Notice of Determination of Eligibility for Categorical Exclusion

Town of Randolph, WSID #5179
Water System Improvements
DWSRF Loan RF3-241

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Town of Randolph Water System WSID #5179 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes installation of approximately 400 linear feet of 10" waterline, via directional bore, under the Third Branch of the White River at the Town of Randolph Recreational Department. This segment of the project is being added as a change order to the current Randolph Rt. 66 and Booster Pump Station project currently under construction.

Our consideration of the Town of Randolph request included reviewing the Environmental Information Document and supporting documentation dated November 2010, which was completed and submitted by Forcier Aldrich & Associates. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
