Notice of Determination of Eligibility for Categorical Exclusion

Bellows Falls Water Department, WSID #5298
Rockingham, VT
Water System Improvements
DWSRF Loan RF3-367-3.0

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Bellows Falls Water Department, located in Rockingham, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

This project consists of the replacement of:

- 400 linear feet of water main on George Street
- 1,410 linear feet of water main on Pine Street
- 50 linear feet of water main on Williams Terrace

Our consideration of Bellows Falls Water Department's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Dufresne Group. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
