Gents - FYI

Do we have a FAQ/ fact/ contact sheet regarding the PFOA issue and the steps that the state is taking to address it?

Thanks
Ethan

Subject: contacts

Hi Ethan,

The Board of Directors has asked me to inquire about the proper contacts to reach out to regarding HoorWA's position on water quality, specifically PFOA's in the North Bennington area. We have sent similar letters to New York officials regarding the situation on Hoosick Falls. If you could refer me to or send me a list of state officials and agency leaders I would greatly appreciate. We are not saying in the least that Vermont is not doing everything it can to address the issue but rather want to state our position on the importance of monitoring the Hoosic and Walloomsac Rivers.

Thanks for any help you can provide.

Steve McMahon
