Notice of Determination of Eligibility for Categorical Exclusion

Town of Elmore, WSID #5152
Water System Improvements

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, the Town of Elmore has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project includes the construction of a new treatment building for disinfection, two new water storage tanks, a booster pump station, and approximately half a mile of new distribution mains. The new building will be constructed below the existing spring source and the storage tanks and booster pump station will be installed adjacent to the building. New distribution mains will be installed along Elmore Pond Road from the new treatment building to Vermont Route 12, where they will run north approximately 800 feet and south approximately 700 feet.

Our consideration of the Town of Elmore request included reviewing an Environmental Information Document dated October 2010 and prepared by Weston & Sampson Engineers, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
