We live on Beebe Pond in Hubbardton and are writing to express our concern with the milfoil issue on our pond. Over the past few years the Porcella Core treatments used on the pond were very successful. Prior to those treatments the water in front of our home on Route 30 was completely choked with milfoil. You couldn't paddleboard or kayak through it as it was too thick. It also prevented fishing in that area. A few years back we did try the DASH weed pulling with a contractor. It cost \$1,500 for a small area in front of the house but unfortunately the weeds were growing back within a month. It was a big expense for little result. There was not treatment or weed remediation this past summer and we are seeing

the milfoil take root again. When we had the Procella Cor treatments I did not notice any adverse effects and the fishing was much better. I fully support this treatment and hope your committee can help that continue.

Sincerely,

A large black rectangular redaction box covering the signature and name of the sender.
