Notice of Determination of Eligibility for Categorical Exclusion

Town of Plainfield, WSID #5277
Plainfield, Vermont
Water System Improvements
DWSRF Loan RF3-277

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, the Plainfield Water System located in the Town of Plainfield, VT has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project includes construction of approximately 950 linear feet of 8" diameter waterline and 1,350 linear feet of 4" diameter waterline on Bunker Hill Circle to replace existing small diameter waterline. Existing customers will be reconnected to the waterline within the Town right-of-way. This area was identified as a high priority in the preliminary engineering study completed in 2006.

Our consideration of the request included review of an Environmental Information Document and supporting documentation prepared by Aldrich + Elliott Water Resource Engineers, dated February 2, 2010. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a categorical exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 654-8969. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Drinking Water and Groundwater Protection Division's website located at www.vermontdrinkingwater.org.
