Share FFY 2011 Funds
See 2012 Priority List Attached	\$23,999,832	\$23,999,832	\$6,933,120
Vermont SMRF Administrative Expense	\$288,880		\$288,880
Total	\$24,288,712	\$23,999,832	\$7,222,000

Please see attached Municipal Pollution Control Projects Priority List for State Fiscal Year 2012 for additional information on projects to be funded. The cash draw ration is 1 to 5, or 17 to 83 percent.

L. Green Project Reserve

The Vermont target for Green Project Reserve for Federal Fiscal Year 2011 is \$1,444,400. This year Brattleboro will receive an additional \$4,000,000 loan from FFY 2011 funds to fund their \$7,840,000 sludge digestion upgrade. This upgrade will increase the effectiveness for digestion of waste sludge by using a new thermophilic digester, two upgraded mesophilic digesters with new covers, mixing and heating equipment, and all related heating and pumping equipment associated with the phased digestion process. These possesses will increase production of methane gas which will be used in the co-gen facilities. This technology will produce a Class A biosolid for unrestricted reuse and is new to Vermont and to the region.

M. Addition Subsidy

Additional subsidy will be implemented using principal forgiveness to projects on the State Fiscal Year 2012 priority list. Additional subsidy will be at least \$669,233 in total and will be made available as a ten percent subsidy to the higher priority projects allocated Federal Fiscal Year 2011 plus State Matching funds.

* See attached Extended Portion of Intended Use Plan Project Funding List

** Costs will change as projects are refined

VERMONT AGENCY OF NATURAL RESOURCES
DEPARTMENT OF ENVIRONMENTAL CONSERVATION
State FY 2012 Municipal Pollution Control Project Priority List
and Federal FY 2011 Clean Water Intended Use Plan

Hearing and Public Responsiveness Summary

A public hearing to receive comment on the state *FY 2012 Municipal Pollution Control Projects Priority List* and the federal *FY 2011 Clean Water Intended Use Plan* prior to adoption was convened at approximately 2:00 pm on Wednesday February 23, 2011. The hearing was held in the Skylight Conference Room at the state office complex in Waterbury, Vermont. Notice of the meeting was sent to all municipalities, organizations, and individuals appearing on the mailing list maintained for this purpose. Winslow Ladue of the Facilities Engineering Division moderated the meeting. Five members of the public attended; four from three engineering firms and one from a non-profit service organization. Four Department representatives attended the hearing. It was noted that any verbal or written comments received through March 28, 2011 would be considered in the preparation of the final documents.

Comments received at the meeting and in follow-up correspondence included the following types of remarks. Responses to these remarks follow each comment.

1. Updates to start dates on several projects. Suggested updates were made to the priority and planning lists.
2. Requests to add sludge and septic grants to the priority lists. State grants will be added when they are approved by the legislature. Final priority lists will depend on actions to be taken at the State and Federal levels.
3. Requests for additional State Revolving Fund needs for a project in Brattleboro. Need reflected represents in this case the minimal amounts planned.
4. Requests to have continuing projects shown on priority list. Continuing projects requesting funds are shown. In some cases funding for continuing projects is available on the 2011 priority list.
5. Requests to have funding for a project in Essex Junction Village moved from 2014 to 2013. Project listing for funding on the Planning List are in order of priority points. At this time, funding for the Essex Junction Village project is limited to funding in 2014 based on projected availability of funding and project priority points. Either of these factors, as well as readiness to proceed, may change in the coming year and result in a change in funding year.
