Notice of Determination of Eligibility for Categorical Exclusion

Thompson's Point Association, WSID #8274
Charlotte, VT
Water System Improvements
DWSRF Loan RF3-383-3.0

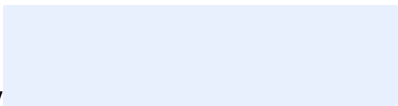

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Thompson's Point Association, located in Charlotte, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The proposed project involves the construction of a 12 ft by 24 ft wood frame structure to house filtration and pumping equipment for the Thompson's Point Association's water system, installation of two 5,000-gallon water storage tanks and associated site work. The project is necessitated by deficiencies identified in the existing facilities.

Our consideration of Thompson's Point Association's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Peter DeGraff of Otter Creek Engineering, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
