I have emailed other addresses and never received confirmation anyone got this. I'm sending this to let you know that i as a homeowner on a Vermont lake feel the process for applying is thorough enough. What you all are trying to do is figure out how to make is so one lake doesn't have to even be considered for a procelector application. Show us any proof from any lake that has been done, proof, not hear say or feelings proof of any adverse affects. milfoil is a huge problem on our lakes, there is no other effective way to get rid of it. Before you all make it impossible to apply and get it done make sure you have alternative's to what can be done, how and who will pay, Actually the state should help more as they continue to say they

are state lakes and they have allowed the permitting and application. Once again the entire state that has already gone thru the thorough application process will be effective do to one lake. THis has to be considered.

I have attempted to be on the meeting but must work. have raised my hand and emailed people with no one responding. Before this committee decides the fate of an already next to impossible application i hope they have a plan.
