Notice of Determination of Eligibility for Categorical Exclusion

Town of Manchester, WSID #5022
Manchester, VT
Water System Improvements
DWSRF Loan RF3-440

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Town of Manchester, located in Manchester, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

Replace approximately 3,300 LF of 2-inch galvanized and 4/6-inch cast iron water main with new 8-inch water main, including hydrants, valves and water service reconnections on a section of Barnumville Road.

Our consideration of the Town of Manchester's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Dufresne Group. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
