RE: Site Management Activity Completed, Perry's Station, Bradford, Vermont
(site #98-2394)

Dear Mr. Perry:

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has received and reviewed the July 1, 2003 Griffin International, Inc. report concerning the above referenced site. Based on a review of the file, the current conditions at this site and the results of the additional information submitted, the SMS has determined that this site meets the Waste Management Division's Sites Management Activities Complete (SMAC) policy.

This means that the SMS has determined the following:

- the source of the potential contamination at this site has been adequately characterized and removed (the two 10,000-gallon underground storage tanks have been removed);
- seven truck loads of contaminated soils were excavated and moved to a Perry Oil owned piece of property. These soils were treated and thin spread in 1999;
- groundwater under the site meets Vermont Groundwater Enforcement Standards;
- the unused monitoring wells located on the site were properly closed in 2004;

Alson Perry Letter
Perry's Station site

Page 2

- the site does not pose an unreasonable risk to human health or the environment.

Based on these findings, the site has been assigned a Site Management Activities Completed (SMAC) designation. Sites which the Waste Management Division has determined require no further management are classified as SMAC. This designation does not release Perry's Oil from any past or future liability which may arise from the petroleum contamination which originated from the underground storage tank system at this site. It does mean that the SMS is not requiring any additional work be performed at this site in response to the contamination discovered in 1998. If any additional information comes to light in the future, then the SMS may reconsider this determination.

If you have any questions concerning this matter, please feel free to contact Richard Spiese or me at (802) 241-3888.

Sincerely,

George Desch, P.E., Chief
Sites Management Section
