RE: Spill Management Activity Complete at Rock of Ages, Barre VT (DEC Spill # 97-082).

Dear Mr. Garceau:

The Vermont Department of Environmental Conservation has reviewed the information you sent regarding the above referenced site. Based on the information received, we conclude that:

- The investigation has adequately defined the site.
- The Above ground tank system has been repaired.
- No unacceptable threat to human health or the environment exists onsite.
- No known migration of hazardous materials from the site is occurring.

Based on the investigation, remediation, and recently completed soil sampling from we feel that this site requires no further management. This designation does not release the Rock of Ages Corp. from any past or potential future liability which may arise from contamination which may originate from the site. It does mean, however, that we are not requiring any additional work be performed at this site in response to the release of fuel oil at the property.

Please feel free to contact me with any further questions or comments you may have.

Sincerely,

Marc Roy, Chief
Technical Services Section
