Notice of Determination of Eligibility for Categorical Exclusion

Whiting Water Corporation, WSID #5012
Water System Improvements
DWSRF Project Number AR3-001

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Whiting Water Corporation, Water System WSID #5012 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes replacement of existing storage facility and booster pump station, and replacement of the water distribution system including services using directional boring methods.

Our consideration of the Whiting Water Corporation request included reviewing the Environmental Information Document and supporting documentation, dated June 2009, which was completed and submitted by Green Mountain Engineering, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
