Notice of Determination of Eligibility for Categorical Exclusion

Woodstock Aqueduct, WSID #5343
Woodstock, VT
Water System Improvements
DWSRF Loan RF3-346

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Woodstock Aqueduct Water System, located in the Town of Woodstock, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the installation 5,700 linear feet of 8" water main on Charlton Hill and College Hill Rd in Woodstock. The improvements will connect two dead end sections of distribution main to increase pressure and flows in the highest section of the distribution system.

Our consideration of the Woodstock Aqueduct Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Otter Creek Engineering. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Facility Engineering Division's Environmental Review Determination Notice page within five business days of notice.
