Notice of Determination of Eligibility for Categorical Exclusion

Jeffersonville Water System, WSID #5150
Cambridge, VT
Water System Improvements
DWSRF Loan RF3-399-3.0

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Jeffersonville Water System, located in Cambridge, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project is the construction of new 12" diameter water main from the Jeff Heights Tank to Upper Pleasant Valley Road to improve system hydraulics during high demands, the rehabilitation of the Jeff Heights Tank with a new liner, hatch and vent, and a large diameter pipe at the Treatment Building to provide necessary chlorine contact time.

Our consideration of Jeffersonville Water System's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Dufresne Group. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
