Notice of Determination of Eligibility for Categorical Exclusion

Deer Creek Condominiums, WSID #5653
Dover, Vermont
DWSRF Loan RF3-286

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, Deer Creek Condominiums water system located in Dover, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project includes construction of a radium water treatment system to comply with the Federal Maximum Contaminant Level (MCL) for combined radium in public drinking water. The project includes 1,000 gallon concrete pump station, 200 linear feet of force main, boring under Route 100 to connect to the North Branch Fire District No. 1 sewage collection system, water softening equipment, plumbing and electrical work.

Our consideration of the request included review of an Environmental Information Document and supporting documentation prepared by Weston & Sampson, Inc., dated August 27, 2012. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a categorical exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 654-8969. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Drinking Water and Groundwater Protection Division's website located at www.vermontdrinkingwater.org.
