**Importance:** High

**Categories:** PFOA

Thanks so much Alyssa for this update but the PFOA is not our only one issue – the other one is the Wetlands Program position which was the first one we were seeking back in mid-February due to grant requirements on some additional money we were awarded. It's work that needs to get started ASAP given the timeline involved and it was limited service for 1.5 years. I'll check our vacant position list but we don't have any that are just hanging out there last I looked since we used all but the DWGW Environmental Tech position when we lost the retirement positions so this might not be doable or a case where we need to tell a program that they need to hold off on recruiting a position so we can reallocate it elsewhere. The one for AID and the solid waste position I feel are absolutely fine to wait until May but the Wetlands and PFOA are critical. I'll check our vacant list in the meantime and thanks for your help!

Joanna- Michael Clasen called me and asked that we hold off on submitting this until May. We can RFR an existing vacancy now and move forward with filling the PFOA position, then swap it out later. I'll call you about it.
