Dear Minott:

Based on your letter of August 9, 1984, it is my understanding that you have withdrawn your appeal from the issuance of Stream Alteration permit SA-2-'0109. Accordingly, the permit originally issued by the Agency of Environmental Conservation remains in full force and effect.

Please let me know if there are any further questions.

Sincerely,

William A. Bartlett
Executive Officer

Attention Bill Bartlett, Executive Officer

Dear Mr. Bartlett:

This letter is to advise you that, subsequent to my appeal of Robert Gorman's stream alteration permit, I have met with the permittee at the site and have resolved to my satisfaction permit concerns that were the basis for my appeal.

I therefore wish to withdraw my appeal at this time.

Mr. Gorman has agreed specifically to (1) anchor the bridge securely to the east shore with 3/4" steel cable to preclude flotation downstream, (2) to anchor the westerly bridge approach ramp securely to the west shore and (3) either remove or secure construction materials presently in the floodway.

For the protection of downstream riparian owners as well as the applicant, may I suggest that future bridge permit reviews take into consideration flood flows. In this case the approach ramp and all construction materials would have left the site during a hurricane fringe storm as we often have in the fall. Furthermore applicants should be made aware that they may be in a flood hazard area.

Very truly yours,

Addison D. Mnott
