Determination of Eligibility for Categorical Exclusion

Lake Region Union High School District-Lake Region Union High School Water System,
WSID #6093
Water System Improvements
DWSRF Project RF3-216

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Lake Region Union High School, WSID #6093, has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project includes: replacement of the existing 10,000-gallon storage tank with a new 4,000-gallon tank, relocating the water meter, electrical controls, and booster pumps above grade in the treatment building, and drainage upgrades.

Our consideration of the Lake Region Union High School request included reviewing environmental information and documentation completed and submitted by the Vermont Rural Water Association. Upon completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont.
