Notice of Determination of Eligibility for Categorical Exclusion

City of St. Albans Water Department, WSID #5130
City of St. Albans, VT
Water System Improvements
DWSRF Loan RF3-411

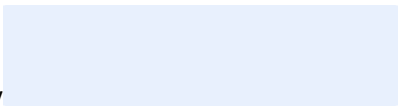

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the St. Albans Water Department, located in the City of St. Albans, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

Construction of new water tank at Alternative No. 1 location adjacent to existing tank near intersection of Congress St. and Hillfarm Estates. Refurbishment of existing water tank. Construction of new booster pump station and building and installation of approximately 950lf of waterline along Congress St. and Eastview Dr.

Our consideration of the City of St. Albans' request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Aldrich & Elliott. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4904. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Water Infrastructure Financing Program's [Environmental Review Determination Notice](#) page.
