Notice of Determination of Eligibility for Categorical Exclusion

Champlain Water District Water System, WSID #5092
South Burlington, VT
Filtered Water Tank and Expanded Wet Well
DWSRF Loan RF3-344

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Champlain Water District Water System, located in the City of South Burlington, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of construction of a new one million-gallon baffled filtered water storage (chlorine contact) tank and expanded filtered water wet well.

Our consideration of the Champlain Water District's request included reviewing environmental information and documentation completed and submitted by the applicant. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Facility Engineering Division's [Environmental Review Determination Notice](#) page within five business days of notice.
