Notice of Determination of Eligibility for Categorical Exclusion

Otter Creek Mobile Home Park Water System, WSID #20613
Vergennes, VT
Water System Improvements
DWSRF Loan RF3-354

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Otter Creek Mobile Home Park Water System, owned by the Addison Country Community Trust, located in the City of Vergennes, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the replacement of the existing master meter vault, master meter and appurtenances, and a portion of distribution system piping. The project also includes boring under the Panton Rd to replace the water service connection with the new master meter vault to the Vergennes-Panton Water District's water main. Additionally, water flushing hydrants will be added to each end of the distribution legs.

Our consideration of the Addison County Community Trust's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Engineering Ventures, PC. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
