Notice of Determination of Eligibility for Categorical Exclusion

South Wallingford Water Company WSID #5243
Water System Improvements
DWSRF Project Number RF3-253

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, the South Wallingford Water Company has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of a disinfection building, a master water meter, approximately 2,600 feet of water main replacement, and repairs to the existing spring box and water storage tank.

Our consideration of the South Wallingford Water Company's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Otter Creek Engineering, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection on the second floor of the VSAC Building on 10 East Allen Street, Winooski, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Drinking Water and Groundwater Protection Division's website.
