Notice of Determination of Eligibility for Categorical Exclusion

Danville Fire District No. 1, WSID #5037  
Water System Improvements

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Danville Fire District No. 1 Water System WSID #5037 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

Danville Fire District No. 1 water distribution improvements project consists of the construction of approximately 3,200 linear feet (L.F.) of 12" pipe, 2,150 L.F. of 8" pipe, 170 L.F. of 6" pipe, 70 L.F. of 4" pipe, and 1550 L.F. of copper pipe along Hill Street, Grandview Avenue and Highland Avenue. Project includes replacement of water services, 4 interconnections and appurtenances. The project will replace existing inadequate sized and old water main.

Our consideration of the Danville Fire District No. 1 request included reviewing the Environmental Information Document, dated February 2009, which was completed and submitted by the engineering consultant, Stantec. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
