Notice of Determination of Eligibility for Categorical Exclusion

Troy Town Water System, WSID #5206
Troy, VT
Water System Improvements
DWSRF Loan WPL-294

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Troy Town Water System, located in the Town of Troy, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project will replace approximately 1,400 linear feet of 6" ductile iron waterline with 8" PVC C900 waterline beginning at the intersection of VT-100 and VT-101 and continuing along VT-100 to Autumn Ridge. The new waterline will provide both domestic and fire flow. At least two (2) hydrants will be installed along with new services up to the Right-of-Way for approximately 22 existing customers on this new waterline.

Our consideration of the Town of Troy's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Aldrich + Elliott, PC. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
