Notice of Determination of Eligibility for Categorical Exclusion

Winooski Water System, WSID #5102
Winooski, VT
Water System Improvements
DWSRF Loan RF3-374

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Winooski Water System, located in the City of Winooski VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the replacement of approximately 2,750 linear feet of 6" cast iron waterline with new 8" waterline extending from the intersection of Hickok Street and Pine Street to the end of Hickok Street past West Lane and continuing along West Lane to the intersection of West Lane and Malletts Bay Avenue. The new waterline will provide both domestic demand and fire flow.

Our consideration of the City of Winooski's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Aldrich + Elliott, PC. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
