RE: Petroleum contamination at Old Holmes Transport Company,
White River Junction, Site (#90-542)

Dear Mr. Gray:

The above site remains on the active hazardous sites list with the Sites Management Section (SMS). In order to have this site removed from the list, additional information is needed. This information includes:

1. The current status of the 20 yards of petroleum contaminated stockpiled soils which were removed during the excavation of three underground storage tanks on June 28, 1990 as well as a plan to remediate or dispose of them, if that has not already been done.

If the soils have been properly disposed of this site can be closed. Your cooperation in this matter will insure proper site closure and will be greatly appreciated. Please call us if you have any questions or concerns.

Sincerely,

A handwritten signature in cursive script that reads "Chuck Schwer".

Charles B. Schwer, Supervisor
Sites Management Section
