Executive Summary

Vanasse Hangen Brustlin, Inc. (VHB) was retained by The City of Burlington (the Client) to conduct a Phase I Environmental Site Assessment (Phase I ESA) of two parcels located at 195 and 201 Flynn Avenue, Burlington, Vermont, hereinafter referred to as the "Site" or "subject property." The Site consists of two adjacent parcels: 195 Flynn Ave ("Lot 1", southern lot) and 201 Flynn Ave ("Lot 2", northern lot). Lot 1 is a 2.87-acre parcel that is currently vacant, with evidence of former parking and/or industrial storage areas, as well as an existing stormwater retention pond on the northern portion of the parcel. Lot 2 is a 0.91-acre miscellaneous use plot of land that contains an approximately 7,500 square foot multi-purpose building currently hosting a woodworking shop, art studio, music studio, and various outdoor equipment storage. It is VHB's understanding from the Client that the purpose of this Phase I ESA is to provide environmental due diligence in support of a potential property transaction and redevelopment of the Site as a potential waste transfer station (Lot 1) and City maintenance storage yard (Lot 2). The Client intends to purchase the Site and lease Lot 1 to Chittenden Solid Waste District (CSWD).

This Phase I ESA has been completed using the American Society of Testing and Materials (ASTM) E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the Standard) and the All Appropriate Inquiries (AAI) Final Rule at 40 CFR Part 312 as guidance.

The objective of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) in connection with the Site. RECs are defined in the Standard as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

The Client is the sole User of this Phase I ESA. Pursuant to Section 3.2.94.1 of the Standard, "the User has specific obligations for completing a successful application of this practice as outlined in Section 6" of the Standard.

The Phase I ESA should be read in its entirety to gain a comprehensive understanding of the findings presented in this Executive Summary.

Recognized Environmental Conditions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for 195 and 201 Flynn Avenue, Burlington VT, the Site. Any exceptions to, or deletions from, this practice are described in Section 8.1 of this report. This assessment has revealed evidence of eight RECs in connection with the Site:

REC #1 – Former Automotive Repair Shop On-site

According to the EDR Database Report, between 1987 and 1998, an auto and home supply store, carwash, and general automotive repair shop operated on the Site, in the existing building on Lot 2. An interview with a tenant of the building revealed that spray-painting of cars occurred within the building on a raised concrete platform. Circular patches in the concrete floor of the building were observed during Site reconnaissance that may be patches over former floor drains. The historical use of the existing building on the Site as an automotive repair shop, and the potential presence of floor drains within that building represents a REC.

REC #2 – Oil Staining on Ground Surface

A small, approximately 3-feet by 3-feet, area of intermittently stained soil was observed in the grassed area north of the existing building on Lot 2. VHB observed a petroleum like odor to the soil during Site reconnaissance. The nature and extent of potential contaminant impacts associate with this staining on a pervious surface could not be determined, and therefore represent a REC.

REC #3 – Historical Oil and Gasoline Storage On-Site

Sanborn maps from 1942 identify on-Site storage of bulk oil and gasoline by Cities Service Company. No further documentation regarding this bulk oil and gasoline storage was found, including but not limited to potential storage tank removal reports or confirmatory soil samples. The former use of the Site for bulk oil and gasoline storage, without record of removal, represents a REC.

REC #4 – Vermont Railroad

A section of abandoned railroad extends into the Site from the active railroad corridor to the east, ending near the location of the former oil storage area. The presence of railroad tracks on the Site represents a REC due to the possibility of releases of hazardous materials from locomotive cars, and metals, pesticides/herbicides, and other wood preservation chemicals that are typically used along rail corridors.

REC #5 – 199 and 205 Flynn Avenue, Exxon Oil Terminal Hazardous Site, SMS #87-0002

The parcels located at 199 and 205 Flynn Avenue were formerly one property (listed under 199 Flynn Avenue) and formerly associated with a bulk oil storage and distribution terminal that spanned across multiple parcels on Flynn Ave between 1940 and 1981. The bulk oil storage and distribution terminal was operated by various companies, including Colonial Beacon Oil Company, Esso Standard Oil Company, and Exxon Oil Company. 199 Flynn Avenue is currently listed as a Hazardous Site by the Department of Environmental Conservation ("DEC"). Based on environmental investigation reporting available for the Exxon Oil Terminal Hazardous Site, petroleum related volatile organic compound ("VOC") impacts to soil

and groundwater have been documented at both the 199 and 205 Flynn Avenue parcels. Several detections of VOCs have been recently reported in groundwater an 205 Flynn Ave, directly north of Lot 2 of the Site, including benzene at concentrations as high 2,120 ug/L, which exceeds the Vermont Groundwater Enforcement Standard of 5 ug/L. Given the proximity of these known impacts to groundwater to the Site, it may be possible that concentrations of VOC compounds in groundwater are above applicable criteria in the northern portion of the Site, and therefore represent a REC.

REC #6 – Former Underground Storage Tanks Associated with Exxon Terminal Facility SMS #87-0002

The Vermont UST database reports that two underground storage tanks associated with the former Exxon Terminal Facility (199 and 205 Flynn Avenue) were removed from the ground at that facility in 1998. As no information was provided in the UST database regarding the exact location or condition of the tanks at removal or any information pertaining to confirmation sampling, the absence of information represents a significant data gap, and represents a REC. As records of tank conditions during removal were not found, it is possible the tanks could have been in poor condition and could have caused a release to soil and groundwater at 199 and/or 205 Flynn Avenue, which is presumed to be hydrologically cross-gradient, or potentially up-gradient of the Site. Based on available reporting for the Exxon Oil Terminal Hazardous Site (#87-0002), it is possible that these USTs are associated with known petroleum releases at 199 and 205 Flynn Avenue; however, VHB was not able to determine whether the above referenced USTs were or were not related to those releases.

REC #7 – 75 Briggs Street Hazardous Site, SMS #2017-4731

The parcel located at 75 Briggs Street is currently listed as a Hazardous Site by the DEC. Previous environmental investigations associated with the Hazardous Site identified elevated levels of lead, polycyclic aromatic hydrocarbons ("PAHs"), VOCs, and chlorinated volatile organic compounds ("CVOCs") in soil, soil gas, and groundwater related to the industrial history of the property that included combustion sources, leaking petroleum storage tanks, and foundry and machine shop operations that included the use of cleaning solvents. Based on the proximity of this property to the Site, the known impacts to soil, soil vapor, and groundwater, and the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 75 Briggs Street may exist at the Site, and thus represents a REC.

REC #8 – 207 Flynn Avenue, Vermont Structural Steel Hazardous Site, SMS #2016-4619

The parcel located at 207 Flynn Avenue is currently listed as a Hazardous Site by the DEC. According to various prior environmental investigations completed at 207 Flynn Avenue, historical industrial operations on the property, included a foundry, metal machining, vehicle storage and maintenance, fuel storage, and blast cleaning. These environmental investigations determined that soil at 207 Flynn Avenue was impacted with PAHs, arsenic, lead and to a lesser degree VOCs and CVOCs. Soil vapor and groundwater were also determined to be impacted with VOCs and CVOCs. Based on the proximity of this property to the Site, the known impacts to soil, soil vapor, and groundwater, and the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 207 Flynn Avenue may exist at the Site, and thus represents a REC.

Vapor Encroachment Conditions (VECs)

As part of this Phase I ESA, VHB conducted an Evaluation of Potential Vapor Encroachment (EPVE) in order to determine whether or not a Vapor Encroachment Condition (VEC) exists at the Site. A VEC is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the subsurface of the Site caused by the off gassing of vapors from contaminated soil or groundwater either on or near the Site. VHB has identified that a VEC exists for the Site. This EPVE consisted of the review of information presented in previous or subsequent sections of this document such as:

- The Site's physical setting and features that may impact vapor migration
- Documented storage and releases of volatile COCs at the Site and/or nearby properties
- Potential preferential pathways for vapor migration such as subsurface utility corridors

VHB has concluded that:

> Based on the historic land use at the Site and surrounding areas including oil and gasoline storage, it is possible that volatile COCs have been released in the vicinity of the Site and that the vadose zone at the Site is impacted by volatile COCs.

Therefore, VHB has concluded that a VEC exists at the Site in connection with REC #7 as detailed in Section 7.1.7.

De Minimis Conditions

De minimis conditions represent conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action by the appropriate regulatory agency. VHB did not identify *de minimis* conditions on the Site.

Business Environmental Risks

The following business environmental risks represent potential risks which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of the Site, but do not constitute RECs or *de minimis* conditions as defined in the Standard. However, the Environmental Professional views these as potential risks that should be considered when making decisions regarding the Site.

Potentially Hazardous Building Materials

The potential presence of asbestos-containing building materials, lead-based paint, and/or PCB-containing building materials is beyond the scope of ASTM 1527-13. However, given the age and construction of the former buildings at the Site there is a possibility that these materials may be present.

Urban Fill

The Site is located in a densely developed urban area with a combination of former industrial and commercial uses at and adjacent to the Site. As a result, it is possible that the Site may have been impacted via the aerial deposition of air-borne contaminants associated with prior and current industrial uses in the area. Additionally, structures and facilities at the Site, including but not limited to small buildings and rail spurs, have been constructed and demolished over the years. Thus, it is possible that fill of unknown origin and quality may have been imported to the Site to achieve the current grade. Considering no evidence of the use of impacted fill was identified during this Phase I ESA, the potential

presence of urban fill alone, does not represent a REC. However, should future development involve the exportation of soil from the Site and soil is sampled and analyzed for typical industrial contaminants, the possibility exists that those results could indicate the presence of impacted soil that may require special consideration for disposal.

Data Gaps

VHB identified six data gaps at the Site during the course of this Phase I ESA. The Environmental Professional's assessment as to whether these data gaps are considered significant is outlined below.

Data Gap	Assessment
No information regarding tank condition during UST removal at 199 Flynn Avenue	Tank condition was not available in documents pertaining to the removal of two USTs at the former Exxon Terminal facility. The absence of this information represents a significant data gap.
Due to rugs covering significant portions of floors in the building, not all the original concrete floor was visible.	VHB believes that observations of visible floor space was likely representative of covered portions of flooring and thus the data gap is not significant.
Dense vegetation along southern wall of building.	Some dense vegetation impeded views to the ground surface along the southern wall of the building. VHB believes that no significant feature was missed due to dense vegetation.
Dense vegetation on southern portion of Lot 1.	Dense vegetation was present on the southern portion of Lot 1 that limited accessibility and visual inspection. However, VHB believes that the visible extent of the vegetated area was representative of the southern portion of Lot 1 and therefore the dense vegetation is not a significant data gap.

1

Introduction

1.1 Purpose and Scope of Work

Vanasse Hangen Brustlin, Inc. (VHB) was retained by The City of Burlington (the Client) to conduct a Phase I Environmental Site Assessment (Phase I ESA) of two parcels located at 195-201 Flynn Avenue, Burlington, Vermont, hereinafter referred to as the "Site" or "subject property" as shown on **Figure 1**. The Site consists of two parcels: 195 Flynn Ave (Lot 1) and 201 Flynn Ave (Lot 2). It is VHB's understanding from the Client that the purpose of this Phase I ESA is to provide environmental due diligence in support of a potential property transaction and redevelopment of the Site as a potential waste transfer station (Lot 1) and City maintenance storage yard (Lot 2). The Client intends to purchase the Site and lease Lot 1 to Chittenden Solid Waste District (CSWD).

This Phase I ESA has been completed using the American Society of Testing and Materials (ASTM) E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the Standard) and the All Appropriate Inquiries (AAI) Final Rule at 40 CFR Part 312 as guidance.

The City of Burlington is the User of this report as defined by the Standard. Pursuant to Section 3.2.94.1 of the Standard, "the User has specific obligations for completing a successful application of this practice as outlined in Section 6" of the Standard. This Phase I ESA is subject to the terms of the Agreement between VHB and the Client dated 4/24/23 (the Agreement). Other than those limitations expressly provided in **Appendix A** and/or specified in Section 8, completion of the Phase I ESA was not subject to additional assumptions, limitations, or exceptions to the Standard.

The objective of this Phase I ESA is to identify, to the extent feasible pursuant to the process described in the Standard, Recognized Environmental Conditions (RECs) in connection with the Site. The Phase I ESA was completed following the Standard as guidance. RECs are defined in the Standard as "(1) *the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.*

A Controlled REC is a REC "affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

Although not considered RECs, the Phase I ESA may identify other concerns or considerations, referred to as Historical RECs, *de minimis* conditions, and/or business environmental risks as defined below.

Historical RECs are *"a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example, activity and use limitations or other property use limitations)."*

A *de minimis* condition is *"a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies."*

A business environmental risk is *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in [the Phase I ESA] practice."*

Per the agreement between VHB and the Client, the scope of services to complete this Phase I ESA consisted of the following main components:

- an inquiry by an "Environmental Professional" as defined by the Standard;
- interviews with past and present owners, operators, and occupants, or abutters if the *subject property* is abandoned, in an effort to gather any specialized knowledge or experience with regard to the *subject property*;
- a review of historical sources, including, but not limited to, chain of title documents, aerial photographs, building department records, and land use records to determine previous uses and occupancy since first development;
- searches for recorded environmental cleanup liens against the facility/*subject property* that are filed under federal, state or local law;
- a review of federal, state, or local government records; and
- a visual inspection of the *subject property* and surrounding properties.

The scope of the Phase I ESA did not include any environmental testing or sampling of soil, water, air, or soil vapor.

1.2 User Reliance

This Phase I ESA was completed solely for the Client and the Users, subject to the terms, conditions and limitations referenced herein and as issued in connection with the Agreement and the provisions thereof. Any use or reliance upon information provided in this report without the specific written authorization of the Client and VHB shall be at such party's sole risk.

2

Site Description

2.1 Site Location, Ownership, and Description

The approximate center of the Site is located at 44˚27'15' north latitude and 73˚13'10' west longitude.

The Site consists of two adjacent parcels: 195 Flynn Ave (Lot 1, southern lot) and 201 Flynn Ave (Lot 2, northern lot). Lot 1 is a 2.87-acre parcel that is currently vacant, with evidence of former parking and/ or industrial storage areas, as well as an existing stormwater retention pond, on the northern portion of the parcel. Lot 2 is a 0.91-acre miscellaneous use plot of land that contains an approximately 7,500 square foot multi-purpose building currently hosting a woodworking shop, art studio, music studio, and various outdoor equipment storage.

A Site Location and Local Area Map showing the location of the Site is provided as **Figure 1**, a Site Plan depicting the Site and relevant Site features is included as **Figure 2**, and a Site Vicinity Map showing the vicinity of the Site and nearby sensitive receptors is provided as **Figure 3.**

2.2 Site and Vicinity General Characteristics

The Site is located in an urban and formerly industrial area in Burlington, Vermont and is accessed via Flynn Avenue. The topography of the Site is generally flat. The closest named surface water body is Lake Champlain located approximately 1/3 of a mile to the west of the Site. Additional information on the physical setting of the Site and nearby area is presented in Section 4.1.

2.3 Description of Structures, Roads, and Other Site Improvements

Lot 1 is a vacant, mostly wooded parcel with a small, cleared area in the center of the parcel, and a stormwater retention pond on the northern end of the parcel. Lot 2 has a parking area, outdoor equipment storage, and a section of inactive railroad entering the Site boundary from the east. There is one building located in the southern portion of Lot 2 that currently hosts a woodworking shop, art studio, and music studio. The building is heated by a natural gas fired furnace and electricity and served by municipal water and wastewater services.

2.4 Current Uses of Adjoining and Surrounding Properties

The table below presents the properties and features surrounding the Site:

Direction	Adjoining	Surrounding
North	› Metalworks (metal fabricator, 205 Flynn Ave)	› Commercial and Industrial Properties
East	› Railroad corridor followed by City Market (grocery store, 207 Flynn Ave)	› Commercial and Industrial Properties
South	› Multi-tenant commercial building that includes various tenants (7 Ambrose Place) and Barrett Trucking (10 Ambrose Place)	› Commercial and Industrial Properties
West	› Flynn Avenue Self Storage (199 Flynn Ave)	› Commercial Properties

3

User Provided Information

To qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the User(s) and/or Grantee(s) or a party on behalf of the User(s) and/or Grantee(s) must collect the following information, if applicable, and should make the information available to the Environmental Professional upon request:

- Environmental cleanup liens that are filed or recorded against the *subject property*;
- Activity and land use limitations that are in place on the *subject property* or that have been filed or recorded in a registry;
- Specialized knowledge or experience of the person seeking to qualify for the Limited Liability Protections;
- Relationship of the purchase price to the fair market value of the *subject property* if it were not contaminated;
- Commonly known or reasonably ascertainable information about the *subject property*;
- The degree of obviousness of the presence or likely presence of contamination at the *subject property* and the ability to detect the contamination by appropriate investigation.

VHB provided the User Questionnaire to Laura Wheelock of the City of Burlington, which specifically requests information related to each of the six items listed above. As of the date of the report VHB has not received the completed user questionnaire.

4

Records Review

VHB conducted a review of environmental databases and municipal files to identify potential environmental concerns at the Site. This review also included documents related to properties in the vicinity that have had a release or pose a threat of release of petroleum and/or hazardous substances that may potentially impact the quality of environmental media at the Site. VHB reviewed Federal and State environmental databases supplied by Environmental Data Resources, Inc. ("EDR"). VHB also conducted a targeted review of files available from the Vermont Department of Environmental Conservation ("DEC"). The results of the records review are summarized below.

4.1 Physical Setting

VHB reviewed several sources of information pertaining to the Site's physical setting to better understand natural characteristics of the Site and surrounding area as summarized below.

4.1.1 Topography

Topography of the Site and surrounding area generally slopes downward to the west with an elevation ranging between approximately 130 feet and 140 feet above mean sea level.

4.1.2 Soils/Surficial Geology

According to the Vermont Agency of Natural Resources (ANR) website, the soils at the Site are mapped by the Natural Resources Conservation Service as Munson and Raynham, which consists of silty loam. This soil type is classified as somewhat poorly drained to poorly drained.

4.1.3 Bedrock Geology

According to the Bedrock Geologic Map of Vermont, the bedrock at the Site is mapped as the Monkton Quartzite, which consists primarily of sandstone, dolostone, and dolomitic quartz.

4.1.4 Groundwater

Groundwater flow is best determined using site-specific groundwater elevation data and may be affected by surface topography, hydrology, and characteristics of the soil and nearby wells. No site-specific groundwater flow data was provided for the Site. In the absence of site-specific data, other sources of information are typically used to determine flow direction including surface topographic information and hydrogeologic information collected from nearby properties. Based on a review of available information, regional groundwater flow is presumed to be generally to the west and depth to groundwater at adjacent parcels is reported to range from 2-feet to 8-feet below ground surface.

According to the EDR report, one public drinking water well is located in the vicinity of the Site. According to the ANR Natural Resources Atlas Site Vicinity Map, dated June 2. 2023, provided as **Figure 3**, the Site is not located within a groundwater Source Protection Area and is located in a surface water Source Protection Area.

4.1.5 Wetlands

No wetlands are mapped on the Site on the Vermont Significant Wetland Inventory layer of ANR Natural Resources Atlas. However, Wetland Project #2008-088 is mapped on the Site and according to the ANR Wetlands Inventory Map (Vermont ANR - Wetlands Inventory Map (WIM)), Class III wetlands were previously surveyed on the Site. VHB did not complete a formal wetlands survey at the Site.

4.1.6 Surface Water

The closest named surface water body is Lake Champlain located approximately 1700 feet to the west of the Site. A stormwater surface detention pond is present on the northern end of Lot 1 and mapped on City of Burlington stormwater collection system mapping. A buried 36-inch diameter stormwater conveyance pipe is also mapped to run east to west across Lot 1 of the Site. This stormwater piping and associated structures were not observed during the Site reconnaissance.

4.1.7 Flood Plains

According to the Flood Insurance Rate Map (FIRM) for Burlington, Vermont dated July 18, 2011 (Map Number 50007C0253D), the Site is located within Zone X, defined as an area of minimal flood hazard. The National Flood Hazard Layer FIRMette is included as **Figure 4.**

4.2 Prior Environmental Investigations

VHB's review of publicly available records did not identify reports of prior environmental investigation at the Site. Additionally, during this Phase I ESA, VHB requested any potential documents or records related to prior environmental investigations from the DEC. The DEC did not provided reports pertaining to prior environmental investigations at the Site.

4.3 Standard Environmental Record Sources

EDR provided a report dated May 5, 2023, summarizing available and reasonably ascertainable information from standard environmental record sources at the minimum distances required in Section 8.2.2 of the Standard. A copy of the EDR report is provided as **Appendix C**.

Sites with minimal address information that may be located in proximity to the Site are listed separately in the database report as "Orphan sites." A review of listed Orphan sites was conducted to estimate their location, distance, and direction from the Site. Based on information contained in the EDR report and information derived from local maps, no orphan sites were identified on the Site or abutting properties.

A summary of the EDR findings is included in the table below and following sections.

Record Source	Search Radii	Subject Property Listed	Number Sites Within Search Distance
Federal National Priorities List (NPL) Sites	1.0 mile	No	1
Federal Delisted NPL Sites	0.5 miles	No	0
Superfund Enterprise Management System (SEMS) Sites	0.5 miles	No	2
Federal SEMS No Further Action Planned Sites	0.5 miles	No	1
Federal Resource Conservation and Recovery Act (RCRA) Corrective Action (CORRACTS) Sites	1.0 mile	No	1
Federal RCRA Non-CORRACTS Treatment, Storage and Disposal Sites	0.5 miles	No	2
Federal RCRA Generators	Subject Property & Abutting	No	3
Federal Engineering/Institutional Control Sites	Subject Property	No	0
Federal Emergency Release Notification System	Subject Property	No	0
State and Tribal Equivalent SEMS Sites (i.e. State Hazardous Waste Sites, Release Sites)*	1.0 mile	No	37
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 miles	No	0
State and Tribal Leaking Storage Tank Sites*	*1.0 miles	No	55
State and Tribal Registered Storage Tank Sites	Subject Property & Abutting	Yes	15
State and Tribal Engineering/Institutional Control Sites (i.e. Activity and Use Limitations)*	*1.0 Miles	No	0
State and Tribal Voluntary Cleanup Sites	0.5 miles	No	0
State and Tribal Brownfield Sites	0.5 miles	No	6

* For Vermont, standard search distances are extended to that of state hazardous waste sites because sites are broken out into these categories from a single database.

The EDR report provides search results of other federal, state, and local databases which are not listed as *Standard Environmental Resources* in the Standard. These databases include, but are not limited to, Brownfields, Facility Indexing System (FINDS); Polychlorinated Biphenyl (PCB) Activity Database (PADS); Toxic Chemical Release Inventory System (TRIS); Toxic Substances Control Act (TSCA); Federal Insecticide, Fungicide & Rodenticide Act (FIFRA) and TSCA Tracking System; Section Seven Tracking System; Tier 2 data listing; dry cleaners; and manufactured gas plants. Tribal Records were also searched for this report. The Site was listed in one additional database, the EDR Historic Auto Database. The full EDR report is included in **Appendix C**.

4.3.1 Summary of Site Records

According to the EDR report the Site was listed in the standard environmental record sources.

EDR Historic Auto Database

According to the EDR Database Report, between 1987 and 1998, Lot 2 of the Site operated as an auto and home supply store, carwash, and general automotive repair shop. The historical use of the Site as an automotive repair shop represents a REC as discussed in Section 7.1.2.

4.3.2 Summary of Nearby Environmental Listings of Interest

Based on information from the EDR report, certain nearby environmental listings were deemed to require additional review to evaluate their potential to impact environmental conditions at the Site. Available records were reviewed electronically via the DEC and/or other State and federal databases. Information obtained during the additional reviews is summarized below.

199 and 205 Flynn Avenue / Former Exxon Terminal – SMS #87-0002

The parcels located at 199 and 205 Flynn Avenue are located directly north and west of the Site and are currently occupied by Metalworks Inc, a metal fabrication shop, and self-storage facilities, respectively. The parcels were formerly one property (listed under 199 Flynn Avenue) and formerly used as part of an oil storage terminal that spanned across multiple parcels on Flynn Ave between 1940 and 1981. 199 Flynn Avenue is currently listed as a Hazardous Site by the DEC, and according to the EDR Database Report, is also listed as a Brownfield and Facility Index System (FINDS) site.

Based on environmental investigation reporting available for the Hazardous Site, petroleum related volatile organic compound ("VOC") impacts to soil and groundwater are documented on 199 and 205 Flynn Avenue. Remedial actions, including remedial excavation in source areas, groundwater collection and treatment in an interceptor trench, and in-situ bioremediation (nitrogen and phosphorous injections) have occurred on 199 and 205 Flynn Avenue. Groundwater monitoring has also taken place regularly since 1999 for analysis of several VOCs. Several detections of VOCs have been reported in monitoring wells in the parcel north of Lot 2 of the Site (current 205 Flynn Ave), including benzene at concentrations as high 2,120 ug/L, which exceeds the Vermont Groundwater Enforcement Standard ("VGES") of 5 ug/L for benzene, immediately north of the current Metalworks building on 205 Flynn Avenue. Given the proximity of these known impacts to groundwater, it may be possible that

concentrations of VOC compounds are above applicable criteria in the northern portion of the Site, thus representing a REC.

199 Flynn Avenue – Vermont Underground Storage Tank Listing

The parcel located at 199 Flynn Avenue is located directly east of the Site and is currently occupied by self storage facilities, but was formerly used as part of the former Exxon Oil Terminal that spanned across multiple parcels on Flynn Ave, as described above. According to the EDR Database Report, two USTs were formerly located at 199 Flynn Avenue as part of the Former Exxon Terminal Facility. A 2,000-gallon diesel tank and a 1,000 gallon gasoline tank were removed in 1998. Tank condition, spills, and overfills were not reported in the database report. As no information was provided regarding the condition of the tanks at removal or any information pertaining to confirmation sampling, the absence of information represents a significant data gap and represents a REC. Based on available reporting for the Exxon Oil Terminal Hazardous Site (#87-0002), it is possible that these USTs are associated with known petroleum releases associated with that Hazardous Site, however VHB was not able to determine whether the above referenced USTs were or were not related to those releases.

10 Ambrose Place / Barrett Trucking Inc. Hazardous Site, SMS #92-1232 and SMS #2016-4618

The parcel located at 10 Ambrose Place is located directly south of the Site and is currently occupied by Barrett Trucking Inc., a commercial trucking business. 10 Ambrose Place is presumed to be hydraulically cross gradient of the Site. The parcel is currently listed as a Hazardous Sites #92-1232 and #2016-4618 by the DEC, and according to the EDR Database Report, is also listed in the Leaking Underground Storage Tank ("LUST") and Brownfields databases. The status of Hazardous Site #92-1232 is currently listed by the DEC as "No Further Action Planned" and the status of Hazardous Site #2016-4618 is currently listed as "Voluntary Action" with a Sites Management Activity Completion designated recommended by DEC. According to various hazardous site reports from DEC, a 3,000-gallon UST was removed from the Barrett Trucking property, and 35 cubic yards of petroleum contaminated soil was stockpiled on-site in 1992 and eventually disposed of off-site in 1993. Additional investigation at 10 Ambrose Place in 2016 identified the presence of petroleum related compound and chlorinated volatile organic compounds impacts to soil and groundwater in the vicinity of the former UST and existing maintenance shop. Follow up investigation confirmed that those identified impacts are reportedly localized to that immediate vicinity. In 2018 and 2020, groundwater samples were collected from groundwater monitoring wells north of the former UST grave, closer to the Site, and were reported no detectable concentrations of chlorinated volatile organic compounds and petroleum related VOCs in groundwater. Additionally, in 2020 porewater samples were collected in groundwater seep locations in a drainage ditch that drains northward towards the Site, along the eastern edge of the property. Analytical laboratory results of those porewater samples were also reported no detectable concentrations of chlorinated volatile organic compounds and petroleum related VOCs, suggesting that intermittent surface water in the drainage ditch, which may drain northward and along the eastern edge of the Site, was not impacted by those contaminants. Based on these results, it appears that contaminant impacts to groundwater, related to the Barrett Trucking Hazardous Sites, are not migrating towards the Site, and therefore do not represent a REC.

207 Flynn Avenue / Former Vermont Structural Steel Hazardous Site, SMS #770109, Vermont Railway – Flynn Ave Hazardous Site, SMS #931521, and 207 Flynn Ave Hazardous Site, #2016-4619

The parcel located at 207 Flynn Avenue is located 500 feet east of the Site, across the existing active railroad corridor, and is currently occupied by the City Market Co-op food store, but was historically used for various

industrial operations, including but not limited to a steel foundry, bulk fuel storage, blast cleaning, vehicle maintenance, and metal fabrication shop. More recent land uses at 207 Flynn Avenue included a salt storage shed, a wood reclamation shop, a roofing contractor, an antique dealer, and a general contractor. 207 Flynn Ave has been listed and or associated with three DEC Hazardous Sites, including Former Vermont Structural Steel SMS #770109, Vermont Railway – Flynn Ave SMS #931521, and 207 Flynn Ave #2016-4619. SMS #770109 and SMS #931521 are currently listed by the DEC as closed with No Further Action Planed and Sites Management Activities Completed designations, respectively. Based on available environmental investigation reporting associated with those Hazardous Sites, 207 Flynn Ave is understood to be located hydraulically upgradient from the Site. According to various prior environmental investigations completed between 1988 and 2016 at 207 Flynn Ave, the property's operation as a foundry and bulk fuel storage is reported to have resulted in various environmental impacts to soil, soil vapor, and groundwater, primarily from direct releases of petroleum and chlorinated solvents, and indirect releases of metals and polycyclic aromatic hydrocarbons ("PAHs"). Various remedial excavations have occurred in suspected or known contaminant source areas, and long-term monitoring of various groundwater monitoring wells, in both source areas and downgradient areas has also occurred. Results of those investigations suggest that while the extent of detectable contaminant impacts to groundwater may extended westward off the property, no exceedances of applicable groundwater standards have been documented at the western, downgradient boundary of 207 Flynn Ave. Most recently, prior to redevelopment of 207 Flynn Ave for use as the City Market Co-op, a Corrective Action Plan was prepared for the property and implemented in 2018. The Corrective Action Plan included installation of engineered isolation barriers over residual contaminated soil to prevent direct contact with contaminated soil during future use.

Based on the results of previous environmental investigations at 207 Flynn Avenue, that report a lack of substantial downgradient migration of contaminants through groundwater off the property, it is unlikely that impacts would have migrated onto the Site. However, given the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 207 Flynn Avenue may exist at the Site, and thus represents a REC

75 Briggs Street SMS #2017-4731

The parcel located at 75 Briggs Street is located 500 feet east of the Site, across the existing active railroad corridor, and directly south of 207 Flynn Ave. The property is currently a mostly vacant lot; however, Petro Cliffs Climbing Center & Mountaineering School is currently proposing to construct a new facility on this property. Former land uses of 75 Briggs Street are similar to what occurred historically at 207 Flynn Ave, described above, as the two properties were formerly joined. Previous environmental investigations at 75 Briggs Street identified elevated concentrations of lead, PAHs, VOCs and CVOCs to soil, soil vapor, and groundwater, primarily from direct releases of petroleum and chlorinated solvents, and indirect releases of metals and PAHs. In 1991, approximately 100 tons of CVOC contaminated soil was excavated and disposed of off-site, and follow up groundwater monitoring was conducted until contaminant impacts to groundwater were reported to be localized to the immediate on-site source area. Soil, soil gas, and groundwater samples at the downgradient parcel boundary, closest to the Site, reported detections of contaminants, but no exceedances of applicable regulatory standards. A Corrective Action Plan was developed for redevelopment of 75 Briggs Street in 2019 that addressed documented contaminant impacts to soil and soil gas. The Corrective Action Plan was partially implemented in 2020 (pending completion of future re-development) and included installation of engineered isolation barriers over residual contaminated soil to prevent direct contact with contaminated soil during future use.

Based on the results of previous environmental investigations at 75 Briggs Street Street there does not appear to be substantial downgradient migration of contaminants via groundwater off the property, and therefore it is unlikely that those impacts would have migrated onto the Site. However, based on the proximity of this property to the Site, the known impacts to soil, soil vapor, and groundwater, and the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 75 Briggs Street may exist at the Site, and thus represents a REC.

4.4 Local Records Review

VHB personnel visited various municipal departments in the city of Burlington in person on May 24, 2023. The following is a summary of the files reviewed by department.

Office	Types of Information Available	Summary of Available Information
Assessor's Office	Assessor's Card and Map	Unsworth MAACO LLC sold the parcels to Chittenden Solid Waste District on December 14, 2001.
Health Department	Supply Well, Septic/Sewer Information	The Site is on municipal water and sewer.
Fire Department	Fires, Releases	No record of calls dating back to 2002 when electronic record keeping began per the Fire Marshall.
Town Clerk	UST Information, Permits, Land Records	Warranty Deed available and provided as Appendix I.
Planning/Zoning	Zoning Map, Applications	Site plans labelled the building north of the workshop as a garage.

4.4.1 Land Records

A search of the land records at the Burlington Clerk's Office was conducted. VHB staff are not title search professionals; a formal land records review should be conducted by a title insurance company or qualified title search professional. The table below provides a summary of ownership history for the Site that was generated based on VHB's limited review of land records.

Grantor	Grantee	Book/Pg.	Date
Unsworth MAACO LLC	Chittenden Solid Waste District	711/181	12/14/2001

Copies of pertinent documents are provided in **Appendix I**.

4.4.2 Assessor's Office

Based on a review of the information on the Assessor's Office website, the Site is comprised of two parcels. The Assessor's card included information of the past two property transfers, most recently Unsworth MAACO LLC to Chittenden Solid Waste District, and a number of building permits. The metal garage building north of the workshop was permitted to be removed on April 7, 2006. No information regarding storage tanks or septic systems was reported.

4.4.3 Fire Department

VHB spoke with the Burlington Fire Marshall on May 25, 2023. The Fire Marshall informed VHB that the fire station has had no calls regarding the Site since 2002, which is when electronic records began being kept. There were no hazardous waste spills known by the Fire Marshall at the Site.

4.4.4 Summary of Records Review

VHB reviewed the EDR computer database search results, the Vermont DEC online database, and relevant municipal files for properties that have or could potentially have impacted environmental conditions at the Site. Nearby properties of interest and releases of petroleum and/or hazardous substances have been documented.

4.5 Historical Use Information

VHB reviewed the historical use information for the Site and nearby properties for conditions that have the potential to environmentally impact the Site.

4.5.1 Sanborn Maps

Sanborn maps are a uniform series of large-scale detailed maps, dating from 1867, that depict the commercial, industrial, and residential sections of cities. These maps historically assisted fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn maps are currently used to track the changing landscape and property uses.

Summary of Sanborn Maps

Year(s)	Description	
1894	Site:	The Site is not depicted on this map.
	Surrounding Area:	The eastern adjoining area is comprised of industrial operations including Lang & Goodhue Manufacturing Co., Stewart Hartshorn Co., and Ransom Hardware Co. that include several metal manufacturing buildings, lumber stockpile areas, and storage sheds. There is no depiction of the properties to the north, west, or south of the Site.
1900	Site:	The Site is not depicted on this map.
	Surrounding Area:	All industrial buildings east of the Site on the 1894 map remain. Queen City Cotton Company occupies the former Ransom Hardware Co building, and the Stewart Hartshorn Co. building is now labeled as the former Ransom Hardware Co.

Year(s)		Description
1906	Site:	The Site is not depicted on this map.
	Surrounding Area:	A storage shed and manufacturing building in the northeast corner of the east adjoining area are no longer depicted. All remaining buildings in this industrial area are labelled as vacant.
1912	Site:	The Site is not depicted on this map.
	Surrounding Area:	The building in the southern portion of the east adjoining area is no longer depicted. Vermont Construction Company occupies the manufacturing buildings on the property east of the Site. The buildings are used as a machine shop, foundry, storage, office, and store house.
1919	Site:	The Site is not depicted on this map.
	Surrounding Area:	Vermont Construction Company continues to occupy the manufacturing buildings on the property east of the Site. Some development, including the connection of some building, were made. A gas tank is depicted in the northwest portion of the east adjoining area. Railroad development has occurred easterly adjacent to the Site.
1926	Site:	The Site is not depicted on this map.
	Surrounding Area:	A second gas tank is depicted in the northwest corner of the east adjoining property.
1938	Site:	The Site is not depicted on this map.
	Surrounding Area:	The map depicts Vermont Structural Steel as the occupants of the manufacturing area east of the Site. The two gas tanks are no longer depicted in the northwest section of the east adjoining property. Gulf Oil Corporation is depicted in the southern portion of the east adjoining area.
1942	Site:	Colonial Beacon Oil Company Inc. occupies an area in the northern portion of the Site. There is an oil storage area and two gasoline tanks within the Site. There is a railway spur leading onto the Site, ending adjacent to the oil storage area.
	Surrounding Area:	The north and northeast adjoining area includes nine above ground oil and gasoline tanks. There is an oil storage area in a building in the northern adjoining area. Vermont Structural Steel Corporation, and Gulf Oil Corporation continue to occupy the east adjoining area. An oil storage area, gas tank, and two oil tanks are depicted on that property.
1950	Site:	The oil storage area and two gasoline tanks included on the 1942 map are no longer depicted. Vermont Structural Steel Corporation occupies two warehouses within the Site. Colonial Beacon Oil is now Esso Standard Oil Company, Inc. A portion of Esso Standard Oil Company Inc. is within the Site, though there are no related buildings or tanks depicted.
	Surrounding Area:	Esso Standard Oil Company Inc. continues to operate north and northeast of the Site with no change to number of buildings depicted. Vermont Structural Steel Corporation and Gulf Oil Corporation continue to operate in the eastern adjoining area.
1960	Site:	Vermont Structural Steel Corporation continues to occupy two warehouses within the Site.
	Surrounding Area:	A loading dock is depicted on the property north of the Site. Vermont Structural Steel Corporation and Gulf Oil Corporation continue to operate east of the Site. A fabrication building relating to Vermont Structural Steel Corporation is depicted in the southern portion of the east adjoining area.
1978	Site:	Conditions at the Site are the same as the 1960 map.
	Surrounding Area:	The southern adjoining area depicts two iron warehouses and a commercial building. The northern and eastern adjoining areas are the same as above.
1989	Site:	Warehouses remain within the Site. A commercial building and twenty-foot extension to the southern iron warehouse extends into the Site.
	Surrounding	Structures associated with Esso Standard Oil Company Inc. are no longer depicted. One building

Year(s)	Description
Area:	including an oil storage area remains in the northern adjoining area. Vermont Structural Steel Corporation continues to operate in the eastern adjoining area.

A copy of the Sanborn map report is provided in **Appendix D**.

4.5.2 City Directory Abstracts

The City Directory Abstracts provided by EDR were reviewed; these provide address and owner or business name information from available City Directory data for the area. City Directory reports for Ambrose Place, Briggs Street, and Flynn Avenue, were provided for the years 1941 through 2017 at approximately 5-year intervals. Notable on-site and adjacent listings from the directories have been listed below.

Address	Years	Business Name/ Use
7 Ambrose Place	1992, 2017	Not Environmentally Concerning Properties
199 Flynn Avenue	1946	Colonial Beacon Oil Co
	1963	Humble Oil & Refining Co
	2010, 2014	Flynn Avenue Self Storage
205 Flynn Avenue	2014, 2017	Metalworks
207 Flynn Avenue	1946, 1963	Vermont Structural Steel Corp & Vermont Engineering & Supply Co
	1963, 1967	United Realty Co & Industrial Properties Corp real estate
	1992	Burlington Sanitation & Perry Enterprises
	1995	Metalworks & Other Not Environmentally Concerning Properties
195 Flynn Avenue	1995	GRC Automotive
	2000	Private Owner

Copies of City Directory Abstracts are included as **Appendix E.**

4.5.3 Topographic Maps

Historical U.S. Geological Survey (USGS) topographic maps showing the Site for the years 1906, 1919, 1944, 1948, 1972, 1987, 2012, 2015, 2018 were obtained from EDR and reviewed. Relevant information obtained from these maps is summarized below.

No structures were depicted on the Site in 1906 or 1919. One structure was depicted in 1944, 1948, 1972, and 1987 in the apparent current configuration of the one on-Site building. No structures or features are depicted in the 2012, 2015, or 2018 maps.

Copies of the historical topographic maps are included as **Appendix F**.

4.5.4 Aerial Photography

Aerial photographs were obtained from EDR and Google Earth Pro for the Site and vicinity and were reviewed. Relevant information obtained from these photographs is detailed below.

Summary of Aerial Photographs

Year(s)		Description
1937-1942	Site:	Two structures (oil storage area and gasoline tanks according to Sanborns) are visible within the Site. The southern portion of the Site includes grass area and trees.
	Surrounding Area:	Oil and gas above-ground storage tanks are visible to the northwest. Two buildings are visible to the north. Several industrial buildings are visible to the east beyond the adjacent railroad.
1962	Site:	One structure (oil storage area) remains, and a large workshop building replaced the second structure.
	Surrounding Area:	Development of an oil and gas tank area to the northwest is visible. Industrial buildings to the north, and east appear to have been developed further. Land to the south appears wooded or agricultural.
1981	Site:	No major changes.
	Surrounding Area:	No major changes to the north, east, or west. A commercial building is visible south of the Site.
1986	Site:	No major changes.
	Surrounding Area:	Oil and gas tanks to the west and northwest appear to have been demolished or removed; but some structures are remaining. Development of residential buildings are visible to the southwest of the Site.
1992-1999	Site:	No major changes.
	Surrounding Area:	Oil and gas tanks west of the Site are no longer present, and the westerly adjacent property is empty. No major changes in other adjoining areas.
2008-2023	Site:	The remaining structure is visible in the 1999 arial, but not 2008.
	Surrounding Area:	Self-storage facilities have been constructed in the western adjoining area.

Copies of the aerial photographs are included as **Appendix G**.

4.6 Site History Overview

Historical records were reviewed dating back to 1894 using Sanborn Maps, 1937 using aerial imagery, and 1906 using topographic maps. The Site was apparently used in relation to the Colonial Beacon Oil Co. (1937-1942) and included two structures: an oil storage area and two gasoline tanks. In 1942, the Sanborn map depicts two gasoline tanks with a pump house, and an oil storage area operated by Cities Service Company within the Site boundaries. The 1942 Sanborn map also shows that the northern portion of the Site was owned by Colonial Beacon Oil Company Inc., though no structures occupied the Site. A railroad spur is depicted within the Site, ending at the oil storage area. Between 1942 and 1950, a warehouse building was constructed on the site in place of the southern structure, which is its present configuration. The eastern portion of the warehouse appears to be in the same footprint as the former gasoline tanks and pump house. The northern structure was removed sometime between 2004 and 2010. The Site currently operates as a woodworking facility, art studio, and music studio, and the southern portion of the property is densely vegetated and wooded.

The east adjoining land has been used for manufacturing since at least 1894 based on Sanborn map records. Several companies, including Lang and Goodhue Manufacturing Company, Stewart Hartshorn Company, Gulf Oil

Corporation, Vermont Construction Company, and most notably Vermont Structural Steel Company have occupied the buildings. Between 2016 and 2018, the manufacturing buildings were removed. The area is currently the City Market grocery store and parking lot.

An oil storage area in a warehouse building related to Colonial Beacon Oil Co. is visible in 1937 aerial imagery in the north adjoining property. There were also three above ground gasoline tanks in the north adjoining property until 1960.

The north adjoining land was used by Colonial Beacon Oil Company Inc., and Esso Standard Oil Company Inc. from at least 1937 to approximately 1986. During this occupancy, several large oil and gasoline tanks were constructed in the west adjoining area. The area was vacant until sometime between 2004 and 2006 when a self-storage area was constructed, which is the west adjoining land's current use.

The historical use of the north and west adjoining properties as oil storage facilities represents a REC, as discussed in section 4.3.2. The historical use of the east adjoining property as manufacturing facilities represents a REC, as discussed in section 4.3.2.

4.7 Evaluation of Potential Vapor Encroachment

As part of this Phase I ESA, VHB conducted an Evaluation of Potential Vapor Encroachment (EPVE) in order to determine whether or not a Vapor Encroachment Condition (VEC) exists at the Site. A VEC is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil and/or groundwater either on or near the Site. This EPVE consisted of the review of information presented in previous or subsequent sections of this document such as:

- The Site's physical setting and features that may impact vapor migration
- Documented storage and releases of volatile COCs at the Site and/or nearby properties
- Potential preferential pathways for vapor migration such as subsurface utility corridors

VHB has concluded that:

Based on documented historic land uses at the Site, including oil storage within the footprint of the existing building, and surrounding areas use as oil and gasoline storage, it is possible that volatile COCs have been released on the Site or in the vicinity of the Site and that the vadose zone is impacted by volatile COCs.

Therefore, VHB has concluded that a VEC exists at the Site in connection with REC #7 as detailed in Section 7.1.7

5

Site Reconnaissance

5.1 Methodology and Limiting Conditions

Alayna Thompson and Kevin Sheehan of VHB conducted a Site reconnaissance on May 19, 2023, for visual and reasonably identifiable indications of RECs as defined by ASTM E 1527-21. VHB was accompanied by Brian Mital, the Site Manager. Weather conditions did not limit observations during the Site reconnaissance. Some dense vegetation along the southern wall of the building limited observations made at the ground surface. Dense vegetation and a stream limited access to the southern extent of the Subject Area. All units of the one-story building were accessible and inspected during this Site reconnaissance.

VHB's Site observations and information obtained at the time of the Site reconnaissance are presented in the following sections. Photographs taken during the Site Reconnaissance visit are provided in **Appendix J**.

Observation	**Observed or Suspected**
Areas of petroleum or hazardous substances product storage and use / Drums / Hazardous Substance and Petroleum Products Containers	Not Observed.
Above Ground Storage Tanks (ASTs)	Not Observed.
Underground Storage Tanks (USTs)	Not Observed.
Odors	A petroleum like odor was detected in stained soil north of the Site building.
Pools of liquid	Not Observed.
Unidentified Substance Containers	Three plastic drums were observed on site. Two drums on the south exterior wall of the building were empty, and one drum off the eastern exterior wall was partially filled with what is suspected to be water.
Transformers and any identified PCB-containing equipment	Utility pole mounted transformer observed on access drive to the *Site*.
Heating/Cooling systems	The building is heated by natural gas fired furnace and/or electricity, distributed by Modine or Univent units.

Observation	Observed or Suspected
Interior stains or corrosion	The floor of the building is concrete. Some of the concrete appears to be original to construction, and some has been painted over, covered with plywood, or with carpet. The concrete, where observable, appears to be in good condition. Seams in the concrete are visible in the central unit. Potential filled-in floor drains and manhole covers were visible in the two end units. The visible concrete in all units appears to be in good condition.
Interior drains, sumps, and below grade conveyances	No current floor drains were observed. Several areas may be filled-in floor drains/manholes within the building.
Exterior pits/ponds/lagoons	There is a small stormwater retention pond south of the building that has a drainage pipe in the western end.
Pesticide use	Not Observed.
Stained soil or pavement	A small 3-foot by 3-foot area of intermittently stained soil was observed north of the building. There was a petroleum like odor to the soil, and the staining appeared to be surficial, but could not be confirmed to be limited to surface soil.
Stressed vegetation	The grass area where the 3 foot by 3-foot staining was observed appeared to be stressed.
Evidence of solid waste disposal on the Site	No evidence of solid waste disposal was observed.
Evidence of fill materials	Not Observed.
Wastewater discharges	Not Observed.
Wells	Not Observed.
Septic systems	Not Observed.
Evidence of spills/releases	Not Observed.
Hazardous waste	Spray paint cans and small quantities of varnish and stain were observed in two units on-Site. Releases were not observed from these product containers.
Non-Hazardous waste	Waste generated at the Site is related to woodworking and art projects. No dumpsters or roll-offs were observed on the Site.
Air Emissions	A self-contained air purifying unit was observed in the central unit woodworking shop. This unit was not connected to the exterior. A vent fan over the jewelry workstation in the western unit was observed in a window. No chemical storage or use was observed on the jewelry station at the time of the site reconnaissance. A section of PVC tubing was observed coming from the ground on the western end of the southern wall of the building; it is unclear what this pipe is associated with but did not appear to be related to heating systems or underground storage tanks.
Adjacent Properties	The Site is bordered by the Metalworks property to the north. Metalworks currently operates as a metal fabrication shop. Flynn Avenue Self Storage borders the Site to the west. Several storage units exist on the paved lot. A railroad borders the Site to the east and is adjacent to the City Market Grocery Store and parking lot. The Site is bordered to the south by mixed commercial use lots at 7-10 Ambrose place. A section of an unpaved parking lot extends into the Site boundary.

Observation	Observed or Suspected
Other	Tools and machinery associated with woodworking were observed on-Site. Staining or releases from this equipment were not observed.

5.2 Heating, Water, and Sewer Systems

The building is heated by natural gas and/or electricity distributed by Modine and Univent units. The building is connected to City water and City sewer. No evidence suggests that the building was connected to a private well or a septic system.

5.3 Exterior Observations and Surface Conditions

The Site is mostly flat with an area of dense vegetation in the southern portion of Lot 1. The area surrounding the building on Lot 2 is an unpaved roadway and parking area with grass separating the building from the road, and between the roadways. Both the unpaved roadway and grass areas appear to be used as storage for inert materials related to woodworking or art projects. A rail spur extending from the easterly adjacent railroad corridor remains present on the east side of Lot 2. Soil staining was observed in the grass area north of the building on Lot 2 in an approximate 3-foot by 3-foot area. A petroleum like odor was observed in the stained soil. This surficial staining represents a REC.

Dense vegetation was present on the southern portion of Lot 1 that limited accessibility and visual inspection. However, VHB believes that the visible extent of the vegetated area was representative of the southern portion of Lot 1 and therefore the dense vegetation is not a significant data gap.

5.4 Interior Observations

The building located on Lot 2 is divided into three units (west, central, and east). Former uses of the building include auto repair, service, and painting, although VHB was not able to confidently determine whether those former uses were related to specific units in the building.

The east unit is currently used as an art workshop. The eastern most section contains various supplies including paint, spray paint, and machinery. The floor in this section of the building appears to be original concrete, and in good condition. One circular patch was located near the entry way as well as several smaller circular patches which may have been former floor drains. Given the former use of the building for various auto repair and painting services, the potential presence of a floor drain represents a REC, as discussed in Section 7.1. The east unit includes a space that has floors that have been painted. This space includes a Modine heating unit. Also in the eastern unit is a small music studio. Some of the concrete is covered with rugs, preventing observations of the concrete. There is also an area where a wooden floor was installed above the concrete.

The central unit is currently used as a woodworking shop. The flooring in this unit is a mix of wood, tile, carpet (preventing visual access to the original concrete floor), and original concrete. Some spray paint was observed stored in a small closet. One circular patch of concrete was observed in this space. A seam in the concrete was observed next to a raised wooden platform. VHB observed a concrete ramp leading underneath the wooden platform. The tenant of the woodworking shop, who has been there for ten years, explained that it was his understanding an automobile shop formerly operated here, and that cars were spray-painted in that section of the space. The historical use of the Site as an automotive repair shop represents a REC, as discussed in section 4.3.1.

The west unit is currently used as a music studio and jewelry making studio. The flooring is a mix of original concrete, wood tiling, and carpet. Much of the floor is covered in area rugs. No drainage areas or basins were observed in this area, although visual observations of the original concrete floor were impeded by furniture and rugs.

6

Interviews

6.1 Interview with Owner, Site Manager, Occupants, or Knowledgeable Person

VHB Conducted the Site reconnaissance with Brian Mital, the property Supervisor for the current owner, CSWD. Mr. Mital has been the Site Supervisor for one year and stated that he has visited the site around three times. Mr. Mital indicated that there has been no dumping known to have occurred on the Site. During the Site visit, Mr. Mital introduced VHB to the tenant of the central unit who has been occupying the Site for the last ten years. The tenant informed VHB that there was previously a coffee roaster in the west unit, and the Red Cross previously used the east unit as storage. The tenant also described the unit he currently occupies, the woodworking shop, to have been an auto repair shop that featured auto body work and car painting in an assembly-line style production, with the spray-painting of cars having occurred in his unit (the middle unit). The historical use of the Site as an automotive repair shop represents a REC, as discussed in section 4.3.1.

South of the building, the pond, and a flat grassy area, there is what appears to be a man-made mound on Lot 1. There appeared to be chunks of asphalt throughout the mound, and it is heavily vegetated, indicating it has been present on-Site for some time. VHB asked for information concerning the pond and mound, but the property Supervisor did not have any information. The Assessor's Office provided information regarding the mound, which is discussed in section 4.4.4.

The information obtained during the interview has been incorporated throughout this report.

6.2 Interviews with Local Government Officials

Information obtained from Local Government Officials is described in Section 4.2. No other local government officials were contacted as part of this Phase I ESA.

7

Conclusions and Opinions

The goal of the Phase I ESA is to identify RECs as defined in Section 1.1. This section identifies known or suspected RECs, Controlled RECs, and Historical RECs, as well as additional Site considerations. During the Phase I ESA, VHB identified eight RECs in connection with the Site. VHB's opinion is limited by the conditions prevailing at the time the work was performed and the applicable regulatory requirements in effect.

7.1 RECs

To meet the requirements of Section 12.7.1 of the Standard, the statement below has been included to preface the conclusions of this report.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for 195-201 Flynn Avenue, the Site. Any exceptions to, or deletions from, this practice are described in Section 8.1 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Site except for the following:

7.1.1 REC #1 – Former Automotive Repair Shop On-site

According to the EDR Database Report, between 1987 and 1998, an auto and home supply store, carwash, and general automotive repair shop operated on the Site, in the existing building on Lot 2. An interview with a tenant of the building revealed that spray-painting of cars occurred within the building on a raised concrete platform. Circular patches in the concrete floor of the building were observed during Site reconnaissance that may be patches over former floor drains.

Opinion: It is the environmental professional's opinion that the historical use of the existing building on the Site as an automotive repair shop, and the potential presence of former floor drains within that building represents a REC.

7.1.2 REC #2 – Oil Staining on Ground Surface

A small, approximately 3 feet by 3 feet, area of intermittently stained soil was observed in the grassed area north of the existing building on Lot 2. VHB observed a petroleum like odor to the soil during Site reconnaissance. The nature and extent of potential contaminant impacts associated with this staining on a pervious surface could not be determined by visual inspection.

Opinion: It is the environmental professional's opinion that because the nature and extent of potential contaminant impacts associate with this staining on a pervious surface could not be determined, that this condition represent a REC.

7.1.3 REC #3 – Historical Oil and Gasoline Storage On-Site

Sanborn maps from 1942 identify on-Site storage of bulk oil and gasoline by Cities Service Company. No further documentation regarding this bulk oil and gasoline storage was found, including but not limited to potential storage tank removal reports or confirmatory soil samples.

Opinion: It is the environmental professional's opinion that the former use of the Site for bulk oil and gasoline storage, without record of removal, represents a REC.

7.1.4 REC #4 – Vermont Railroad

A section of abandoned railroad extends onto the Site from the active railroad corridor to the east, ending near the location of the former oil storage area.

Opinion: It is the environmental professional's opinion that the presence of railroad tracks on the Site represents a REC due to the possibility of releases of hazardous materials from locomotive cars, and metals, pesticides/herbicides, and other wood preservation chemicals that are typically used along rail corridors.

7.1.5 REC #5 – 199 and 205 Flynn Avenue, Exxon Oil Terminal Hazardous Site, SMS #87-0002

The parcels located at 199 and 205 Flynn Avenue were formerly one property (listed under 199 Flynn Avenue) and formerly associated with a bulk oil storage and distribution terminal that spanned across multiple parcels on Flynn Ave between 1940 and 1981. The bulk oil storage and distribution terminal was operated by various companies, including Colonial Beacon Oil Company, Esso Standard Oil Company, and Exxon Oil Company. 199 Flynn Avenue is currently listed as a Hazardous Site by the Department of Environmental Conservation ("DEC"). Based on environmental investigation reporting available for the Exxon Oil Terminal Hazardous Site, petroleum related volatile organic compound ("VOC") impacts to soil and groundwater have been documented at both the 199 and 205 Flynn Avenue parcels. Several detections of VOCs have been recently reported in groundwater on 205 Flynn Ave, directly north of Lot 2 of the Site, including benzene at concentrations as high 2,120 ug/L, which exceeds the Vermont Groundwater Enforcement Standard of 5 ug/L.

Opinion: It is the environmental professional's opinion that given the proximity of these known impacts to groundwater to the Site, it may be possible that concentrations of VOC compounds in groundwater are above applicable criteria in the northern portion of the Site, and therefore represent a REC.

7.1.6 REC #6 – Former Underground Storage Tanks Associated with Exxon Terminal Facility SMS #87-0002

The Vermont UST database reports that two underground storage tanks associated with the former Exxon Terminal Facility (199 and 205 Flynn Avenue) were removed from the ground at that facility in 1998. No records of tank conditions during removal were found, and it is possible the tanks could have been in poor condition and could have caused a release to soil and groundwater at 199 and/or 205 Flynn Avenue, which is presumed to be hydrologically cross-gradient, or potentially up-gradient of the Site. Based on available reporting for the Exxon Oil Terminal Hazardous Site (#87-0002), it is possible that these USTs are associated with known petroleum releases at 199 and 205 Flynn Avenue; however, VHB was not able to determine whether the above referenced USTs were or were not related to those releases.

Opinion: It is the environmental professional's opinion that because no information was provided in the UST database regarding the exact location or condition of the tanks at removal or any information pertaining to confirmation sampling, the absence of information represents a significant data gap, and represents a REC.

7.1.7 REC #7 – 75 Briggs Street Hazardous Site, SMS #2017-4731

The parcel located at 75 Briggs Street is currently listed as a Hazardous Site by the DEC. Previous environmental investigations associated with the Hazardous Site identified elevated levels of lead, PAHs, volatile organic compounds ("VOCs"), and chlorinated volatile organic compounds ("CVOCs") in soil, soil gas, and groundwater related to the industrial history of the property that included combustion sources, leaking petroleum storage tanks, and foundry and machine shop operations that included the use of cleaning solvents.

Opinion: It is the environmental professional's opinion that based on the proximity of this property to the Site, the known impacts to soil, soil vapor, and groundwater, and the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 75 Briggs Street may exist at the Site, and thus represents a REC.

7.1.8 REC #8 – 207 Flynn Avenue, Vermont Structural Steel Hazardous Site, SMS #2016-4619

The parcel located at 207 Flynn Avenue is currently listed as a Hazardous Site by the DEC. According to various prior environmental investigations completed at 207 Flynn Avenue, historical industrial operations on the property, included a foundry, metal machining, vehicle storage and maintenance, fuel storage, and blast cleaning. These environmental investigations determined that soil at 207 Flynn Avenue was impacted with PAHs, arsenic, lead and to a lesser degree VOCs and CVOCs. Soil vapor and groundwater were also determined to be impacted with VOCs and CVOCs.

Opinion: It is the environmental professional's opinion that based on the proximity of this property to the Site, the known impacts to soil, soil vapor, and groundwater, and the potential of airborne contaminant distribution associated with certain former land uses and site operations, the contaminant impacts found in soil, groundwater, and soil vapor at 207 Flynn Avenue may exist at the Site, and thus represents a REC.

7.2 VEC

A VEC is the presence or likely presence of COC vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the target property. VHB has concluded that a VEC exists at the Site**.** Based on the historic use of land at the Site, that included oil storage, and surrounding areas as oil and gasoline storage, it is possible that volatile COCs have been released in the vicinity of the Site and that the vadose zone at the Site is impacted by volatile COCs. Therefore, VHB has concluded that a VEC exists at the Site in connection with REC #1, #3, and #5.

7.3 *De Minimis* Conditions

De minimis conditions represent conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action by the appropriate regulatory agency. VHB did not identify *de minimis* conditions on the Site.

7.4 Business Environmental Risks

The following business environmental risks represent conditions at the Site that may have an environmentally driven impact on the current or planned use of the Site, but do not constitute RECs or *de minimis* conditions as defined in the Standard. However, the Environmental Professional views these as potential risks that should be considered when making decisions regarding the Site.

7.4.1 Potentially Hazardous Building Material

The potential presence of asbestos-containing building materials, lead-based paint, and/or PCB-containing building materials is beyond the scope of ASTM 1527-13. However, given the age and construction of the former buildings at the Site there is a possibility that these materials may be present.

7.4.2 Urban Fill

The Site is located in a developed urban area with a combination of former industrial and commercial land uses at and adjacent to the Site. As a result, it is possible that the Site may have been impacted via the aerial deposition of air-borne contaminants associated with prior and current industrial uses in the area. Additionally, structures and facilities at the Site, including but not limited to small buildings and rail spurs, have been constructed and demolished over the years. Thus, it is possible that fill of unknown origin and quality may have been imported to the Site to achieve the current grade. Considering no evidence of the use of impacted fill was identified during this Phase I ESA, the potential presence of urban fill alone, does not represent a REC. However, should future development involve the exportation of soil from the Site and soil is sampled and analyzed for typical urban and industrial contaminants, the possibility exists that those results could indicate the presence of impacted soil that may require special consideration for management and disposal.

8

Data Gaps and Limitations

Other than those limitations expressly provided in **Appendix A** and/or specified herein, completion of this Phase I ESA was not subject to significant assumptions, limitations, or exceptions to the Standard.

8.1 Significant Assumptions, Limitations, Exceptions and Data Gaps.

VHB identified six data gaps at the Site during the course of this Phase I ESA. The Environmental Professional's assessment as to whether these data gaps are considered significant is outlined below.

Data Gap	Assessment
No information in VT UST database regarding underground storage tank condition during removal at 199 Flynn Avenue	Tank condition was not available in listings pertaining to the removal of two underground storage tanks at the former Exxon Terminal facility. The absence of this information represents a significant data gap.
Due to rugs covering significant portions of floors in the building, not all the original concrete floor was visible.	VHB believes that observations of visible floor space was likely representative of covered portions of flooring and thus the data gap is not significant.
Dense vegetation along southern wall of building.	Some dense vegetation impeded views to the ground surface along the southern wall of the existing building on Lot 2 of the Site. VHB believes that no significant feature was missed due to dense vegetation and thus the data gap is not significant.
Dense vegetation on southern portion of Lot 1	Dense vegetation was present on the southern portion of Lot 1 that limited accessibility and visual inspection. However, VHB believes that the visible extent of the vegetated area was representative of the southern portion of Lot 1 and therefore the dense vegetation is not a significant data gap.

As described above and when appropriate, these data gaps have been conservatively incorporated into the findings of this report. Should additional data become available, the findings of this report should be reevaluated.

Signature and Qualifications of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 C.F.R. § 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Environmental Professional: 

Zack Clark

NOTES TO USERS

is for use in administering the National Flood Insurance Program. It does
sarily identify all areas subject to flooding, particularly from local drainage
f small size. The **community map repository** should be consulted for
pdated or additional flood hazard information.

more detailed information in areas where **Base Flood Elevations** (BFEs)
odways have been determined, users are encouraged to consult the Flood
nd Floodway Data and/or Summary of Stillwater Elevations tables contained
Flood Insurance Study (FIS) Report that accompanies this FIRM. Users
e aware that BFEs shown on the FIRM represent rounded whole-foot
. These BFEs are intended for flood insurance rating purposes only and
t be used as the sole source of flood elevation information. Accordingly,
ation data presented in the FIS Report should be utilized in conjunction with
r purposes of construction and/or floodplain management.

es of the **floodways** were computed at cross sections and interpolated
cross sections. The floodways were based on hydraulic considerations with
requirements of the National Flood Insurance Program. Floodway widths
pertinent floodway data are provided in the Flood Insurance Study Report
diction.

eas not in Special Flood Hazard Areas may be protected by **flood control**
s. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance
ort for information on flood control structures for this jurisdiction.

ction used in the preparation of this map was Vermont State Plane
PS zone 4400). The **horizontal datum** was NAD 83, GRS 1980
. Differences in datum, spheroid, projection or UTM zones used in the
n of FIRMs for adjacent jurisdictions may result in slight positional
s in map features across jurisdiction boundaries. These differences do not
accuracy of this FIRM.

vations on this map are referenced to the North American Vertical Datum of
ase flood elevations must be compared to structure and ground elevations
ed to the same **vertical datum**. For information regarding conversion
the National Geodetic Vertical Datum of 1929 and the North American
Datum of 1988, visit the National Geodetic Survey website at

LEGEND

SPECIAL FLOOD HAZARD AREAS (SFHAs) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

The 1% annual chance flood (100-year flood), also known as the base flood, is the flood a 1% chance of being equaled or exceeded in any given year. The Special Flood Hazard the area subject to flooding by the 1% annual chance flood. Areas of Special Flood Hazar include Zones A, AE, AH, AO, AR, A99, V, and VE. The Base Flood Elevation is the water-s elevation of the 1% annual chance flood.

ZONE A No Base Flood Elevations determined.

ZONE AE Base Flood Elevations determined.

ZONE AH Flood depths of 1 to 3 feet (usually areas of ponding); Base Flood El determined.

ZONE AO Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); av depths determined. For areas of alluvial fan flooding, velocities also d

ZONE AR Special Flood Hazard Areas formerly protected from the 1% annual ch flood by a flood control system that was subsequently decertified. Zo All indicates that the former flood control system is being restored to protection from the 1% annual chance or greater flood.

ZONE A99 Area to be protected from 1% annual chance flood by a Federal flood protection system under construction; no Base Flood Elevations deter

ZONE V Coastal flood zone with velocity hazard (wave action); no Base Flood determined.

ZONE VE Coastal flood zone with velocity hazard (wave action); Base Flood El determined.

FLOODWAY AREAS IN ZONE AE

The floodway is the channel of a stream plus any adjacent floodplain areas that must be k encroachment so that the 1% annual chance flood can be carried without substantial inc flood heights.

OTHER FLOOD AREAS

ZONE X Areas of 0.2% annual chance flood; areas of 1% annual chance flood wit average depths of less than 1 foot or with drainage areas less than 1 squa mile; and areas protected by levees from 1% annual chance flood.

OTHER AREAS

ZONE X Areas determined to be outside the 0.2% annual chance floodplain.

ZONE D Areas in which flood hazards are undetermined, but possible.

COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS

OTHERWISE PROTECTED AREAS (OPAs)

CBRS areas and OPAs are normally located within or adjacent to Special Flood Hazard Are

Burlington, VT

This report has been prepared for the sole and exclusive use of the Client and the Users. It is subject to and issued in connection with the Agreement and the provisions thereof. Any use or reliance upon information provided in this report, without the specific written authorization of the Client and VHB, shall be at the User's sole risk. VHB assumes no liability for use of this report by any person or entity other than the Client or User(s), for which it was prepared. Any potential future user of this document would be subject to VHB approval and such user's reliance on this document would be in accordance with the terms and conditions of the original contract.

In conducting this assessment, VHB has obtained and relied upon information from multiple sources to form certain conclusions regarding potential environmental issues at and in the vicinity of the Site. Except as otherwise noted, no attempt has been made to verify the accuracy or completeness of such information.

The objectives of the assessment described in this report were to assess the physical characteristics of the Site with respect to overt evidence of past or present use, storage, and/or disposal of oil or hazardous materials, as defined in applicable state and federal environmental laws and regulations, and to gather information regarding current and past operations and environmental conditions at and in the vicinity of the Site.

Where access was denied or conditions obscured, VHB makes no report on such areas.

No attempt has been made to assess the compliance status of any past or present Owner or Operator of the property with any federal, state, or local laws or regulations.

The findings, observations, and conclusions presented in this report are limited by the scope of services outlined in our Agreement, which reflects schedule and budgetary constraints imposed, by the Client for the current phase of environmental assessment. Furthermore, the assessment has been performed in accordance with generally accepted engineering practices and standards set forth in ASTM E 1527-21. No other warranty, expressed or implied, is made.

The assessment presented in this report is based solely upon information gathered to date. Should further environmental or other relevant information be developed at a later date, the Client should bring the information to the attention of VHB as soon as possible. Based upon an evaluation, VHB may modify the report and its conclusions.

The Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck was conducted under the Notice of Disclaimer/Waiver of Liability included in the summary report.

Appendix B
Qualifications of VHB Personnel

Zack Clark

Project Manager

Education

BS, Environmental Sciences, University of Vermont, 2010

Registrations/Certifications

Grade 1 Wastewater System Operator (State of Vermont – DEC)

Class BW Designer License (State of Vermont – DEC)

40 Hour HAZWOPER Certification and 10 Hour Construction Safety Certification (OSHA)

50-Ton Master Mariner Captains License (United States Coast Guard)

VHB Office

South Burlington, VT

Zack is an Environmental Scientist with 12 years of professional experience in contaminated sites investigation, remediation, and reporting, including remedial construction observation. He has written and directed the implementation of numerous Corrective Action Plans and Soil Management Plans, for contaminated sites in the State of Vermont, including several large scale infrastructure projects. Zack has extensive experience with a variety of methods of field sampling of groundwater, surface water, soil, sediment, air and soil gas. Zack also has substantial experience with the physical implementation of various remedial strategies, including the installation and maintenance of active groundwater and soil vapor remediation systems. He is a Grade 1 Wastewater Treatment Facility Operator and a licensed wastewater disposal and potable water supply system designer, in the State of Vermont.

12 years of professional experience

Middlebury Bridge and Rail Project, Middlebury, VT
Responsible for preparation of a Corrective Action Plan as well as implementation compliance monitoring on this large-scale linear transportation project. Also responsible for compliance monitoring and amendment of a NPDES permit for critical excavation dewatering treatment and discharge to waters of the state.

North Hero – Grand Isle Drawbridge Replacement Project, Grand Isle, VT
Client contact responsible for leading field team from Site Investigation sampling efforts through to Soil Management Plan implementation monitoring and documentation. Additionally responsible for preparation of various ongoing technical documents for waste profiling and disposal, interim DEC reporting, and spill/release reporting, as necessary.

Winooski Main Street Reconstruction, Winooski, VT
Zack participated in design and implementation of soil pre-characterization assessment for the redevelopment of a portion of Main Street that passes through multiple known hazardous sites. He prepared a soil management plan for management of contaminated media during construction and will be the field team lead for construction monitoring in accordance with the Soil Management Plan.

Green Mountain Power, On-Call Environmental Permitting Services, VT
Zack is supporting VHB in working with Green Mountain Power (GMP) on a variety of permitting and compliance tasks including: substation remediation projects for Section 248 certificates issued by the Vermont Public Utility Commission; TSCA/RCRA compliance; SPCC Plans; air compliance monitoring; management of hazardous and PCB wastes; employee hazard waste awareness, SPCC, and other compliance trainings; and FERC license compliance.

Shelburne Road Rotary Construction, Burlington, VT
Zack served as the client contact for the Vermont Agency of Transportation during development and implementation of a soil management plan for the reconstruction of a portion of Shelburne Road passing through multiple known hazardous sites.

East Fairfax Substation Project, Fairfax, VT
Responsible for construction monitoring, project status reporting, and soil sampling during excavation and disposal of PCB contaminated soils. Work was completed in accordance with the approved ABCA/CAP/SIP.

Burlington Amtrack Siding and Station Redevelopment Project, Burlington, VT
Responsible for research, design, and implementation of Environmental Site Assessment reporting through to development of a soil management plan for this linear downtown rail transportation project.

PV-20 Submarine Transmission Cable Replacement Project, Grand Isle, VT
Installation and maintenance of several water quality monitoring buoys, as well as active in-lake water quality monitoring and construction monitoring.

Corrective Action/Remediation, Various Sites
Senior technician and field lead responsible for installation and operation of a variety of active soil and groundwater remediation systems.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

VT RGA LUST	Recovered Government Archive Leaking Underground Storage Tank

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/06/2023 has revealed that there are

2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/20/2023 has revealed that there are 2 US INST CONTROLS sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

VT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Vermont Hazardous Waste Sites List.

A review of the VT SHWS list, as provided by EDR, and dated 10/14/2022 has revealed that there are 37 VT SHWS sites within approximately 1 mile of the target property.

NUCO2 SUPPLY LLC BUR	***#1 INDUSTRIAL PARKWA***	***S 1/8 - 1/4 (0.145 mi.)***	***E42***	***513***
Facility ID: 951791				

Contamination: Diesel, Other, Waste Oil
Project Status:: Hydraulic Oil Recovery Complete, Limited To On-site. 233t of diesel contam soil sent to Waste USA during parking lot rebuild.

316-332 FLYNN AVE ***316-332 FLYNN AVE*** ***ENE 1/8 - 1/4 (0.236 mi.)*** ***G52*** ***591***
Facility ID: 20164636
Contamination: PAH
Project Status:: Phase I Site visit 2/17/2016. Phase II WPCE submitted 1/2017, under review. QAPP approved. CAP public notice (May 18- June 19) and public meeting occurred (June 7), CAP Approved June 20, 2017. CAP implementation underway summer/fall 2017. CAP Report received and reviewed. COC being drafted Sept 2018. COC issued.

CANNON RESIDENCE ***134 FERGUSON AVE*** ***E 1/4 - 1/2 (0.365 mi.)*** ***59*** ***598***
Facility ID: 20063617
Contamination: Heating Oil
Project Status:: Former dry cleaner had triad SI performed with no signficant findings aside from surficial PAHs related to fill. UST closure complete with soil or GW contamination at tank grave. Monitoring results 8/08 showed no VGES violations for MW-1, MW-2 and MW-UST. Request to decommission wells April 2010. Wells closed 2019. SMAC issued Spring 2019. RP did not like liability associated so entered BRELLA in November 2019 to obtain COC.

GENERAL ELECTRIC COM INDUSTRIAL AVENUE S 1/4 - 1/2 (0.414 mi.) 66 653
Facility ID: 770040
Contamination: Heating Oil
Project Status:: Landfarming of soils completed. Groundwater monitoring completed.

EDLUND INDUSTRIES SSW 1/4 - 1/2 (0.428 mi.) 67 653
Facility ID: 880269
Project Status:: Site Closed

FORMER GENERAL DYNAM 266 QUEEN CITY PARK S 1/4 - 1/2 (0.473 mi.) 75 767
Facility ID: 20204979
Project Status:: Former General Dynamics site 770040. Closed in 1998. Concerns raised regarding older investigations not meeting current standards.

YANDOW PROPERTY ***351SHELBURNE ST AND*** ***E 1/4 - 1/2 (0.488 mi.)*** ***M77*** ***768***
Facility ID: 982379
Contamination: Gasoline, Other Petroleum, Waste Oil
Project Status:: Phase 2 Environmental Site Assessment Complete. Groundwater And Soil Impacts By Gasoline Compounds. Requesting Follow-up Investigation. SMAC obtainied 2/1/07October 2006: demolition work coordinated with soil management plan results in stockpile of contaminated soil. Awaiting results.

SEARS ROEBUCK AND CO ***SHELBURNE RD*** ***SE 1/4 - 1/2 (0.498 mi.)*** ***78*** ***769***
Facility ID: 972173
Contamination: Waste Oil
Project Status:: Investigation complete

ENGLESBY BROOK RT 7 ENE 1/2 - 1 (0.504 mi.) N80 771
Facility ID: 931505
Project Status:: Petroleum impact found sampling Englesby Brook at culvert outfall that transported brook beneath main road. An investigation identified several possible sources. Site closed and associated with 20164626 on 11/2/16.

BURLINGTON SUNOCO ***315 SHELBURNE ROAD*** ***ENE 1/2 - 1 (0.522 mi.)*** ***N88*** ***796***
Facility ID: 20164626
Contamination: Chlorinated Solvents, Diesel, Gasoline
Project Status:: UST removal/replacement activities in November 2015 indicate release from former dispensers/piping. Initial site investigation reveals groundwater and surface water contamination attributed to historical USTs. Supplemental site investigations completed in 2017/18/20 to delineate groundwater plume. Quarterly groundwater monitoring requested to establish trends late 2018 through 2019. Scale back to semiannual monitoring Nov 2019 through 2022. 2020 SSI revealed CVOC contamination related to former property use as dry cleaner.

EXECUTIVE SUMMARY

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
WOODAMAN PROPERTY	***8 GOVE COURT***	***NE 1/2 - 1 (0.700 mi.)***	***96***	***814***

Facility ID: 20104056
Contamination: Arsenic, Lead, Other Metals, Waste Oil
Project Status:: Surface contamination encountered during a limited site investigation, which appears to be associated with occasional automobile maintenance at the property. Two oil stained areas were excavated and soils were drummed for disposal. Groundwater monitoring points installed in these areas had no exceedances of VGES for metals, VOCs or TPH following the excavation activity. Arsenic concentrations at this site appear to be related to regional background levels. All properties in the area are served by municipal drinking water. No floor drains were identified in the garage.

BOURNES SERVICE CENT	***760 SHELBURNE RD***	***SE 1/2 - 1 (0.707 mi.)***	***97***	***815***

Facility ID: 982368
Contamination: Diesel, Gasoline
Project Status:: USTs removed, contam found. SMS Requested further investigation 6/14/98 letter to Mr. Bourne, 6/19/00 site investigation report inadequate, Fall 2005 ISI, 6/2009 4 of 6 MWs, 3/2010 & 2011 3 of 6 MWs above VGES, 2018 all MWs below VGES. 8/9/18 SMAC after MW closure, owner wants to wait until site construction is done

CENTURY 21 - FORMER	44 SHELBURNE RD	NE 1/2 - 1 (0.828 mi.)	S105	839

Facility ID: 20204949
Project Status:: Discovered during Shelburne RD Rotary linear project Phase II boring program. Petroleum migration under road but does to reach other side. Current GWM semi-annually. Most wells destroyed during construction. Three 1000 gallons. 3 UST found when parking lot surface was removed April 2022.

FORMER RALPH'S FOREI	***616 S WILLARD ST***	***NE 1/2 - 1 (0.829 mi.)***	***S106***	***840***

Facility ID: 982467
Contamination: Gasoline, Waste Oil
Project Status:: UST removed, contam found ISI done. 11/03, 3/04, 11/04 2 of 3 MWs, 7/2009 2 of 6 MWs, 5/2011, 4/2013 2 of 4 MWs, 4/2015 1 of 4 MWs above VGES. gas station closed, property is now auto rental business. 6/2017 all MWs ND

COUILLARDS AUTO BODY	79 SWIFT ST	SE 1/2 - 1 (0.837 mi.)	T108	841

Facility ID: 20053359
Contamination: Gasoline, Non-Petroleum
Project Status:: Contamination found along property line between VT Gas and Couillards Auto Body Shop. Investigation conducted in 2010 to determine extent of contamination. No significant concentrations of VOCs or PAHs recorded in monitoring wells. No further monitoring necessary. Monitoring wells have been closed.

SHEARER VOLKSWAGEN	***1030 SHELBURNE RD***	***SSE 1/2 - 1 (0.984 mi.)***	***X119***	***871***

Facility ID: 921350
Contamination: Waste Oil
Project Status:: Invest Complete

Project Status:: smac recommended

FORMER WEISSNER PROP LAKESIDE AVE NNE 1/4 - 1/2 (0.440 mi.) K69 654
Facility ID: 770124
Contamination: Gasoline
Project Status:: Inactive

FORMER BELL AIRCRAFT LAKESIDE AVENUE N 1/4 - 1/2 (0.464 mi.) K71 725
Facility ID: 770039
Contamination: Non-Petroleum
Project Status:: Site Considered Part Of General Electric Lakeside Avenue Site

REM DEVELOPMENT - 17 ***175 LAKESIDE AVENUE*** ***NNE 1/4 - 1/2 (0.466 mi.)*** ***L73*** ***762***
Facility ID: 911069
Contamination: Diesel, Gasoline, Other Petroleum, Waste Oil
Project Status:: Property underwent long term ground water monitoring to track petroleum plume. Redevelopment in summer 2011 for Champlain College - Miller Center. Ongoing site work reveals no apparent impact to identified receptors. Site eligible for SMAC. Letter issued 4/20/2012.

GENERAL ELECTRIC COM LAKESIDE AVENUE N 1/4 - 1/2 (0.500 mi.) 79 770
Facility ID: 770041
Contamination: Non-Petroleum
Project Status:: Rcra Corrective Action Permit PendingRCRA correctiuve action permit granted. All work required by permit was completed and the site received a SMAC designation in May 2006

501 PINE ST GATEHOUS ***501 PINE ST GATEHOUS*** ***NNE 1/2 - 1 (0.786 mi.)*** ***102*** ***837***
Facility ID: 20215001
Project Status:: 501 Pine St Gatehouse Lot is within the Pine St Barge Canal Superfund Site, and is a separate lot to the main 501 Pine St Lot.

* PINE STREET BARGE PINE STREET N 1/2 - 1 (0.799 mi.) R103 838
Facility ID: 770042
Contamination: Coal Tar
Project Status:: ROD has been finalized. Consent Decree signed 9/30/99. Remedial design commences fall 99. Cleanup will commence in spring 2001.

MALTEX POND N 1/2 - 1 (0.835 mi.) R107 841
Facility ID: 870035
Project Status:: Site Closed

500 PINE STREET ***500 PINE STREET*** ***NNE 1/2 - 1 (0.850 mi.)*** ***U110*** ***843***
Facility ID: 20164629
Contamination: PAH
Project Status:: Property currently houses the Jackson Terrace Apartment building. Phase I/II ESA completed for potential property transaction. Groundwater exceedance of benzo(a)pyrene in one well on north end of property. Additional groundwater investigation recommended by consultant. Work scope accepted April 2016. Limited contamination detected. SMAC with Notice to Land Record.

453 PINE STREET LLC ***453 PINE ST*** ***NNE 1/2 - 1 (0.874 mi.)*** ***U112*** ***848***

Facility ID: 20043192
Contamination: Coal Tar
Project Status:: Brownfields Project: TarGOST survey was conducted by Stone to delineate the extent of NAPL. Geo-Design and Weston & Sampson have conducted geotechnical surveys of site. These data will be used to allow design of a building that will not affect Pine St remedy. Further work was completed in 2014 -2015 to better refine NAPL extentDraft site construction plan developed in 2015Stone developed and began implementing a groundwater and NAPL monitoring plan in late summer 2015 to develop a baseline to use during construction to determine if construction could be affecting NAPL and or groundwater flow as well as Pine St remedy

BURLINGTON CITY ARTS	***405 PINE STREET***	***NNE 1/2 - 1 (0.936 mi.)***	***W117***	***868***

Facility ID: 20194876
Project Status:: Phase I and II submitted. CAP will be needed for redevelopment.

THE VAULTS 400 PINE	***400 PINE STREET***	***NNE 1/2 - 1 (0.953 mi.)***	***W118***	***870***

Facility ID: 20174708
Contamination: Arsenic, PAH
Project Status:: Site walk for Phase I ESA conducted 5/9/2017. Phase I report finalized May 2017. Work plan for Phase II submitted, reviewed, and re-submitted with revisions. CAP and additional sampling effort submitted (combination). Reviewed, comment letter returned, and revision received 3/23 and second revision 3/29/2018. Public comment period started 3/30/2018. CAP Completion report received 8/2018. Awaiting monitoring well closure report. SMAC updated to newest template in draft phase.

BURLINGTON PUBLIC WO	***PINE ST.***	***N 1/2 - 1 (0.991 mi.)***	***121***	***874***

Facility ID: 992592
Contamination: Waste Oil

Lists of state and tribal leaking storage tanks

VT LAST: Leaking Aboveground Storage.

A review of the VT LAST list, as provided by EDR, and dated 10/14/2022 has revealed that there are 7 VT LAST sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
EXXON OIL TERMINAL	***199 FLYNN AVE***	***NNE 0 - 1/8 (0.039 mi.)***	***B5***	***32***

Facility ID: 870002
Contamination: Other Petroleum
Project Status:: Contamination Limited On Site. Monitoring Ongoing. Trench Installed. Site entered RCPP. Site monitoring requirement continues. ExxonMobil completing addition SSI in source area to consider further cleanup of this area. Meanwhile, GW sampling continues. Continued work on best additional cleanup. More data evaluation to determine if site can be SMACed or if additional corrective action is needed.

SEARS ROEBUCK AND CO	***SHELBURNE RD***	***SE 1/4 - 1/2 (0.498 mi.)***	***78***	***769***

Facility ID: 972173
Contamination: Waste Oil
Project Status:: Investigation complete

HOECHNER/SHELBURNE R	***793 SHELBURNE ROAD***	***SE 1/2 - 1 (0.743 mi.)***	***P98***	***820***

Facility ID: 20154597
Contamination: Gasoline, MTBE
Project Status:: Contamination discovered during UST replacement. A large concrete structure (well) was discovered at the rear of the building. The owner was told when he purchased the property that it was part of an old remedial system. There was fuel/gasoline impacted water found within the well. The well appeared to be acting as an oil/water separator with inlet and outlet pipes. Significant contamination was discovered at the outlet of the system which is on an adjacent property. Gasoline USTs and a fuel oil UST were removed. The replaced gasoline USTs were in good condition and the contaminated soil associated around them appears to be from an old release. The fuel oil UST was in poor condition with significant contamination surrounding the tank near the concrete structure. An ISI is forthcoming.2018 - ISI, soil gas and sub slab work conducted around site and in potentially impacted apartment building. A confirmatory subslab sampling in apartment building and full GW Monitoring event to occur in 2019. Confirmatory samplin

Lower Elevation	Address	Direction / Distance	Map ID	Page
BOOSKA MOVERS	***180 FLYNN AVE***	***NNE 0 - 1/8 (0.046 mi.)***	***B12***	***50***

Facility ID: 20053376
Contamination: Diesel
Project Status:: Dispenser leak to gravel parking lot. Some migration to Inglesby Brook. Booms and pads in stream swept away in heavy rainfall. EP&S re-deployed boom and collected used material. GW investigation showed low levels of VOC contamination. GWESs met. MWs abandoned.

GLOBAL COMPANIES LLC	***2 FLYNN AVENUE***	***WNW 0 - 1/8 (0.115 mi.)***	***D31***	***134***

Facility ID: 870175
Contamination: Gasoline
Project Status:: Corrective Action Complete. Contaminated soils require treatment and disposal. Ongoing monitoring of low level contaminated groundwater ongoing.

BARRETT'S TRUCKING	***10 AMBROSE PLACE***	***S 0 - 1/8 (0.004 mi.)***	***3***	***29***

Contamination: Chlorinated Solvents, Diesel, Gasoline
Project Status: smac recommended
Facility Id: 20164618

207 FLYNN AVE	***207 FLYNN AVE***	***NE 0 - 1/8 (0.046 mi.)***	***B14***	***55***

Contamination: Heating Oil
Project Status: Site Management Activities Complete for this site number. Please see site 2016-4619 for most recent activities at this site.
Facility Id: 931521
Closure Date: 08/25/2016

BARRETT TRUJCKING CO	***16 AUSTIN DRIVE***	***S 0 - 1/8 (0.125 mi.)***	***E39***	***500***

Project Status: Ust Removal. Stockpiled Soils. NFAP
Facility Id: 921232
Closure Date: 01/01/1994

NUCO2 SUPPLY LLC BUR	***#1 INDUSTRIAL PARKWA***	***S 1/8 - 1/4 (0.145 mi.)***	***E42***	***513***

Contamination: Diesel, Other, Waste Oil
Project Status: Hydraulic Oil Recovery Complete, Limited To On-site. 233t of diesel contam soil sent to Waste USA during parking lot rebuild.
Facility Id: 951791
Closure Date: 04/01/1997

CANNON RESIDENCE	***134 FERGUSON AVE***	***E 1/4 - 1/2 (0.365 mi.)***	***59***	***598***

Contamination: Heating Oil
Project Status: Former dry cleaner had triad SI performed with no signficant findings aside from surficial PAHs related to fill. UST closure complete with soil or GW contamination at tank grave. Monitoring results 8/08 showed no VGES violations for MW-1, MW-2 and MW-UST. Request to decommission wells April 2010. Wells closed 2019. SMAC issued Spring 2019. RP did not like liability associated so entered BRELLA in November 2019 to obtain COC.
Facility Id: 20063617

YANDOW PROPERTY	***351SHELBURNE ST AND***	***E 1/4 - 1/2 (0.488 mi.)***	***M77***	***768***

Contamination: Gasoline, Other Petroleum, Waste Oil
Project Status: Phase 2 Environmental Site Assessment Complete. Groundwater And Soil Impacts By Gasoline Compounds. Requesting Follow-up Investigation. SMAC obtainied 2/1/07October 2006: demolition work coordinated with soil management plan results in stockpile of contaminated soil. Awaiting results.
Facility Id: 982379
Closure Date: 02/01/2007

SEARS ROEBUCK AND CO	***SHELBURNE RD***	***SE 1/4 - 1/2 (0.498 mi.)***	***78***	***769***

Contamination: Waste Oil
Project Status: Investigation complete
Facility Id: 972173
Closure Date: 08/01/1998

HEINDEL AND NOYES OF	434 SHELBURNE RD	E 1/2 - 1 (0.504 mi.)	81	771

Contamination: Heating Oil
Project Status: 1000 gal fuel oil underground storage tank removed in December 2001. Supplemental investigation revealed little to no contamination. Monitoring wells will be maintained by site owner. SMAC.
Facility Id: 20022957
Closure Date: 09/17/2002

LIBERTY INN AND SUIT	462 SHELBURNE ROAD	ESE 1/2 - 1 (0.505 mi.)	82	772

Contamination: Other Petroleum
Project Status: Phase II submitted. Soil impacts evident from past gasoline operations. Site investigation not complete, addtional characterization required.
Facility Id: 20134423
Closure Date: 06/18/2015

FORMER DON COBB'S QU	521 SHELBURNE RD.	ESE 1/2 - 1 (0.509 mi.)	O83	773

Contamination: Gasoline
Project Status: Contamination Discovered During Ust Removal. Current owner is conducting necessary investigation work to determine degree and extent of contamination at the site.
Facility Id: 900491

FORMER PANDA INN	380 SHELBURNE RD	E 1/2 - 1 (0.510 mi.)	M84	773

Contamination: Heating Oil
Project Status: Contamination discovered during the removal of a heating oil UST. After the excavation of contaminated soil, it appeared that the full extent of contamination had been delineated. No groundwater was encountered during the excavation activities. A confirmatory soil sample from the excavation showed no detection of petroleum contaminants. This site is served by the municipal drinking water system. Contaminated soils were disposed of at ESMI in NH.
Facility Id: 20083756
Closure Date: 02/06/2008

SHERWIN-WILLIAMS PLA	370-374 SHELBURNE RD	E 1/2 - 1 (0.511 mi.)	M85	774

Contamination: Heating Oil
Project Status: Investigation Complete, Soil Asphalt Batched,site Closed
Facility Id: 921198
Closure Date: 01/01/1993

KAIGLES CITGO	***510 SHELBURNE RD***	***ESE 1/2 - 1 (0.515 mi.)***	***O86***	***774***

Contamination: Gasoline
Project Status: Groundwater monitoring was initiated at this site in January 1993 due to a detection of light non-aqueous phase liquid (LNAPL) in an on-site monitoring well in 1992 and detection of residual petroleum impact to soils during underground storage tank (UST) removal in 1992.Groundwater monitoring was performed on an annual basis from 1995 through early 2002 andquarterly monitoring was conducted in mid-2002. Five monitoring wells were installed in July 2003 to replace the existing tank pit monitoring wells at the site. Quarterly groundwater monitoring was re-initiated in July 2003. The sampling frequency was decreased to semiannual in 2004, and to annual in 2007. The tank pit monitoring wells MW-1 through MW-6 were abandoned in April 2004. Currently, annual Gw Monitoring is ongoing, with the next sampling event occuring in Spring, 2012.
Facility Id: 921298

BEN FRANKLIN/SEAWAY | 518 SHELBURNE RD | ESE 1/2 - 1 (0.518 mi.) | O87 | 795
Contamination: Gasoline, Heating Oil
Project Status: Petroleum contamination present. Construction activities are occurring at the site including soil removeal. Consultant is developing an update on the status of the construction activities, soil removal, etc. Monitoring wells will need to be replaced following construction.
Facility Id: 20033073

BURLINGTON SUNOCO | 315 SHELBURNE ROAD | ENE 1/2 - 1 (0.522 mi.) | N88 | 796
Contamination: Chlorinated Solvents, Diesel, Gasoline
Project Status: UST removal/replacement activities in November 2015 indicate release from former dispensers/piping. Initial site investigation reveals groundwater and surface water contamination attributed to historical USTs. Supplemental site investigations completed in 2017/18/20 to delineate groundwater plume. Quarterly groundwater monitoring requested to establish trends late 2018 through 2019. Scale back to semiannual monitoring Nov 2019 through 2022. 2020 SSI revealed CVOC contamination related to former property use as dry cleaner.
Facility Id: 20164626

BURLINGTON SCHOOL DI | 287 SHELBURNE ROAD | ENE 1/2 - 1 (0.536 mi.) | N89 | 810
Project Status: Site Assessment Complete. No Impact To Gw Above Standards
Facility Id: 921264
Closure Date: 10/22/1992

A O T SOUTHERN CONNE | SSE 1/2 - 1 (0.541 mi.) | 90 | 811
Project Status: Site Closed
Facility Id: 870121
Closure Date: 01/09/1998

SEAWAY CARWASH | ESE 1/2 - 1 (0.576 mi.) | 91 | 811
Project Status: Site Closed
Facility Id: 890297

KAIGLES SMALL CITGO | 210 SHELBURNE ROAD | ENE 1/2 - 1 (0.617 mi.) | 92 | 812
Contamination: Gasoline
Project Status: Petroleum contamination originated from UST piping, which was replaced in December, 1998. Groundwater was sampled over time and no longer contains petroleum contaminaiton at levels which are in excess of standards. All monitoring wells were properly abandoned. No drinking water supply wells in the area.
Facility Id: 992579
Closure Date: 06/19/2008

BILMAR TEAM CLEANERS | 150 SHELBURNE RD. | NE 1/2 - 1 (0.682 mi.) | 94 | 812
Contamination: Gasoline
Project Status: Property has long history as a gas/service station dating back to the early 1900's. Several UST configurations have existed through the years. Last gas station exploded in 1972- property turned into residential use following this event. Phase II at the site found extensive petroleum contamination at the site. Groundwater monitoring conducted periodically from late nineties-2007. Most recent monitoring event was completed during Summer, 2007. Contaminant concentrations near the property boundary exceed the VT Groundwater Enforcement Standards in two wells. Gasoline contamination does not appear to have impacted the areas surrounding the onsite rental unit. Ongoing monitoring required at this site to track contaminant levels. Downgradient points need to be established to determine extent of groundwater contamination. Some contamination may exist below Route 7 (Shelburne Rd).

Facility Id: 941631

FORMER CLUB NEW ENGL | 410 FARRELL ST | ESE 1/2 - 1 (0.692 mi.) | 95 | 813

Contamination: Heating Oil
Project Status: Underground srtorage tank found during excavation work. Tank removed, contamination found. Folllowing removal of contaminated soils, two composite soil samples were collected from the tank grave. No VOCs or total petroleum hydrocarbons were detected. All surrounding properties served by municipal utilities. Groundwater not encountered to a depth of 6 feet below grade.
Facility Id: 20063502
Closure Date: 03/31/2006

BOURNES SERVICE CENT | ***760 SHELBURNE RD*** | ***SE 1/2 - 1 (0.707 mi.)*** | ***97*** | ***815***

Contamination: Diesel, Gasoline
Project Status: USTs removed, contam found. SMS Requested further investigation 6/14/98 letter to Mr. Bourne, 6/19/00 site investigation report inadequate, Fall 2005 ISI, 6/2009 4 of 6 MWs, 3/2010 & 2011 3 of 6 MWs above VGES, 2018 all MWs below VGES. 8/9/18 SMAC after MW closure, owner wants to wait until site construction is done
Facility Id: 982368

HOECHNER/SHELBURNE R | ***793 SHELBURNE ROAD*** | ***SE 1/2 - 1 (0.743 mi.)*** | ***P98*** | ***820***

Contamination: Gasoline, MTBE
Project Status: Contamination discovered during UST replacement. A large concrete structure (well) was discovered at the rear of the building. The owner was told when he purchased the property that it was part of an old remedial system. There was fuel/gasoline impacted water found within the well. The well appeared to be acting as an oil/water separator with inlet and outlet pipes. Significant contamination was discovered at the outlet of the system which is on an adjacent property. Gasoline USTs and a fuel oil UST were removed. The replaced gasoline USTs were in good condition and the contaminated soil associated around them appears to be from an old release. The fuel oil UST was in poor condition with significant contamination surrounding the tank near the concrete structure. An ISI is forthcoming.2018 - ISI, soil gas and sub slab work conducted around site and in potentially impacted apartment building. A confirmatory subslab sampling in apartment building and full GW Monitoring event to occur in 2019. Confirmatory samplin
Facility Id: 20154597

DATTILOS SUNOCO | ***794 SHELBURNE RD*** | ***SE 1/2 - 1 (0.747 mi.)*** | ***P99*** | ***824***

Contamination: Gasoline, MTBE
Project Status: Contaminated soil stockpiled. Groundwater onsite above GWESs. Annual monitoring ongoing in 3 site MWs..
Facility Id: 982490

ROTARY MART | ***103 SHELBURNE ROAD*** | ***NE 1/2 - 1 (0.753 mi.)*** | ***Q100*** | ***827***

Contamination: Gasoline
Project Status: Limited GW contamination discovered. Site in Natural Attenuation monitoring. GWESs met on site. MWs closed. Site assigned SMAC designation on September 12, 2005. 2019 UST closure release assessment identified MTBE persists in GW at concentrations above VGES. Site reopened and SSI to evaluate impacts to offsite properties requested.
Facility Id: 982527

ROTARY GULF | ***82 SHELBURNE ROAD*** | ***NE 1/2 - 1 (0.774 mi.)*** | ***Q101*** | ***833***

Contamination: Gasoline
Project Status: 08/21: CAP finalized for excavation. Soil removal, approximately 800 cubic yards. Soil removal expected to take place in late August as part of ongoing Route 7 Rotary Replacement Project.
Facility Id: 890386

FORMER RALPH'S FOREI | ***616 S WILLARD ST*** | ***NE 1/2 - 1 (0.829 mi.)*** | ***S106*** | ***840***

Contamination: Gasoline, Waste Oil
Project Status: UST removed, contam found ISI done. 11/03, 3/04, 11/04 2 of 3 MWs, 7/2009 2 of 6 MWs, 5/2011, 4/2013 2 of 4 MWs, 4/2015 1 of 4 MWs above VGES. gas station closed, property is now auto rental business. 6/2017 all MWs ND

Facility Id: 982467
Closure Date: 01/22/2019

HANNAFORDS | 929 SHELBURNE RD | SSE 1/2 - 1 (0.843 mi.) | 109 | 842
Contamination: Heating Oil
Project Status: Contamination discovered during the removal an abandoned UST from the parking lot. Four monitoring wells installed at the property. No significant contamination encountered in any of the monitoring wells. Water is supplied by the municipal system. Monitoring wells properly abandoned.
Facility Id: 20083860
Closure Date: 02/26/2010

VERMONT GAS SYSTEMS, | ***85 SWIFT STREET*** | ***SE 1/2 - 1 (0.850 mi.)*** | ***T111*** | ***844***
Contamination: Gasoline
Project Status: UST removed. Contamination found. Investigation completed. 12/18/01 1 MW above VGES for MTBE, 2 MWs below VGES, 1 MW ND. 2 MWs @ 42 ppb MTBE, SMAC
Facility Id: 20012932
Closure Date: 12/01/2008

SIMONS SHELBURNE ROA | ***974 SHELBURNE RD*** | ***SSE 1/2 - 1 (0.893 mi.)*** | ***V113*** | ***849***
Contamination: Gasoline
Project Status: Site is contaminated from gasoline retail operations. Site is being monitoring on an annual basis. Additional wells needed to the NW to further identify extent of contamination. Monitoring planned for summer 2016. Also see Closed Site 870153.
Facility Id: 992719

SHELBURNE RD JOLLEY | ***977 SHELBURNE ROAD*** | ***SSE 1/2 - 1 (0.895 mi.)*** | ***V114*** | ***858***
Contamination: Gasoline
Project Status: Petroleum release from historic underground storage tanks discovered in 1994. 2003 corrective action plan included the removal of petroleum contaminated soils. Ongoing long term monitoring showing stable to declining contaminant concentrations. Groundwater monitoring on semi-annually for VOCs. Next site monitoring fall 2021.
Facility Id: 941589

CUMBERLAND FARMS | SSE 1/2 - 1 (0.900 mi.) | V115 | 867

Facility Id: 870153

POULOS PROPERTY | ***4 LAUREL HILL ROAD*** | ***SSE 1/2 - 1 (0.929 mi.)*** | ***V116*** | ***867***
Contamination: Heating Oil
Project Status: Underground storage tank release. Tank abandoned 20 years ago. Rainwater filled lines forcing out oil. EPS hired to pump tank out. Indoor air impacts were noted initially, but quickly dissipated. Soils excavated and stockpiled, but were backfilled. Initial site investigation was completed, but report not finished as owner didn't pay the consultant. Additional samples needed from groundwater monitoring wells to confirm compliance with groundwater enforcement standards. Notice to the Land Record will be required to address residual soil contamination prior to site closure.
Facility Id: 20073645

SHEARER VOLKSWAGEN | ***1030 SHELBURNE RD*** | ***SSE 1/2 - 1 (0.984 mi.)*** | ***X119*** | ***871***

GLOBAL COMPANIES LLC	***2 FLYNN AVENUE***	***WNW 0 - 1/8 (0.115 mi.)***	***D31***	***134***

Contamination: Gasoline
Project Status: Corrective Action Complete. Contaminated soils require treatment and disposal. Ongoing monitoring of low level contaminated groundwater ongoing.
Facility Id: 870175

KAIGLES CITGO INC DB ***53 SEARS LANE*** ***NNE 1/4 - 1/2 (0.255 mi.)*** ***53*** ***592***
Contamination: Heating Oil, Other Petroleum, Waste Oil
Project Status: Petroleum contamination from two underground storage tanks. Ongoing monitoring reveals declining contaminant plume. Biennial site monitoring with next by June 2023. Based on results, evaluate for SMAC.
Facility Id: 941740

NOYES AUTOMOTIVE AND ***777 PINE STREET*** ***NE 1/4 - 1/2 (0.292 mi.)*** ***56*** ***594***
Contamination: Heating Oil
Project Status: Contamination encountered during removal of two heating oil USTs. Additional work needed to determine extent of contamination. Initial Site Investigation performed summer 2015, supports SMAC upon well closure.
Facility Id: 20144505
Closure Date: 02/10/2020

BURLINGTON FOOD SERV PINE ST. NE 1/4 - 1/2 (0.322 mi.) H57 595
Project Status: Site Closed
Facility Id: 890383

REINHART FOODSERVICE ***747 PINE STREET*** ***NE 1/4 - 1/2 (0.355 mi.)*** ***H58*** ***596***
Contamination: Heating Oil
Project Status: One fuel oil UST closed July 2008. ISI conducted January 2009, two MWs contained TPH in excess of 1,000 mg/kg. No sensitive receptors effected. Additional groundwater monitoring conducted May 2009. No petroleum VOCs in excess of VGES, no TPH in excess of action level.
Facility Id: 20083804
Closure Date: 07/29/2009

SWISH FACILITY ***703 PINE ST*** ***NE 1/4 - 1/2 (0.391 mi.)*** ***I61*** ***632***
Contamination: Gasoline, Heating Oil
Project Status: Contamination discovered during the closure of a heating oil UST. It was originally speculated that there had been a gasoline release in the vicinity of the UST due to high PID readings, but the VOC analysis indicated a profile similar to heating oil. Investigation at this site included a boring into a sump in the warehouse floor. No elevated VOCs were encountered during the installation of this boring. Napthalene remains slightly above the VGES in the vicinity of the heating oil UST, but has declined steadily over three sampling events. No elevated PIDs recorded from the indoor air screening event. This property and all adjacent properties are served by the municipal drinking water system.
Facility Id: 20073730
Closure Date: 05/06/2008

FORMER MAYNARD AUTO 696 PINE ST NNE 1/4 - 1/2 (0.412 mi.) I62 634

Lists of state and tribal registered storage tanks

VT UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's State of Vermont Underground Storage Tank Database.

A review of the VT UST list, as provided by EDR, and dated 01/30/2023 has revealed that there are 10 VT UST sites within approximately 0.25 miles of the target property.

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program,

which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 04/06/2023 has revealed that there are 7 US BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS RCRA MANIFEST: To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

A review of the PFAS RCRA MANIFEST list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS RCRA MANIFEST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants

(manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BURLINGTON LIGHT AND	PINE STREET	NNE 1/2 - 1 (0.652 mi.)	93	812

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at listing October 1981): The Pine Street Canal Site covers 30 acres of partially filled wetland bordering an abandoned shipping canal Pine Street Canal) and Lake Champlain in Burlington, Vermont. In 1906, a coal gasification plant began operating on Pine Street, southeast of the canal. There is evidence that residual oil and wood chips saturated with organic compounds were disposed of in the Pine Street Canal wetland. During the 1960s and early 1970s, an oil-like material was detected seeping from the wetland into Pine Street Canal, Barnes Basin, and Maltex Pond. The State detected high levels of organic compounds associated with coal tar at several locations on the site, which is along the proposed location of a portion of a major highway. The State is concerned that construction will release organic compounds to the canal and possibly to Lake Champlain, the source of Burlington s drinking water. This is the top priority site in Vermont. Status July 1983): EPA is preparing a Remedial Action Master Plan outlining the investigations needed to determine the full extent of cleanup required at the site. At the same time, it is searching for parties potentiallyresponsiblefor wastes associated with the site.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Comments:	Appears to be older release or has occurred slowly over time. Current tenant is landscaper, but unknown if they own the drums and pails discovered. Drum overflow has stained an area approximately 6-8' x 20' according to EP&S.
Action:	EP&S retained for cleanup. Containerized the wastes that were exposed to elements. Soil excavation completed week of 6/10/19.

US BROWNFIELDS:

Name:	CITY MARKET
Address:	207 FLYNN AVENUE
Recipient name:	Chittenden County Regional Planning Commission
Grant type:	Assessment
Region:	1
Property Number:	057-2-122-000
Parcel size:	4.49
Latitude:	44.4554097
Longitude:	-73.2183953
HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported
Highlights:	The Site encompasses five former parcels. According to historical documentation (Section 6.4), the Site has been in industrial use since at least 1880. Past uses have included: steel and iron foundering, metal machining, truck and heavy equipment maintenance, petroleum storage, bulk oil storage and distribution, a taxi service and vehicle maintenance business, electrical contracting, and brass foundering and ?japanning? (applying lacquer or enamel to metals). A grocery store has been constructed and opened in November 2017. Former Use: The overall Site is a 4.494 acre parcel of property owned by Vermont Railway, Inc. (VT Railway) that includes ten buildings. Six buildings on the Site were most recently leased to Barrett?s Trucking, which used the facilities for salt and equipment storage. Other recent tenants include a wood reclamation shop, a roofing contractor, an antique dealer, and a general contractor. With the exception of the southern portion of the largest salt shed (Building #6), all buildings are currently vacant having recently had asbestos abatement activities completed. City Market (Onion River Cooperative) intends to purchase the Site to allow for redevelopment of the northernmost 2.81 acres of the Site as a cooperative grocery store. The remaining 1.684 acres will be subdivided from the proposed grocery store property to be developed along its own trajectory. Remediation of the Site is required to prevent exposure of future Site users to Site contaminants.

Property Number:	057-2-122-000
Parcel size:	4.49
Latitude:	44.4554097
Longitude:	-73.2183953
HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported
Highlights:	The Site encompasses five former parcels. According to historical documentation (Section 6.4), the Site has been in industrial use since at least 1880. Past uses have included: steel and iron foundering, metal machining, truck and heavy equipment maintenance, petroleum storage, bulk oil storage and distribution, a taxi service and vehicle maintenance business, electrical contracting, and brass foundering and ?japanning? (applying lacquer or enamel to metals). A grocery store has been constructed and opened in November 2017. Former Use: The overall Site is a 4.494 acre parcel of property owned by Vermont Railway, Inc. (VT Railway) that includes ten buildings. Six buildings on the Site were most recently leased to Barrett?s Trucking, which used the facilities for salt and equipment storage. Other recent tenants include a wood reclamation shop, a roofing contractor, an antique dealer, and a general contractor. With the exception of the southern portion of the largest salt shed (Building #6), all buildings are currently vacant having recently had asbestos abatement activities completed. City Market (Onion River Cooperative) intends to purchase the Site to allow for redevelopment of the northernmost 2.81 acres of the Site as a cooperative grocery store. The remaining 1.684 acres will be subdivided from the proposed grocery store property to be developed along its own trajectory. Remediation of the Site is required to prevent exposure of future Site users to Site contaminants.

Property Number:	057-2-122-000
Parcel size:	4.49
Latitude:	44.4554097
Longitude:	-73.2183953
HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported
Highlights:	The Site encompasses five former parcels. According to historical documentation (Section 6.4), the Site has been in industrial use since at least 1880. Past uses have included: steel and iron foundering, metal machining, truck and heavy equipment maintenance, petroleum storage, bulk oil storage and distribution, a taxi service and vehicle maintenance business, electrical contracting, and brass foundering and ?japanning? (applying lacquer or enamel to metals). A grocery store has been constructed and opened in November 2017. Former Use: The overall Site is a 4.494 acre parcel of property owned by Vermont Railway, Inc. (VT Railway) that includes ten buildings. Six buildings on the Site were most recently leased to Barrett?s Trucking, which used the facilities for salt and equipment storage. Other recent tenants include a wood reclamation shop, a roofing contractor, an antique dealer, and a general contractor. With the exception of the southern portion of the largest salt shed (Building #6), all buildings are currently vacant having recently had asbestos abatement activities completed. City Market (Onion River Cooperative) intends to purchase the Site to allow for redevelopment of the northernmost 2.81 acres of the Site as a cooperative grocery store. The remaining 1.684 acres will be subdivided from the proposed grocery store property to be developed along its own trajectory. Remediation of the Site is required to prevent exposure of future Site users to Site contaminants.

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002

ENVIRONMENTAL PRODUCTS & SVCS OF VT INC (Continued) **1004792899**

Waste Description: CORROSIVE WASTE

Waste Code: D008
Waste Description: LEAD

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

US BROWNFIELDS:
Name: HOWARD CENTER FOR ADMINISTRATIVE SERVICES
Address: 300 FLYNN AVENUE
Recipient name: Chittenden County Regional Planning Commission
Grant type: Assessment
Region: 1
Property Number: Not reported
Parcel size: 2.19
Latitude: 44.45583798
Longitude: -73.21485596
HCM Label: Not reported
Map Scale: Not reported
Point of Reference: Not reported
Highlights: Current use is office use by Howard Center to serve clients. Two buildings were constructed in the early 1960s and later connected in the mid-1980s. The buildings were also used as a convent and offices for various companies. Prior to constrution of these buildings the property was open and part of the Englesby Farm. The current plan is to raze the existing 22,000 square foot building and construct a new approximately 45,000 square foot building with basement level parking

Name:	HOWARD CENTER FOR ADMINISTRATIVE SERVICES
Address:	300 FLYNN AVENUE

HOWARD CENTER FOR ADMINISTRATIVE SERVICES (Continued) **1027559198**

Recipient name:	Chittenden County Regional Planning Commission
Grant type:	Assessment
Region:	1
Property Number:	Not reported
Parcel size:	2.19
Latitude:	44.45583798
Longitude:	-73.21485596
HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported
Highlights:	Current use is office use by Howard Center to serve clients. Two buildings were constructed in the early 1960s and later connected in the mid-1980s. The buildings were also used as a convent and offices for various companies. Prior to constrution of these buildings the property was open and part of the Englesby Farm. The current plan is to raze the existing 22,000 square foot building and construct a new approximately 45,000 square foot building with basement level parking

Relative: **Higher**

Actual: **166 ft.**

US BROWNFIELDS:

Name:	316 FLYNN AVENUE
Address:	316 FLYNN AVENUE
Recipient name:	Vermont Agency of Commerce and Community Development
Grant type:	BCRLF
Region:	1
Property Number:	976-338
Parcel size:	0.61
Latitude:	44.4556987
Longitude:	-73.2139588
HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported
Highlights:	The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. The site is in an urban location adjacent to a major road and presumed to contain urban soils contaminated with elevated levels of PAH. A previous owner is know to have repaired engines in the garage and oil/solvents contamination is possible (stained concrete noted). Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use building in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking,with upper apartments. Former Use: The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use buidling in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking, with upper apartments.

There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use buidling in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking, with upper apartments.

Highlights:	The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. The site is in an urban location adjacent to a major road and presumed to contain urban soils contaminated with elevated levels of PAH. A previous owner is know to have repaired engines in the garage and oil/solvents contamination is possible (stained concrete noted). Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use building in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking,with upper apartments. Former Use: The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use buidling in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking, with upper apartments.

Former Use: The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use buidling in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade,

Highlights:	The property consists of an existing 2,736 SF convenience store & an adjacent 2,242 SF triplex. There is also a vacant garage formerly used as a bottle/can redemption center and historically used for engine repair. The site is in an urban location adjacent to a major road and presumed to contain urban soils contaminated with elevated levels of PAH. A previous owner is know to have repaired engines in the garage and oil/solvents contamination is possible (stained concrete noted). Site cleanup would enable significant additional housing and retention of existing commercial space through development of a single mixed-use building in an area planned for mixed-use development by the municipality and region. The proposed new building will contain ground floor commercial space and at-grade, under-building parking,with upper apartments. Record Last Update: 06/28/2022
Project Status: Former dry cleaner had triad SI performed with no signficant findings aside from surficial PAHs related to fill. UST closure complete with soil or GW contamination at tank grave. Monitoring results 8/08 showed no VGES violations for MW-1, MW-2 and MW-UST. Request to decommission wells April 2010. Wells closed 2019. SMAC issued Spring 2019. RP did not like liability associated so entered BRELLA in November 2019 to obtain COC.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F003

GENERAL ELECTRIC CO A&ESD (Continued) **1000443648**

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: U161
Waste Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Institutional Control:	Not reported
Record Last Update:	11/16/2007

SWISH FACILITY (Continued) **S108762437**

Project Status: Contamination discovered during the closure of a heating oil UST. It was originally speculated that there had been a gasoline release in the vicinity of the UST due to high PID readings, but the VOC analysis indicated a profile similar to heating oil. Investigation at this site included a boring into a sump in the warehouse floor. No elevated VOCs were encountered during the installation of this boring. Napthalene remains slightly above the VGES in the vicinity of the heating oil UST, but has declined steadily over three sampling events. No elevated PIDs recorded from the indoor air screening event. This property and all adjacent properties are served by the municipal drinking water system.

Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

GENERAL DYNAMICS ARMAMENT & TECH PRODUCT (Continued) **1000212317**

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009

GENERAL DYNAMICS ARMAMENT & TECH PRODUCT (Continued) **1000212317**

Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F010
Waste Description: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F017
Waste Description: Not Defined

Waste Code: F018
Waste Description: Not Defined

Waste Code: U121
Waste Description: METHANE, TRICHLOROFLUORO- (OR) TRICHLOROMONOFLUOROMETHANE

Waste Code: U219
Waste Description: THIOUREA

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	A CFI gas technician was on site to address an issue with the digital pump topper price sign and found a light drip of product from the RUL line secondary. There was minimal accumulation of product in the under dispenser containment which the tech was able to remove with an absorbent pad
Action:	The RUL STP was shut down and Tanknology was dispatched to perform an emergency line test. Tanknology verified the line leak yesterday afternoon and the RUL STP remains down pending repairs.

KAIGLES CITGO (Continued) **1001969436**

Institutional Control:	Not reported
Record Last Update:	07/13/2022
Project Status:	Groundwater monitoring was initiated at this site in January 1993 due to a detection of light non-aqueous phase liquid (LNAPL) in an on-site monitoring well in 1992 and detection of residual petroleum impact to soils during underground storage tank (UST) removal in 1992.Groundwater monitoring was performed on an annual basis from 1995 through early 2002 andquarterly monitoring was conducted in mid-2002. Five monitoring wells were installed in July 2003 to replace the existing tank pit monitoring wells at the site. Quarterly groundwater monitoring was re-initiated in July 2003. The sampling frequency was decreased to semiannual in 2004, and to annual in 2007. The tank pit monitoring wells MW-1 through MW-6 were abandoned in April 2004. Currently, annual Gw Monitoring is ongoing, with the next sampling event occuring in Spring, 2012.

Action:	S. Burl. FD responded and put down speedi dri and sorbent. They double

KAIGLES CITGO (Continued) **1001969436**

bagged waste and put in garbage can for TMC to pickup next morning. Though they didn't believe anything reached the catchbasin, the FD also put sorbent at outfall at brook as a precaution. Brian Ouellette of TMC (839-0624) emailed update after morning inspection to state cleanup was thorough with no impact to catchbasin.

Hazardous Waste Summary:

Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	F037
Waste Description:	PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Address:	315 SHELBURNE ROAD
City,State,Zip:	BURLINGTON, VT
Facility ID:	20164626
Source Type:	Dry Cleaners
Priority:	MED - Site with sensitive receptors that are threatened by contamination
Staff:	James Donaldson
Closure Date:	Not reported
Site Use:	Commercial - Retail
site Status:	Voluntary Action
Contamination:	Chlorinated Solvents, Diesel, Gasoline
Institutional Control:	Not reported
Record Last Update:	06/20/2022
Project Status:	UST removal/replacement activities in November 2015 indicate release from former dispensers/piping. Initial site investigation reveals groundwater and surface water contamination attributed to historical USTs. Supplemental site investigations completed in 2017/18/20 to delineate groundwater plume. Quarterly groundwater monitoring requested to establish trends late 2018 through 2019. Scale back to semiannual monitoring Nov 2019 through 2022. 2020 SSI revealed CVOC contamination related to former property use as dry cleaner.

Comments:	Test pitting to prep for dewatering but no GW. Found elevated PID readings. Smelled like asphalt shingles, not gasoline or diesel.
Action:	113ppm at 10ft bgs and 40ppm at 16ft bgs by PID.

BILMAR TEAM CLEANERS (Continued) **S103452087**

Site Status:	Not reported
Contamination:	Gasoline
Institutional Control:	Not reported
Record Last Update:	12/12/2019
Project Status:	Property has long history as a gas/service station dating back to the early 1900's. Several UST configurations have existed through the years. Last gas station exploded in 1972- property turned into residential use following this event. Phase II at the site found extensive petroleum contamination at the site. Groundwater monitoring conducted periodically from late nineties-2007. Most recent monitoring event was completed during Summer, 2007. Contaminant concentrations near the property boundary exceed the VT Groundwater Enforcement Standards in two wells. Gasoline contamination does not appear to have impacted the areas surrounding the onsite rental unit. Ongoing monitoring required at this site to track contaminant levels. Downgradient points need to be established to determine extent of groundwater contamination. Some contamination may exist below Route 7 (Shelburne Rd).

Project Status: Underground srtorage tank found during excavation work. Tank removed, contamination found. Folllowing removal of contaminated soils, two composite soil samples were collected from the tank grave. No VOCs or total petroleum hydrocarbons were detected. All surrounding properties served by municipal utilities. Groundwater not encountered to a depth of 6 feet below grade.

Name: WOODAMAN PROPERTY
Address: 8 GOVE COURT
City,State,Zip: BURLINGTON, VT
Facility ID: 20104056
Source Type: Spill
Priority: SMAC - Site Management Activities Completed
Staff: Ashley Desmond
Closure Date: 09/07/2010
Site Use: Garage
site Status: Voluntary Action
Contamination: Arsenic, Lead, Other Metals, Waste Oil
Institutional Control: Not reported
Record Last Update: 09/09/2010
Project Status: Surface contamination encountered during a limited site investigation, which appears to be associated with occasional automobile maintenance at the property. Two oil stained areas were excavated and soils were drummed for disposal. Groundwater monitoring points installed in these areas had no exceedances of VGES for metals, VOCs or TPH following the excavation activity. Arsenic concentrations at this site appear to be related to regional background levels. All properties in the area are served by municipal drinking water. No floor drains were identified in the garage.

Staff: Lisandro Suarez
Source: UST-Gasoline
Site Use: Garage
Site Status: Voluntary Action
Contamination: Gasoline, MTBE
Institutional Control: Not reported
Record Last Update: 08/25/2022
Project Status: Contamination discovered during UST replacement. A large concrete structure (well) was discovered at the rear of the building. The owner was told when he purchased the property that it was part of an old remedial system. There was fuel/gasoline impacted water found within the well. The well appeared to be acting as an oil/water separator with inlet and outlet pipes. Significant contamination was discovered at the outlet of the system which is on an adjacent property. Gasoline USTs and a fuel oil UST were removed. The replaced gasoline USTs were in good condition and the contaminated soil associated around them appears to be from an old release. The fuel oil UST was in poor condition with significant contamination surrounding the tank near the concrete structure. An ISI is forthcoming.2018 - ISI, soil gas and sub slab work conducted around site and in potentially impacted apartment building. A confirmatory subslab sampling in apartment building and full GW Monitoring event to occur in 2019. Confirmatory sampling in subslab vapors are low however above SSVs therefore indoor air sampling will be occur.2021 - additional VI work being conducted. SSD pilot test failed - materials under building are unknown; ECAA expected 2/21. Site across RTE 7 (Datilios) is contributing some contamination to the upper portion of the site. Site cleanup work should start 2021.Delays/misunderstanding regarding South Burlington zoning has pushed site work into 2022. CAP for source will be written over the winter and corrective action on and offsite will occur in 2022.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SIMONS SHELBURNE ROAD (Continued) **1004793017**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Address:	4 LAUREL HILL ROAD
City,State,Zip:	SOUTH BURLINGTON, VT
Facility ID:	20073645
Source:	UST-Heating Oil
Closure Date:	Not reported
Priority:	LOW - Site with contamination to soils or groundwater, but no effect on sensitive receptors
Staff:	Shawn Donovan
Source:	UST-Heating Oil
Site Use:	Residential
Site Status:	Not reported
Contamination:	Heating Oil
Institutional Control:	Not reported
Record Last Update:	07/08/2022
Project Status:	Underground storage tank release. Tank abandoned 20 years ago. Rainwater filled lines forcing out oil. EPS hired to pump tank out. Indoor air impacts were noted initially, but quickly dissipated. Soils excavated and stockpiled, but were backfilled. Initial site investigation was completed, but report not finished as owner didn't pay the consultant. Additional samples needed from groundwater monitoring wells to confirm compliance with groundwater enforcement standards. Notice to the Land Record will be required to address residual soil contamination prior to site closure.

Actual:
218 ft.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2023
Date Data Arrived at EDR: 02/03/2023
Date Made Active in Reports: 02/28/2023

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Next Scheduled EDR Contact: 07/10/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2022

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Sites Database

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BDPW FLYNN AVE PARCELS
195 & 201 FLYNN AVENUE
BURLINGTON, VT 05401

TARGET PROPERTY COORDINATES

Latitude (North):	44.454703 - 44° 27' 16.93''
Longitude (West):	73.219262 - 73° 13' 9.34''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	641678.8
UTM Y (Meters):	4923703.0
Elevation:	143 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11810480 BURLINGTON, VT
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

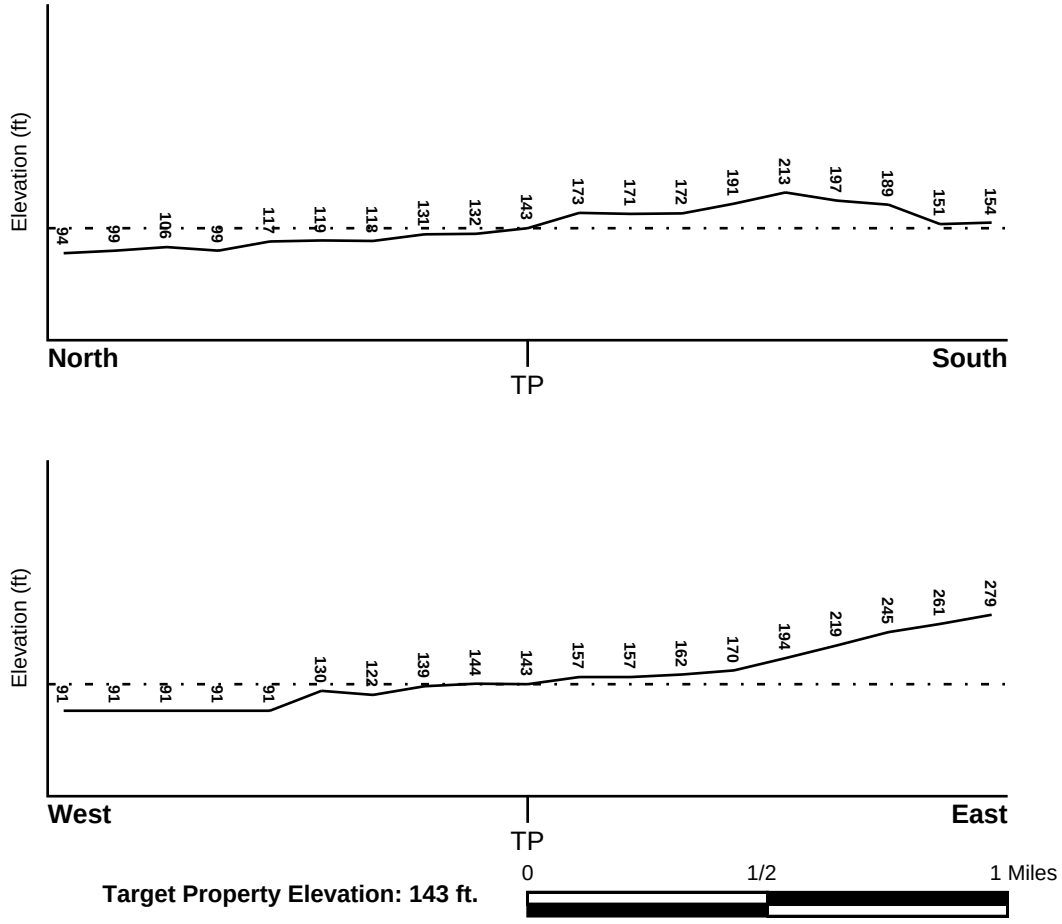

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
50007C0253D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
50007C0251D	FEMA FIRM Flood data
50007C0252D	FEMA FIRM Flood data
50007C0254D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BURLINGTON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	VERGENNES
Soil Surface Texture:	clay
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Moderately well drained. Soils have a layer of low hydraulic conductivity, wet state high in the profile. Depth to water table is 3 to 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.60 Min: 0.06	Max: 7.30 Min: 4.50
2	6 inches	16 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.00	Max: 7.30 Min: 4.50
3	16 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.20 Min: 0.00	Max: 8.40 Min: 5.60
4	29 inches	65 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0.06 Min: 0.00	Max: 8.40 Min: 7.90

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay
loam
fine sandy loam
silt loam
loamy sand

Surficial Soil Types: silty clay
loam
fine sandy loam
silt loam
loamy sand

Shallow Soil Types: loam
channery - silt loam

Deeper Soil Types: unweathered bedrock
sandy loam
gravelly - loam
silty clay loam
silt
silt loam
loam

very fine sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: VT Center for Geographic Information
Telephone: 802-882-3001

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Vermont Public Drinking Water Sources
Source: ANR, Water Supply Division
Telephone: 802-241-3406

Well Driller Report Database
Source: Dept of Environmental Conservation, Water Resource
Telephone: 802-585-4907
Private wells in this layer come from the Department of Environmental Conservation's Water Supply Data Composite. Managed by the Water Supply Division's Well Driller and Well Location Program, the database contains private well information submitted by Vermont licensed well drillers.

OTHER STATE DATABASE INFORMATION

RADON

State Database: VT Radon
Source: Department of Health
Telephone: 802-865-7200
Radon Test Results

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by VHB were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by VHB were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

711 181

CITY CLERK'S OFFICE
Received 12-17 2001, at 5:30 P.M
and recorded in Vol. 711 on Page
of Burlington Land Records. Attest:
J. LaMarche, Asst. City Clerk

WARRANTY DEED

KNOW ALL PERSONS BY THESE PRESENTS, That Unsworth MAACO, LLC, a Vermont Limited Liability Company, GRANTOR, in the consideration of TEN AND MORE DOLLARS paid to its full satisfaction by Chittenden Solid Waste District, a Union Municipality with principal place of business in Williston, Vermont, GRANTEE, by these presents, does freely **GIVE, GRANT, SELL, CONVEY AND CONFIRM** unto the said GRANTEE, Chittenden Solid Waste District and its successors and/or assigns forever, a certain piece of land in the City of Burlington, in the County of Chittenden and State of Vermont, described as follows, viz:

Being a piece or parcel of land situated southerly of Flynn Avenue, so-called, in the City of Burlington consisting of 3.34 acres, more or less, and being all of Parcels 1 and 2 as shown and depicted on a Plan of Land entitled, "'Boundary Line Adjustment', Plat of Survey, Unsworth MAACO, LLC, Property and Metal Works, Inc., Property, Flynn Avenue, Burlington, Vermont" dated December 30, 2000, and revised February 28, 2001, prepared by Warren A. Robenstien and recorded in Map Slide _____ of the City of Burlington Land Records. Said piece or parcel of land is more particularly described as follows:

Commencing at a point marked by an existing iron pin set in the ground, (said point being set in the westerly boundary of the right of way of Vermont Railway and being the southeasterly corner of lands and premises of Metal Works, Inc., as shown on said plan) and proceeding southerly in and along the said westerly boundary of the Vermont Railway right of way a distance of 610.80 feet, more or less, to a point marked by an iron pin set in the ground, said point marking the northerly corner of lands and premises of Barrett Trucking Company, Inc., as shown on said Plan; thence turning to the right at an interior angle of 83°02 feet and proceeding N 67°43'W (mag) in and along the northerly boundary lines of said Barrett Trucking Company, Inc., Foster Real Estate Development, Inc., and M & M Properties a distance of 281.13 feet more or less, to a point marked by an existing iron pin; thence turning to the right at an interior angle of 95°34'10" and proceeding northerly in and along the easterly boundary line now or formerly of Barrett Trucking Company, Inc., a distance of 499.82 feet, more or less, to a point marked by an existing iron pin; thence deflecting to the right at an interior angle of 156°03'50" and proceeding in and along said easterly boundary line of Barrett Trucking Company, Inc., a distance of 153.80 feet, more or less, to an existing iron pin set in the ground; thence turning to the right at an exterior angle of 251°49' and proceeding 15.06 feet, more or less, to an existing iron pin set in the ground, thence deflecting to the right and proceeding 3.50 feet, more or less, to an existing monument set in the ground; thence continuing in approximately the same course a distance of 3.77 feet, more or less, to an iron

MO

pin set in the ground; Thence turning to the right and proceeding southerly in and along the boundary line of Metal Works, Inc., a distance of 50 feet, more or less, to a point marked by an iron pin set in the ground; thence turning to the left and proceeding in and along the boundary line of Metal Works, Inc., a distance of 50.52 feet, more or less, to an existing iron pin; thence continuing in and along said boundary line of Metal Works, Inc., a distance of 143.65 feet, more or less, to the point or place of beginning.

Also included herewith is an easement and right of way 25 feet in width for purposes of ingress and egress and placement of utilities as shown and depicted on the above referred to plan extending from the southerly line of said Flynn Avenue to the above described parcel of land.

In further aid of the description of said easement and right of way, reference is hereby made to the following:

1) Easement Deed from The Exxon Corporation to Howard Space Corporation dated July 18, 1977, and recorded in Volume 242, Page 63 of said Burlington Land Records.

2) Boundary Line Agreement entered into by and between Metal Works, Inc., and Unsworth MAACO, LLC, dated November 5, 2001, and recorded in Volume ____, Page _____ of said Land Records wherein said easement and right of way was widened to 25 feet.

Being all and the same lands and premises conveyed to Unsworth MAACO, LLC, by QuitClaim Deed of Raymond R. Unsworth dated December 30, 1997, and recorded in Volume 580, Page 434 of said Land Records and conveyed to Unsworth MAACO, LLC, from Metal Works, Inc., pursuant to said Boundary Line Agreement dated November 5, 2001, and recorded in Volume ____, Page ____ of said Land Records.

Howard Space Corporation and Raymond R. Unsworth join in this deed, by QuitClaim only, to convey any remaining interest they may have in and to the above described lands and premises.

To said deeds and plan, the records thereof, and to the deeds and records therein referred to, reference is hereby made in further aid of this description.

TO HAVE AND TO HOLD all said granted premises, with all the privileges and appurtenances thereof, to the said GRANTEE, Chittenden Solid Waste District, and its successors and/or assigns, to its own use and behoof forever;

And the said GRANTOR, Unsworth MAACO, LLC, for itself and its heirs, executors and administrators, does covenant with the said GRANTEE, Chittenden Solid Waste District, its successors and/or assigns, that until the ensealing of these presents Grantor is the sole

NO

owner of the premises, and has good right and title to convey the same in manner aforesaid, that it is **FREE FROM EVERY ENCUMBRANCE**, except as aforesaid, and Grantor hereby engages to **WARRANT AND DEFEND** the same against all lawful claims whatever, except as aforesaid.

IN WITNESS WHEREOF, Unsworth MAACO, LLC, hereunto set its hand and seal this 14 day of December A.D. 2001.

BOUNDARY LINE AGREEMENT

This Boundary Line Agreement ("Agreement") is made this 31st day of October, 2001 by and between **Metal Works, Inc.**, a Vermont corporation with its principal place of business at 207 Flynn Avenue in Burlington, Vermont 05401 ("Metal Works"), and **Unsworth MAACO, LLC**, a Vermont limited liability company with its principal place of business at P.O. Box 4060, South Burlington, Vermont 05406 ("MAACO").

WHEREAS, Metal Works and MAACO are adjoining land owners of land and premises described as follows:

1. As to Metal Works, Inc.,

All lands and premises with improvement thereon that was conveyed to Metal Works, Inc. by Special Warranty Deed of Cliffside Leasing, Inc. dated August 13, 1998 and recorded in Volume 599, Page 703 City of Burlington Land Records (the "Metal Works Property").

2. As to MAACO,

All lands and premises with improvement thereon that was conveyed to Unsworth MAACO, LLC by Quitclaim Deed of Raymond R. Unsworth dated December 30, 1997 and recorded in Volume 580, Page 434 of the City of Burlington Land Records (the "MAACO Property").

WHEREAS, Metal Works and MAACO have been unsure of the exact location of a boundary line shared by their properties, and have been unsure of the exact width of a right-of-way that runs along the western boundary of the Metal Works Property that serves and benefits the MAACO Property; and

WHEREAS, Metal Works and MAACO wish to confirm and establish the location of such boundary line and the width of such right-of-way, and wish to provide for a ten (10) foot easement along the northern boundary of the MAACO Property for the benefit of the Metal Works Property.

NOW THEREFORE, for One Dollar and other valuable consideration, the receipt and sufficiency is hereby acknowledged, the parties agree as follows,

1. Metal Works and MAACO hereby give, grant, sell and convey unto the each other, and to each others' successors and assigns, all right and title which they each have in the property described in the deeds referenced above so that the common boundary line is, and/or shall be established as shown on the Survey entitled "Boundary Line Adjustment, Plat of survey of

Unsworth, MAACO property and Metal Works, Inc., property, Flynn Avenue, Burlington, Vermont", dated December 30, 2000, Revised February 28, 2001 prepared by Warren A. Robenstien, L.S., and recorded in map slide ____ of the City of Burlington Land Records (the "Survey", a copy of which is attached as Exhibit A hereto).

2. Metal Works hereby gives, grants and establishes for and for the benefit of the MAACO Property in perpetuity, an easement and right-of-way for ingress and egress of pedestrian and vehicular traffic located as shown on the Survey. Such easement shall be approximately five (5) feet wide and located along the western boundary of the Metal Works Property and adjacent to an existing twenty (20) foot easement for the benefit of the MAACO Property located upon property currently owned by Barrett Trucking Co., Inc. by Special Warranty Deed of Cliffside Leasing Company dated June 9, 1995 and recorded in Volume 525, Page 744 of the City of Burlington Land Records. Such easement shall be at least wide enough so that said existing twenty (20) foot easement (as established by Easement Deed of The Exxon Corporation to Howard Space Corp. dated July 18, 1977 and recorded in Book 242, Page 63 of the City of Burlington Land Records) shall, with the addition of the easement strip granted and established hereunder, be twenty-five (25) feet in width.

3. MAACO hereby gives, grants and establishes for and for the benefit of the Metal Works Property a ten (10) foot wide access easement across the northerly boundary of the MAACO Property, such easement to be used only for accessing Metal Works' building located on the southerly side of the Metal Works Property in order to repair and maintain such building. Said easement shall only last as long as actual maintenance and repair work on the building is done in a reasonable, good faith manner, and in a manner that will not unreasonably interfere with the use of the MAACO Property.

4. This Agreement shall bind and inure to the benefit of the parties hereto and their respective representatives, heirs, successors and assigns. This Agreement shall be governed by Vermont law. The parties agree to execute, acknowledge and deliver such documents, certificates or other instruments and take such other actions as may be reasonably required from time to time to carry out the intent and purpose of this Agreement. This Agreement, and the associated Agreement between the two parties dated June 13, 2001, embodies the entire agreement and understanding between the parties relating to the subject matter hereof and there are no covenants, promises, agreements, conditions or understandings, oral or written, except as herein set forth. This Agreement may not be amended, waived or discharged except by an instrument in writing executed by the party against whom such amendment, waiver or discharge is to be enforced. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.

QUIT CLAIM DEED

KNOW ALL PERSONS BY THESE PRESENTS THAT I, RAYMOND R. UNSWORTH of Key West in the County of Monroe and State of Florida, Grantor, in the consideration of TEN AND MORE DOLLARS paid to my full satisfaction by UNSWORTH MAACO LLC a Vermont Limited Liability Company with it s principal place of business in the County of Chittenden and State of Vermont, Grantee, have REMISED, RELEASED, AND FOREVER QUITCLAIMED unto the said UNSWORTH MAACO LLC, all right and title which I, RAYMOND R. UNSWORTH , or my heirs have in, two parcels of land in Burlington in the County of Chittenden and State of Vermont, described as follows, viz:

Parcel No. 1:

Being all and the same lands and premises as described as Parcel 2: in a Quit-claim Deed from Howard Space Corporation, Inc. to Raymond R. Unsworth dated July 30, 1979, and of record in Volume 263, page 205 of the City of Burlington Land Records. Said property is more particularly described as follows:

"Beginning at a point in and along the Westerly line of the Main Line of the Rutland Railroad Company, said point being South 01 degrees 26' West, 189.20 feet South of a point formed by the intersection of the Westerly line of the Main Line of the Rutland Railroad Company an the Southerly line of Flynn Ave. formerly Park Ave.; thence South 01 degrees 26' West, 110.80 feet to a point; thence North 83 degrees 01' West, 200.00 feet to a point; thence South 01 degrees 26' West, 100.00 feet to a point; thence South 83 degrees 01' East 200.00 feet to a point; thence South 01 degrees 26' West, 215.00 feet to a point; thence South 0 degrees 01' West, 185 feet to a point; thence North 83 degrees 01' West, 281.60 feet more or less to a point; thence North 01 degrees 26' East, 499.50 feet to a point; thence North 25 degrees 02' East, 153.80 feet to a point; thence South 83 degrees 01' East, 15.06 feet to a point; thence South 41 degrees

18' East, 80.60 feet more or less to a point; thence South 89 degrees 41' East, 145.00 feet to the point of beginning."

Parcel No. 2:

Being all and the same lands and premises conveyed to Raymond R. Unsworth by a Warranty Deed of Vermont Structural Steel Corporation dated August 5, 1977, and of record in Volume 246, page 387 of the City of Burlington Land Records. Said property is more particularly described as follows:

"A lot of land with buildings therein, lying west of the Rutland Railroad Company and east of Park Avenue in the City of Burlington together with a right of way over a slip land, which are bounded and described as follows: Beginning at a point in the westerly line of the right of way of the Rutland Railroad Company, at a point three hundred (300) feet south of the intersections of said westerly right of way line with the southerly side line of Park Avenue; thence running southerly in and along said westerly right of way line of the Rutland Railroad Company, one hundred (100) feet to a point; thence deflecting to the right and running westerly in a line parallel with said southerly side line of Park Avenue, two hundred (200) feet to a point; thence deflecting to the right and running northerly in a line parallel with the said westerly right of way line one hundred (100) feet to a point; thence deflecting to the right and running easterly, in a line parallel with said southerly side line of Park Avenue, two hundred (200) feet to the point of beginning.

"Also, a right of way, in common with others, over a strip of land described as follows:

"Beginning at a point in the southerly side line of Park Avenue, two hundred feet (200) westerly from the intersection of said southerly side line of Park Avenue with the westerly line of the right of way of the Rutland Railroad Company; thence running southerly in a line parallel with the said westerly right of way line three hundred fifty (350) feet to a point; thence deflecting to the right and running westerly, in a line parallel with said southerly side line of Park Avenue, nine (9) feet to a point; thence deflecting to the right and running northerly, in a line parallel, with the said westerly right of way line of the Rutland Railroad Company, three hundred fifty (350) feet to a point in the southerly side line of Park Avenue; thence deflecting to the right and running in and along the said southerly side line nine (9) feet to the point of beginning."

Reference is hereby made to the aforementioned instruments, the records thereof and the references therein contained, all in further aid of this description.

TO HAVE AND TO HOLD all right and title in and to said quit-claimed premises, with the appurtenances thereof, to the said UNSWORTH MAACO LLC and its successors and assigns forever. AND FURTHERMORE I, the said RAYMOND R. UNSWORTH, do for myself, my heirs, executors and administrators, covenant with the said UNSWORTH MAACO LLC and its successors and assigns, that from and after the ensealing of my presents the said RAYMOND R. UNSWORTH will have and claim no right, in, or to the said quit-claimed premises.

IN WITNESS WHEREOF, I hereunto set my hand and seal this 30 day of December, 1997.

EASEMENT DEED

EASEMENT DEED made this 18th day of ~~June~~ July, 1977, by and between THE EXXON CORPORATION, a New Jersey Corporation, successor by merger of THE ESSO STANDARD OIL COMPANY, GRANTOR, in consideration of the sum of TEN AND MORE DOLLARS, paid to its full satisfaction by HOWARD SPACE CORP., a Vermont Corporation, GRANTEE.

WHEREAS, GRANTOR is the owner in fee simple of a certain parcel of real estate situate in the City of Burlington, County of Chittenden and State of Vermont, to wit:

> Being all and the same land and premises conveyed to Esso Standard Oil Company by the Warranty Deed of Colonial Beacon Oil Company dated February 18, 1948 and recorded in Volume 129, Page 399 of the City of Burlington Land Records, excepting that parcel of land conveyed to Sun Oil Company by the Warranty Deed of Esso Standard Oil Company dated August 5, 1948 and recorded in Volume 132, Page 133 of said Land Records.

WHEREAS, the GRANTEE is the owner in fee of an adjoining parcel of land, to wit:

> Being all and the same land and premises conveyed to the Howard Space Corp. by the special Warranty Deed of Sun Oil Company of Pennsylvania dated January 24, 1977 and recorded in Volume 243, Page 45 of said Land Records. Said land and premises benefited by a right of way easement used in common with others over Grantor's previously described lands, and further described as follows: Fifteen (15) feet in width leading from Flynn Avenue across the lands of Esso Standard Oil Company, the easterly line of said right of way being two hundred (200) feet westerly from and parallel to the westerly line of the Rutland Railroad Company property.

WHEREAS, the GRANTEE is desirous of widening the width of said right of way to twenty (20) feet.

WHEREAS, the GRANTOR has agreed in consideration of TEN AND MORE DOLLARS paid by the GRANTEE, the receipt of which

242 64

is hereby acknowledged to grant to the GRANTEE a right of way easement, to be used in common with others, twenty (20) feet in width, its centerline being the centerline of the previously described right of way as shown on a Plan recorded in Volume 134, Page 19 of said Land Records.

Now this deed witnesseth that in consideration of said TEN OR MORE DOLLARS paid by the GRANTEE to the GRANTOR, the GRANTOR hereby grants unto GRANTEE, its successors and assigns, full and free use of said right of way.

IN WITNESS WHEREOF, the GRANTOR has hereunto set its hand and seal by R. C. KNOWLES, this 18th day of ~~June~~ July, 1977.

SPECIAL WARRANTY DEED

THIS INDENTURE WITNESSETH That SUN OIL COMPANY OF PENNSYLVANIA, a Pennsylvania corporation, successor by merger to Sun Oil Company, a New Jersey Corporation, 1608 Walnut Street, Philadelphia, Pennsylvania 19103,

GRANTOR, in consideration of the sum of Twelve Thousand Dollars ($12,000.00) paid to its full satisfaction by HOWARD SPACE CORP., a Vermont corporation, Post Office Box 241, Burlington, Vermont 05401,

GRANTEE , by these presents does freely give, grant, sell, convey and confirm unto the Grantee , the heirs or successors and assigns of the Grantee forever, all that certain parcel of real estate situate in the City of Burlington, County of Chittenden, State of Vermont, to wit:

BEGINNING at a point in and along the Westerly line of the Main Line of the Rutland Railroad Company, said point being South 01 degrees 26' West, 189.20 feet South of a point formed by the intersection of the Westerly line of the Main Line of the Rutland Railroad Company and the Southerly line of Flynn Ave. formerly Park Ave.; thence South 01 degrees 26' West, 110.80 feet to a point; thence North 83 degrees 01' West, 200.00 feet to a point; thence South 01 degrees 26' West, 100.00 feet to a point; thence South 83 degrees 01' East 200.00 feet to a point; thence South 01 degrees 26' West, 215.00 feet to a point; thence South 0 degrees 01' West, 185.00 feet to a point; thence North 83 degrees 01' West, 281.60 feet more or less to a point; thence North 01 degrees 26' East, 499.50 feet to a point; thence North 25 degrees 02' East, 153.80 feet to a point; thence South 83 degrees 01' East, 15.06 feet to a point; thence South 41 degrees 18' East, 80.60 feet more or less to a point; thence South 89 degrees 41' East, 145.00 feet to the point of beginning.

Being a portion of the same premises conveyed to Sun Oil Company by deed recorded in City Clerk's Office, Burlington, Vermont in Vol. 126 on Page 359, and all of the same premises conveyed to Sun Oil Company by deed recorded in City Clerk's Office in Vol. 132 on Page 133.

Subject to easements, restrictions and conditions of record, easements or restrictions visible upon the ground and any state of facts which an accurate survey would disclose.

There is included in this conveyance a right of way in common with others over the premises formerly owned by Colonial Beacon Oil Companies which right of way is fifteen (15) feet in width leading from Flynn Avenue in a southerly direction to the above conveyed premises. The easterly line of said right of way is two hundred (200) feet westerly from and parallel to the westerly line of the Rutland Railroad Company. Said right of way having been conveyed to Sun Oil Company by Warranty Deed of Fred C. Hill and Edith F. Hill recorded in Volume 126, Pages 359-361 of the City of Burlington Land Records; and, Warranty Deed to Sun Oil Company from Esso Standard Oil Company dated August 5, 1948 and recorded in Volume 132, Page 133 of the City of Burlington Land Records.
