HAYDEN BUILDING

Dear Marc:

The Johnson Company recently submitted a report to you describing the November 16, 1994 removal of two underground storage tanks (UST) at Norwich University. The DEC's UST Removal Form, which was included with that report, includes a request for information regarding water supply wells within one-half mile of the UST. On the form submitted for these UST removals, we indicated that information from the Water Supply Division of the Agency of Natural Resources (ANR) was forthcoming. The purpose of this letter is to provide you with a summary of the information we have received from the ANR.

The maps supplied by the ANR indicate that there are six wells within one-half mile of the area from which the USTs were removed at Norwich University (the site). The well owner names and distances from the site are listed below:

Old Red Mill Builders	0.45 miles northeast of site
Old Red Mill Builders	0.3 miles northeast of site
Peter Demasi	0.2 miles south of site
Eduardo Hernandez	0.4 miles east of site
Town of Northfield	0.5 miles south of site
Town of Northfield	0.5 miles south of site

As our report on the UST removals indicated, the contamination around these USTs was of limited extent, and it did not appear that the groundwater was impacted. We do not believe that any of the water supply wells listed above are at risk of contamination due to the USTs that were removed at Norwich University on November 16, 1994.

Please call if you have any questions regarding this information.

Sincerely,

THE JOHNSON COMPANY, INC.
