Notice of Determination of Eligibility for Categorical Exclusion

Websterville FD#3 Department, WSID #5247
Barre Town, VT
Water System Improvements
DWSRF Loan RF3-337

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Websterville FD#3 Water System, located in the Town of Barre Town, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the replacement of approximately 10,000 linear feet of waterline throughout the 'main service' area of Websterville FD#3. Additionally, work will include a new back-up generator for the 'high service' pressure zone pump station and back flow prevention between the 'main service' and 'high service' areas.

Our consideration of Websterville FD#3 Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Weston & Sampson Engineers. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Drinking Water and Groundwater Protection Division's [Environmental Review Determination Notice](#) page.
