Notice of Determination of Eligibility for Categorical Exclusion

Pinnacle Condominium, WSID #5540
Killington, VT
Water System Improvements
DWSRF Loan RF3-352

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Pinnacle Condominium Water System, located in the Town of Killington, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the replacement of the water system building for the Association which serves six residential buildings with 150 residential units. All internal components including the existing concrete slab, controls, booster pumps, hydropneumatic tanks and approximately 10 feet of distribution piping outside the building will be replaced.

Our consideration of the Pinnacle Condominium's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Enman Kesselring Engineers, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
