Notice of Determination of Eligibility for Categorical Exclusion

Town of Windsor, WSID #5341
Water System Improvements
DWSRF Project Number AR3-037

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Vermont/EPA Revolving Loan Fund Program, Town of Windsor Water System WSID #5341 has requested its proposed water improvement project be evaluated for eligibility for a Categorical Exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed upgrade includes replacing existing 4", 6" and 8" water lines along Route 5, Birch Heights and Weston Heights. The project also includes installing a tank mixing system inside the North Tank.

Our consideration of the Town of Windsor request included reviewing the Environmental Information Document, dated April 2009, which was completed and submitted by Dufresne Group. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection at the Department of Environmental Conservation, Water Supply Division, Old Pantry Building, at 103 South Main Street, Waterbury, Vermont. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Supply Division's website.
