Hey Ash,

I am in NC today and all next week. I'll give you call the week of the 26th to discuss the site below.

Tom

Hi Tom-

I can't remember if we discussed this one yet. It appears that there is limited risk posed by any residual contamination at the above site. As a precaution, I was thinking that it would be appropriate to sample the nearby community well before we remove the site from the Active Sites List. We may be able to tie this together with required compliance monitoring. Let me know what your thoughts are on this.

Thanks,
Ash
