Notice of Determination of Eligibility for Categorical Exclusion

Wilmington Water District, WSID #5310
Wilmington, VT
Water System Improvements—New Spring Sources
DWSRF Loan RF3-316

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Wilmington Water District Water System, located in the Town of Wilmington, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of construction of approximately nine new spring sources in the area of the existing spring sources on Haystack Mountain.

Our consideration of the Wilmington Water District Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, SVE Associates. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Facility Engineering Division's [Environmental Review Determination Notice](#) page within five business days of notice.
