Categories: PFOA

Alyssa,

I talked to Ellen PD about this on Friday. She agreed that developing a DW 101 handout would be better in the short term and I told her to expect to discuss this on Monday and Tuesday with you – as well as proceeding with developing the compliance data for future presentation in a couple of weeks to follow up to the initial testimony next week.

With respect to DW 101, and What Else? - we generally talked about laying it out along the lines you have outlined, but I suggested an overview of the permitting programs, from source protection, operating permits thru construction permitting and how they are layered, with public health protection as the overarching goal. I think an overview of the sanitary survey program (Jim Siriano and Allison role) would be good. I did tell her you wanted to keep it to a page or two, - that will be a challenge, but she was going to start drafting.

GD

Subject: Drinking Water- Testimony Needs

George- Here are some thoughts on the drinking water testimony this week. Ccing Matt in case he wants to weigh in.

Handouts:

- Drinking Water 101
- DEC N. Bennington Memo w/updated test results
- PFOA fact sheet from VDH

With regard to the Drinking Water 101 handout, here are some thoughts:

- Overview of federal laws, state laws
- Types of systems
- Testing regimen
- Roles- local, state level
- WHAT ELSE?

Testimony:

- 101 Review
- Characterization of how the state is doing
 - I NEED TO REVIEW THIS WITH ELLEN NEXT WEEK
- Process of review

- In light of Flint, Michigan- what we are doing
- In light of North Bennington- what we are doing
- THIS IS WHAT WE NEED TO DISCUSS:
 - RULE CHANGES?
 - MCL CHANGES?
 - PUBLIC NOTIFICATION SOPS?
 - ENFORCEMENT SOPS?

Need a list of what we are exploring. Tell them that we are happy to come back in two weeks with the plan to present to them. ??
