Notice of Determination of Eligibility for Categorical Exclusion

Lyndonville Water System, WSID #5040  
Lyndonville, VT  
Water System Improvements  
DWSRF Loan WPL-295

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Lyndonville Water System, located in Lyndonville, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project will replace the existing Vail Hill transmission main with approximately 7,400 linear feet of 8" waterline running along Heath Road, Speedwell Drive, Mountain View Ave, and College Road to Lyndon Institute.

The new waterline will provide both domestic and fire flow. New valves, hydrants, and services up to the Right-of-Way will be included with the waterline construction.

Our consideration of Lyndonville's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Aldrich + Elliott, PC. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
