Mr. Chip Harris
Upper Valley Press, Inc.
P.O. Box 459
North Haverhill, NH 03774

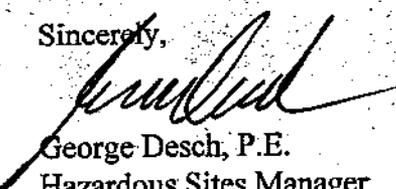

Dear Mr. Harris:

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has reviewed the results of environmental investigations and the corrective action carried out at the Upper Valley Press site (#98-2358) in Bradford, Vermont. Based on these data and current site conditions, the SMS has determined the following:

- The sludge contamination at this site has been removed, pipes have been cleaned, and floor drains have been sealed as per the Corrective Action Plan,
- groundwater at this site has not been impacted above enforcement standards by the contamination addressed under the approved Corrective Action Plan, and
- there is no unacceptable risk posed to human health or the environment related to the contamination that was remediated under the approved Corrective Action Plan.

Based on these findings, the SMS has concluded that this site is eligible for a designation of "Site Management Activity Completed" (SMAC). This SMAC designation does not release the responsible parties from any past or future liability associated with the contamination discovered on this site. It does, however, mean that the SMS is not requesting any additional work at this time.

Sincerely,

George Desch, P.E.
Hazardous Sites Manager
