Notice of Determination of Eligibility for Categorical Exclusion

Bull Run Water System, WSID #5609
Ludlow, VT
Water System Improvements
DWSRF Loan RF3-418 and RF3-431

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Bull Run Water System, located in Ludlow, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

Project will replace existing 40,000 gallon water storage tank with a 100,000 gallon tank and construction of a new treatment building and upgrades to all mechanical and electrical systems.

Our consideration of Bull Run Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Otter Creek Engineering. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
