RE: April 2009 Ground Water and Supply Well Monitoring Summary Report
Londonderry Citgo/Londonderry Shopping Center – **SMS #1996-2015**
5700 Route 100
Londonderry, Vermont

Dear Mr. Cropley:

At the request of Summit Distributing, LLC (Summit), GeoInsight, Inc. (GeoInsight) prepared this report to summarize the April 2009 ground water and supply well monitoring event performed at the Londonderry Citgo/Londonderry Shopping Center property located at 5700 Route 100 in Londonderry, Vermont (the site). A Site Locus map is presented as Figure 1 and a Site Plan is presented as Figure 2.

The scope of work for these activities was outlined in a work plan transmitted to the Vermont Department of Environmental Conservation (VTDEC) on February 25, 2009. The VTDEC approved the proposed work plan and associated costs with minor modification in an e-mail dated March 23, 2009 (Attachment A). In addition to the ground water and supply well monitoring, several monitoring wells were repaired during the April 2009 event pursuant to the VTDEC-approved work plan.

MONITORING WELL ROADBOX REPAIR

On April 16, 2009, GeoInsight personnel repaired three monitoring well roadboxes including jack-hammering the concrete collars and removing the damaged roadboxes, setting new well casing “J-plugs,” and cementing new roadboxes into the ground surface at monitoring wells MW-1R, MW-7, and MW-11. An automobile was parked on top of well MW-6 during the April 2009 monitoring event and, therefore, roadbox repairs could not be completed at this well.

MONITORING ACTIVITIES

Sampling and Analysis

GeoInsight performed a ground water and supply well monitoring event at the site on April 16, 2009. Sampling activities included gauging ground water elevations and collecting ground water samples from monitoring wells MW-1R, MW-7, MW-8, MW-10, and MW-S2. In addition, ground water elevations were gauged at 12 monitoring wells (MW-1R, MW-2R, MW-3 through MW-8, MW-10, MW-11, MW S-2, and MW S-3). Ground water elevations were measured at these wells using an electronic water level meter and gauging data are summarized in Table 1. Monitoring well MW-4 was dry upon arrival during the April 2009 monitoring event and, consequently, a depth to ground water measurement was not collected from this well.

Ground water samples were collected from the monitoring wells using dedicated, disposable polyethylene bailers. Prior to sample collection, at least three times the volume of water in the wells was purged using the bailers or the wells were purged dry and allowed to recharge before sampling. After a short stabilization period (approximately one hour), ground water samples were collected from the monitoring wells for analyses of volatile organic compounds (VOCs).

The ground water samples were submitted to Resource Laboratories, LLC of Portsmouth, New Hampshire. The samples were analyzed by United States Environmental Protection Agency (USEPA) Method 8260B, but were reported using the VTDEC USEPA Method 8021 list for selected petroleum constituents.

Table 2 provides a current and historical summary of ground water VOC data for the site. The laboratory analytical report for the April 2009 monitoring event is presented in Attachment B. An updated discussion of ground water impacts at the site is provided in the Updated Conceptual Model section of this report.

Also during the April 2009 event, the point-of-entry treatment (POET) systems serving the water supply located at the site and the Thorne-Thomsen residence were sampled. In addition, supply well samples were collected from 13 local residences and businesses (Rogers residence, Junker residence, Rowley residence, Allen residence, Gordon residence, Bresnick residence, Galpin residence, the Garden Restaurant, Jelley's Mobil, the Hare Salon, Second Congregational Church, Thrifty Attic/Church Store, and the former Merrill Service Center). A supply well sample was not collected from the Merrill residence as numerous requests for access were not answered by the homeowner. The former Londonderry Post Office building was also not sampled because the supply well was not operational during the April 2009 monitoring event. Drinking water samples collected from the site, the Thorne-Thomsen POET system, and the local area residential and business supply wells were analyzed for VOCs by USEPA Method 524.2.

Quality Assurance/Quality Control

GeoInsight included a blind field duplicate sample during the April 2009 monitoring event to evaluate sampling quality assurance and quality control (QA/QC). The field duplicate sample submitted to the laboratory during the April 2009 monitoring event was a split/duplicate sample collected from well MW-8, which was labeled as "Duplicate." VOCs were not detected above the laboratory practical quantitation limits (PQLs) in both the MW-8 ground water sample and the blind duplicate submitted for laboratory analysis.

In addition to the QA/QC sample, a trip blank sample was included by the laboratory with the sample container for this monitoring event. VOCs were not detected above the laboratory PQLs in the trip blank sample submitted for the April 16, 2009 monitoring event. The trip blank sample was comprised of a laboratory-prepared VOC vial containing deionized water, which accompanied the sample containers in a cooler from delivery from the laboratory through receipt by the laboratory.

GeoInsight also reviewed the surrogate recovery data reported by the laboratory for the samples collected during the April 2009 monitoring event, which were within the acceptable limits listed by the laboratory in the analytical reports.

In general, the QA/QC samples indicated that the data collected were technically sound, usable, and meet the data quality objectives (DQOs) of on-going site investigation activities. A summary of QA/QC sample data is provided in Table 3.

Five of the supply well and POET samples collected in April 2009 had detected concentrations of chloromethane slightly above the laboratory PQLs. GeoInsight contacted the laboratory to discuss the detections of chloromethane and the laboratory indicated that it had been encountering relatively low background concentrations of chloromethane in its container supply at that time. Because of the information provided by the laboratory and because chloromethane is not typically associated with petroleum releases, the presence of chloromethane in some of the April 2009 supply well and POET samples is believed to be from laboratory handling.

Ground Water Sampling Results

Laboratory analytical results for the April 2009 ground water monitoring indicate that methyl tertiary butyl ether (MTBE) was the only VOC detected above laboratory PQLs in the ground water samples collected and MTBE was only present in one monitoring well (well MW-10). The detected MTBE concentration in sample MW-10 of 2 micrograms per liter ($\mu\text{g}/\text{L}$) was below the applicable Vermont Primary Groundwater Enforcement Standard (VPGES) of 40 $\mu\text{g}/\text{L}$ for MTBE. A historical summary of ground water VOC data is provided in Table 2.

Supply Well and POET Sampling Results

Analytical results from the April 2009 monitoring event indicate that VOCs were not detected above laboratory PQLs in the samples collected from the Rogers residence, Rowley residence,

Allen residence, Gordon residence, Bresnick residence, Galpin residence, Jelley's Mobil, Second Congregational Church, and the Thrifty Attic/Church Store supply wells on April 16, 2009. MTBE was detected at a concentration above laboratory PQLs (2.3 µg/L), but below applicable drinking water guidelines in a sample analyzed from the former Merrill Service Center supply well. In addition, chloromethane was detected above laboratory PQLs, but below applicable drinking water guidelines in samples analyzed from the Junker residence (0.6 µg/L), the Hare Salon (0.5 µg/L), and the Garden Restaurant (0.5 µg/L). The drinking water guideline for chloromethane is 30 µg/L. As previously discussed in the QA/QC section of this report, the presence of chloromethane in the April 2009 samples is believed to be a result of laboratory handling.

MTBE and methylene chloride were detected above laboratory PQLs, but below applicable drinking water guidelines in samples analyzed from the site POET system influent at concentrations of 2.6 µg/L and 0.6 µg/L, respectively. MTBE (0.9 µg/L) was the only VOC detected above laboratory PQLs in the site POET system effluent sample collected during April 2009.

MTBE was detected at concentrations above laboratory PQLs (0.5 µg/L), but below applicable drinking water guidelines in samples collected from the Thorne-Thomsen residential POET system influent. VOCs were not detected above laboratory PQLs in the sample collected from the Thorne-Thomsen POET system effluent during April 2009.

GeoInsight also collected system mid-point samples from the POET systems serving the site and Thorne-Thomsen supply wells. The April 2009 mid-point sample data are summarized in Table 3. Historical POET system and supply well sampling data for the site, Thorne-Thomsen residence, and Rogers residence are summarized in Table 4.

GeoInsight transmitted the results of the April 2009 supply well and POET system sampling to the applicable property owners in letters dated May 26, 2009. Copies of the supply well and POET system results letters were also provided to the VTDEC and the POET system operator, John Beauchamp of the Vermont Water Treatment Company on May 26, 2009.

UPDATED CONCEPTUAL MODEL

Ground Water Elevations and Flow Direction

Using the ground water elevation data collected in April 2009, GeoInsight plotted ground water elevation contours, which are presented on Figure 3. The observed ground water elevation contours for April 2009 indicated ground water flow was directed to the south, which was generally consistent with flow patterns mapped for recent monitoring events performed by GeoInsight and the previous environmental consultant for the site (Environmental Compliance Services).

VOC Distribution and Trends

Concentrations of MTBE detected in ground water samples during the April 2009 monitoring event were plotted on Figure 4. The April 2009 data were generally consistent with recent data, indicating decreasing ground water VOC concentrations and a contracting VOC plume. Further, VOCs detected during April 2009 were limited to MTBE in well MW-10 at a concentration of 2 µg/L and detected VOCs have not exceeded applicable VPGESs in monitoring wells sampled at the site since the September 2007 monitoring event when benzene, detected at well MW-10 (27.1 µg/L), exceeded the VPGES of 5 µg/L.

CONCLUSIONS AND RECOMMENDATIONS

Based upon the recent decreasing VOC constituent trends in ground water and supply well data collected, the site may be eligible for Sites Management Action Closure after additional monitoring events in 2009 or 2010, if VOCs continue to remain at concentrations below applicable standards and continue to exhibit decreasing trends. GeoInsight recommends completing the three remaining monitoring events described in the VTDEC-approved 2009 work plan for the site. Because well MW-6 was inaccessible during the April 2009 monitoring event, the previously proposed roadbox replacement for this well will be performed during the July or September 2009 monitoring events.

If you have questions regarding the contents of this letter report, please call us at (603) 314-0820.

Sincerely,
GEOINSIGHT, INC.

	04/16/09	<i>Well removed from monitoring program</i>								

Notes:

1. Results reported in micrograms per liter ($\mu\text{g}/\text{L}$).
2. NS - not sampled.
3. ND(X) - constituent not detected above detection limit noted
4. VPGES - Vermont Primary Groundwater Enforcement Standards.
5. Concentrations in bold exceed VPGES.
6. Prior to 10/10/08, samples were collected by Environmental Compliance Services
7. EDB - 1,2-dibromoethane; 1,2-DCA - 1,2-dichloroethane; MTBE - methyl tert butyl ether
8. --- - data not reported in historical reports or data no longer available
9. * - Effective on 02/28/07, trimethylbenzene (TMB) enforcement standards increased to 350 $\mu\text{g}/\text{L}$, and includes 1,2,4-TMB and 1,3,5-TMB.
10. **Well MW-1R was resampled on 10/24/08 due to damaged sample vials received by the laboratory from the initial 10/09/08 monitoring event.

Notes:

1. Results reported in micrograms per liter ($\mu\text{g}/\text{L}$).
2. NS - not sampled; NA - not applicable; NR - not reported; POET system - point-of-entry treatment system.
3. ND(X) - constituent not detected above detection limit noted.
4. MCL - Maximum Contaminant Levels for public water supplies from Chapter 21, Vermont Water Supply Rule (04/25/05) or Vermont Department of Health, Drinking Water Guidance (December 2002).
5. VHA - Vermont Health Advisories - guidelines for concentrations of chemicals in drinking water that do not have MCLs; VAL - Vermont Action Levels for eight chemicals of specific health concern in public water systems both established by the Vermont Department of Health (December 2002, revised February 2007).
6. Total TMB - 1,2,4-trimethylbenzene and 1,3,5-trimethylbenzene.
7. MTBE - methyl tert butyl ether; TAME - tertiary amyl ethyl ether.
8. Sampling performed prior to the October 2008 monitoring event was not completed by GeoInsight, Inc.
These historical data were obtained from historical reports.

ATTACHMENT A

2009 WORK PLAN AND VTDEC EMAIL APPROVAL

From: Cropley, Tim [Tim.Cropley@state.vt.us]

Sent: Monday, March 23, 2009 3:51 PM

To: Darrin L. Santos

Subject: RE: Londonderry Citgo, SMS #1996-2015

Hi Darrin. I took some time to review the work plan and cost estimate today. I have a few minor comments.

- 1) The mileage rate listed in the March and Sept cost estimates had \$0.585 instead of the going rate of \$0.55 that's list in June and Dec.
- 2) I'd like MW-7 added in for sampling as well.
- 3) Keep in mind that I will be asking for samples from all wells at some point prior to either well abandonment or site closure. I'm not opposed to doing the sampling and abandonment in a phased approach. This way we can abandon those that are no longer needed since if we have adequate coverage without them and there's been nothing there for more than 1-2 years.

Based on the above, I approve the work plan and cost estimate dated February 25, 2009 with the addition of MW-7 sampling and analysis during the March and Sept event and the slight mileage reimbursement adjustment.

Please let me know if you have any additional comments or questions.

Hey Darrin. It's on my to do list. I plan to get it reviewed this week. Stay tuned.

Tim

Hi Tim,

I'm wondering if you had a chance to review the 2009 Work Plan and Budget for the Londonderry Citgo site yet (see Feb 25 email below). We're currently scheduling spring field work (as the weather clears) and there was a proposed March or April event for this site.

Best Regards,

Darrin Santos

Subject: RE: Dec 2008 POET data, Londonderry Citgo, SMS #1996-2015

Hi Tim,

As discussed (albeit a few days behind schedule), attached are the December 2008 monitoring report and a Work Plan and Budget for 2009 monitoring activities for the Londonderry Citgo site.

The total budget appears to be slightly higher than ECS's from last year; however, I believe that is a result of GeoInsight proposing to use full list VOC 524.2 analyses for the drinking water samples as opposed to the 8021 short list (the cost for a 524.2 is roughly twice that of the 8021). We also have costs included for well road-box replacement during the March/April event and an extra field staff member to assist with the road-box repair, ground water monitoring, and area supply well sampling, which were not in the 2008 budget.

Please contact me with any questions regarding the December 2008 report or the 2009 Work Plan and Budget.

Best Regards,

Darrin Santos

Date of Submittal:	February 25, 2009		Facility Address:	5700 Route 100		Mailing:	240 Mechanic Street			
			Town:	Londonderry, Vermont		Address:	Lebanon, New Hampshire 03766			
Class Overall Breakdown								Breakdown by Class		
Description By Task	Contractor	Description	Code	Units	Type	Rate	Cost	Eng./Hydro Services	Laboratory Services	Other
WORK PLAN AND BUDGET PREPARATION										
Includes costs to research current and historical data to develop 2009 monitoring plan and costs to prepare the Work Plan and Budget.	GeoInsight	Principal	E	1	hrs	\$125	\$125.00	\$125.00		
		Senior Geologist	E	4	hrs	\$115	\$460.00	\$460.00		
							Task Total	\$585.00	\$585.00	
MARCH/APRIL 2009 MONITORING										
March/April 2009 Project Management and Coordination	GeoInsight	Senior Geologist	E	1	hrs	\$115	\$115.00	\$115.00		
		Staff Eng/Geo	E	8	hrs	\$75	\$600.00	\$600.00		
		Clerical	E	2	hrs	\$50	\$100.00	\$100.00		
							Subtotal	\$815.00	\$815.00	
Includes scheduling 15 supply well sampling times.	GeoInsight	Staff Eng/Geo (w/ travel)	E	12	hrs	\$75.00	\$900.00	\$900.00		
	(sampling & road box repair)	Tech-II (w/ travel)	E	12	hrs	\$65.00	\$780.00	\$780.00		
		Mileage	E	228	miles	\$0.585	\$133.38	\$133.38		
		Water Level Meter	E	1	day	\$25.00	\$25.00	\$25.00		
		Sample Equip/Materials (per well)	E	4	each	\$15.00	\$60.00	\$60.00		
March/April 2009 Ground Water and Drinking Water Sampling and Analyses, Road-Box Repair		Jack Hammer	O	1	day	\$75.00	\$75.00			\$75.00
		Generator	O	1	day	\$50.00	\$50.00			\$50.00
		Road Boxes	O	4	each	\$75.00	\$300.00			\$300.00
		J-Plugs	O	4	each	\$12.00	\$48.00			\$48.00
		Concrete	O	4	bag	\$12.00	\$48.00			\$48.00
Includes sampling of 4 monitoring wells and gauging elevations in 8 other; sampling two POET systems; sampling up to 15 area supply wells; and replacement of road-boxes at wells MW-1R, MW-6, MW-7, and MW-11.	Resource Labs	Petrol VOCs by USEPA 8021	L	5	each	\$75.00	\$375.00			\$375.00
	NOTE 1	VOCs by 524.2 (POET Systems)	L	7	each	\$130.00	\$910.00			\$910.00
		VOCs by 524.2 (15 Supply Wells)	L	15	each	\$130.00	\$1,950.00			\$1,950.00
		Laboratory Subcontractor Markup	L	0.1	M/U	10%	\$323.50			\$323.50
						Subtotal	\$5,977.88	\$1,898.38	\$3,558.50	\$521.00
March/April 2009 Summary Report (submitted electronically to the VTDEC and to include flow and plume maps) and POET and supply well sampling letters (15).	GeoInsight	Senior Geologist	E	2	hrs	\$115	\$230.00	\$230.00		
		Staff Eng/Geo	E	16	hrs	\$75	\$1,200.00	\$1,200.00		
		CADD	E	4	hrs	\$60	\$240.00	\$240.00		
		Clerical	E	6	hrs	\$50	\$300.00	\$300.00		
							Subtotal	\$1,970.00	\$1,970.00	
						Task Total	\$8,762.88	\$4,683.38	\$3,558.50	\$521.00

APRIL 2009 ANALYTICAL REPORT

Laboratory Report

Resource Laboratories, LLC
124 Heritage Avenue #10 Portsmouth, NH 03801

Eric Johnson
GeoInsight, Inc.
25 Sundial Avenue
Suite 515 West
Manchester, NH 03103

PO Number: None
LabID: 16532
Date Received: 4/17/09

Project: 5599-000 Summit-Londonderry

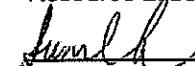

Attached please find results for the analysis of the samples received on the date referenced above.

Unless otherwise noted in the attached report, the analyses performed met the requirements of Resource Laboratories, LLC Quality Assurance Plan. The Standard Operating Procedures (SOP) are based upon USEPA SW-846, USEPA Methods for Chemical Analysis of Water and Wastewater, Standard Methods for the Examination of Water and Wastewater and other recognized methodologies. The results contained in this report pertain only to the samples as indicated on the chain of custody.

Resource Laboratories, LLC maintains certification with the agencies listed below.

We appreciate the opportunity to provide laboratory services. If you have any questions regarding the enclosed report, please contact the laboratory and we will be glad to assist you.

Sincerely,
Resource Laboratories, LLC

Susan Sylvester
