

This amendment proposes to reallocate remaining unutilized loan forgiveness offered in the FFY21 IUP to incentivize planning of certain projects. All loan forgiveness is offered only for municipally-sponsored projects and is offered on a first come, first-served basis. The following project types are eligible for 100% forgiveness, up to \$100,000 per project. There is no per borrower limit. It is anticipated that these funds will be made available after the close of the public comment period, approximately early May 2021 and will be proposed to be continued through the SFY22 IUP subject to public comment.

The three project types include:

- Combined Sewer Overflow (CSO) Abatement/Elimination
- Village Wastewater; and
- Private Entity 3 Acre (General Permit 3-9050) Stormwater Retrofits: This includes planning, design, engineering feasibility assessments, and permit obtainment. Eligible recipients for this funding are included in the list of 3 Acre Properties.
https://dec.vermont.gov/sites/dec/files/wsm/stormwater/docs/9050/3acreList_09252020.pdf

The FFY20 IUP has approximately \$2.6M available for these planning efforts and will be divided as follows:

CSO	550,000
Village Wastewater	550,000
3 Acre Funding	1,500,000
Total	2,600,000

All other requirements listed in [this IUP](#) continue to apply, unchanged. In particular, page 15 regarding the requirements for securing additional subsidy.
