RE: Site Management Activity Completed, Rotary Mart, Burlington (site #98-2527)

Dear Mr. Simendinger:

The Vermont Department of Environmental Conservation, Sites Management Section (SMS) has received your letters requesting a Sites Management Activities Complete (SMAC) designation for the Rotary Mart site located in Burlington. Based on the information in your letters, the information in the file, and the status of the site, the SMS has assigned a SMAC designation for the Rotary Mart site.

This means that the SMS has determined the following:

- The source of the petroleum contamination (the piping for three underground storage tanks) was replaced in 1998;
- Groundwater under this site meets Vermont Groundwater Enforcement Standards;
- The site does not present a current threat to human health or the environment.

Based on these findings, the site has been assigned a Site Management Activities Completed (SMAC) designation. Sites which the Waste Management Division has determined require no further management are classified as SMAC. This designation does not release Wesco, Inc. from any past or future liability which may arise from any contamination which may be present at the facility. It does mean that the SMS is not requiring any additional work be performed at this site in response to the contamination discovered in 1998. If any additional information comes to light in the future, then the SMS may reconsider this determination.

If you have any questions concerning this matter, please feel free to contact Richard Spiese or me at (802) 241-3888.

Sincerely,

George Desch, P.E., Chief
Sites Management Section
