Notice of Determination of Eligibility for Categorical Exclusion

Village of Waterbury, WSID #5284
Water System Improvements

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Village of Waterbury Water System WSID #5284 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes:

- 1.) Replace 2,600' of existing 10" cast iron water line from Blush Hill reservoir to O'Hear Court.
- 2.) Laurel Road water main interconnection.

Our consideration of the Village of Waterbury request included reviewing the Environmental Information Document, dated February 2009, which was completed by the Village's engineering consultant Stantec. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
