Re: Stockpiled soil at Champlain Farms in Northfield (Site # 97-2316)

Dear Mr. Butler

Stockpiled soils were sampled and headspace screened on 30 June 1998. Three samples were collected using a tube sampler. Soils were placed in plastic bags and headspace screened using a portable PID. Each sample had a headspace reading of less than 1 ppm as benzene. An Off-Site Soil Treatment Request Form will be sent to the WSI Moretown landfill and will be forwarded to you upon their approval.

Please contact me if you have any questions concerning this information.

Sincerely

Roland Luxenberg, P.E.
