

MAINTENANCE and AVIATION DIVISION

**TO:** Linda Woodard, VT DEC, Sites Management Section

**FROM:** Michael B. Morissette, Hazardous Materials & Waste  
Coordinator

**DATE:** August 30, 2000

**SUBJECT:** Bennington Monument (Site #92-1211) and Burlington  
Southern Connector (Site #92-1259)

The soils from the Bennington Monument Site (Site #92-1211) were retested in the Spring of 1993 and thin spread later that year. I believe that a similar request was made several years ago for this information.

The Southern Connector (Site #92-1259,1260) soils were moved in July of 1993 and spread at the Highgate Airport. If you need additional information, please give me a call or e-mail. Thanks.
