Notice of Determination of Eligibility for Categorical Exclusion

Country Club Condominium Water System, WSID #5640
Bolton, VT
Water System Improvements
DWSRF Loan RF3-378

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Country Club Condominium Water System, located in Bolton, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists the demolition of the existing water system control building and the construction of a new control building. The new building will house the new iron/manganese (physical filtration) and radium removal (ion exchange) treatment systems. The project includes all new pumps, plumbing, controls, telemetry, meters, analyzers, chemical feed pumps (orthophosphate, sodium hypochlorite, sodium bisulfate), generator and transfer switch for backup power capabilities.

Our consideration of Country Club Condominium Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Green Mountain Engineering. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
