Ms. Beth Torpey
Environmental Coordinator
Citizens Utilities
P.O. Box 604
Newport, VT 05855

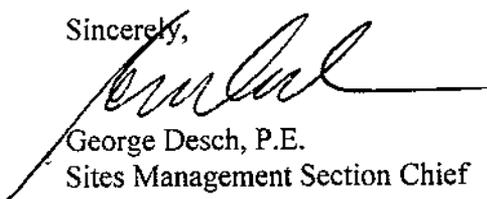

Dear Ms Torpey

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has reviewed the results of environmental investigations and remedial activities conducted at the Citizens Utilities offices and warehouse facility in Grand Isle, Site # 97-2273. Based on this and current site conditions, the SMS has determined the following:

- All soils contaminated above health based risk levels have been removed from the site and disposed of as per state and federal regulations, and
- no groundwater contamination was discovered at this site.

Based on these findings, the SMS has concluded that this site is eligible for a designation of "Site Management Activity Completed" (SMAC). This SMAC designation does not release the responsible parties from any past or future liability associated with the contamination discovered on this site. It does, however, mean that the SMS is not requesting any additional work at this time.

Sincerely,

George Desch, P.E.
Sites Management Section Chief
