Recharge Potential of Surficial Materials Richmond 7.5-Minute Quadrangle, Vermont

Stephen F. Wright
Department of Geology
University of Vermont
2019

Explanation to Map Units

Low Recharge Potential: Surficial Materials with Low Permeability

- af Artificial Fill: Commonly covered with pavement
- Plf Lacustrine Deposits, Fine-grained
- Pt Glacial Till

High Recharge Potential: Surficial Materials with High Porosity and Permeability

- Hal Alluvium
- Hw Wetlands
- Haf Alluvial Fan
- Hat Alluvial Terrace Deposits

- Paf Alluvial Fan
- Pldv Delta-LVermont Coveville
- Pldm2 Mansfield 2 Delta
- Pldm1 Mansfield 1 Delta
- Pdhl High Level Delta
- Pic Ice-Contact Deposits, Undifferentiated
